

Delivering **remote learning** to the classroom

Connecting classrooms by
replicating the complete learning
experience

What is Vscene?

Vscene is a video platform that recreates the classroom setting. We equip classrooms with a virtual learning environment that supports live communication and engagement. A Vscene video session allows you to view your remote classroom, it allows you to speak directly to your remote learners, and it allows them to talk back to you. All in real-time.

Our technology transforms the learning space to support shared teaching and learning across multiple locations. This means you can share one teacher across two (or more) classrooms without your remote class feeling short-changed.

So, whether your pupils are in the same room as the teacher, or watching

remotely on a screen, they'll have the same experience. They can see, hear and talk to each other as usual – as though they're in the same room. By replicating the complete classroom experience, Vscene makes remote learning truly interactive.

Our technology transforms the learning space to support shared teaching and learning across multiple locations”

Why Vscene is right for you

Developed for education

Vscene is the only platform created specifically for the education sector. The developers have included specialised features and capabilities to improve classroom communication and encourage pupil engagement.

Completely secure

Because Vscene has been developed for the education sector, the security policies are extremely rigorous. The platform meets and exceeds all safeguarding and access requirements, using servers in government-approved data centres.

Unbeatable quality, unbeatable price

You'll get the highest quality immersive video at a realistic price point. When it comes to fast frame rates and high-definition video, Vscene is hard to match. And our pricing plans are all-inclusive with no hidden costs.

Replicates the classroom

Vscene brings learning to life for remote learners. It allows teachers and learners to participate in natural, real-time interaction. Whether you want to call on pupils at the back or scribble an explanation on a whiteboard, it's the full classroom experience.

Walk-in-and-teach technology

Our learning and teaching space solutions will transform your setup. You can just walk into the classroom and start teaching. It really is that user-friendly. Forget about connecting equipment or remembering log-ins. The technology is built into the teaching space, ready to go.

Blended learning solution

It supports a full blended learning model; real-time teaching and offline learning. Vscene can record every session in high-quality video, ready to be played back whenever required. Your pupils can learn offline as well as in real-time.

Works with your existing setup

The Vscene platform will integrate smoothly with your current IT arrangement. As it has been developed for the education sector, the system is fully compliant with all school systems, including the Janet network.

Teaching and Learning Space Solutions

Enhance your Vscene experience with our teaching and learning space solutions. From small classroom hubs and teaching pods to larger set-ups, we offer a wide range of high-tech screens, cameras and audio equipment to work with our platform. We will install and maintain these solutions for you, ensuring you have a seamless teaching experience every time:

Seamless teaching experiences every time"

Vscene Solutions

▷ *Teaching Pod*

This compact teaching pod is designed for teachers to deliver remote teaching to multiple classrooms, or multiple desktop users.

▷ *Classroom*

The classroom setup is designed to deliver the typical classroom experience for pupils, just with a remote teacher rather than one who is physically present.

▷ *Classroom Dual*

This dual-purpose setup is ideal for larger classrooms where you want to offer both remote teaching and learning provision.

▷ *Classroom Hub*

Already have cameras set up in your classrooms? The classroom hub will integrate smoothly with your current camera setup.

▷ *Bespoke solution*

Do you have a larger space to work with? Or a suite of rooms to be connected remotely? We can provide a bespoke solution for every setup.

You're in good company

We're connecting classrooms across the world. Vscene is used and trusted by over 2,000 educational and research organisations. Here's what some of our satisfied customers have to say:

“ Vscene provides us with an all-in-one remote teaching solution. The platform enables real-time collaboration between universities, institutes, and remote students, removing the physical barrier from the classroom experience.”

Phelim Lunny, Dublin Dental University Hospital

“ Distance doesn't exist with Vscene. 100% pass rate in our Functional Skills English - the results speak for themselves!”

Joanne Byrne, Petroc College

“ Compared to the alternative of having lecturers travel to eight institutions, the benefits of Vscene are so great that the school simply couldn't function without it!”

Dr Christian Killow, SUPA, University of Glasgow

“ We wanted a solution that would enhance rather than detract from the learning experience and outcomes of students. Vscene ticked our particular boxes.”

Dan Pearson, USP College
