## The Powder Packer for efficient B2B bulk packing

Achieve quick changeovers between recipes and reduce production downtime when packing powders into sacks.

Due to the simple design and cartridge-style, tool-free, swap-out heads, the Powder Packer can be easily cleaned down between recipe changes much more quickly than traditional Auger Fillers.

It can handle a range of powder types from cohesive to very free-flowing without the need for technical adjustments, due to the easy to use dual mode software.

### THE MATCON IBC PACKING MODULE

Easy clean design for rapid recipe changeovers

Packing capabilities from 10 to 25kg sized containers, 1- 2 bags packed per minute

Repeatable dosing accuracy

Dual-use modes for different powder types without complicated software

No segregation of the mixed recipe assures product quality

Accommodates different bag sizes

The IBC packing module reduces recipe changeover time.

Providing a more flexible packing solution compared to traditional packers.

**Rapid batch changeovers** due to the simple design and use of change-out parts.

**No segregation of mix** as product is discharged under mass-flow with first-in first-out material flow.

**Repeatable dosing accuracy** due to Cone Valve technology combined with loss-in-weight and gain-in-weight load cells.

**Tool free connections** mean Operators can complete changeovers not the Maintenance crew.

**Suitable for a variety of powder types** from cohesive to very free-flowing without changing tooling.

**Operator-friendly** controls can store multiple recipe parameters in an easy to use format.

IBC Size	IBC Height	Overall Height*
1000	1398 mm	4917 mm
1500	1794 mm	5313 mm
2000	2235 mm	5754 mm
2500	2671 mm	6190 mm

\*Based on standard equipment inc. optional Inline Sieve.

# MATCON®

POWDERS, HANDLED.

We specialise in providing complete materials handling solutions in the Food, Nutrition, Pharmaceutical and Chemical sectors.

We're not just an IBC provider, but a true partner helping you accomplish the right system for your needs.
