

# Whistic Trust Catalog

The single source of trust for buyers and sellers

## Build Trust with Your Customers

Building trust with customers and prospects isn't easy for vendors—especially if it looks like they're hiding something. The Whistic Trust Catalog enables you to put your security posture front and center for everyone to access, making it easy for buyers to find solutions that meet their security requirements while giving them the confidence they need to make a purchase.

## Key Benefits of Using the Whistic Trust Catalog

**All your security documentation in one place.** Storing all of your security documentation, certifications, and audits in one place makes it easy for your InfoSec team to manage your security posture and for potential buyers to evaluate whether or not it makes sense to partner with you.

**Save time by using standardized frameworks.** Utilize any of the standard frameworks used by leading companies across the world to build your Security Profile and join thousands of other businesses by proactively sharing it to the Whistic Trust Catalog for customers and prospects to see.

**On-demand access to vendors that have been vetted.** Reduce the time it takes to identify and evaluate new vendors by using the Trust Catalog to access the security posture for thousands of potential solutions, enabling Zero-touch Assessments and virtually eliminating back-and-forths between you and your vendors.
