

# Salus

## Keeping People Safe from COVID-19 in Max Capacity Mass Gatherings At Resorts

The Salus modular mobile solution (patent pending) keeps guests and employees safe from the COVID-19 virus at resorts. Salus defines, harmonizes, and manages new processes and supporting technologies within the biosphere to ensure that only those that are COVID-19 negative, have COVID-19 antibodies, or have received the COVID-19 vaccination are able to enter resorts.

At the heart of the Salus solution is the Salus Mobile Customer, Employee, and Tester app that stores and timestamps on-the-spot test results and grants access to the resort. If they are coronavirus-free, the app monitors their temperature and other

symptoms while at the resort and uses Geo-Tracking to know if they have left the biosphere. Salus will then send the individual to be re-tested between 45-48 hours of exiting.

The Salus solution is agnostic to the type of COVID-19 testing kit and supporting technologies such as the thermal cameras, digital thermometers, and entry/exit IoT sensors that plug-and-play with Salus through APIs. All that is needed is a smartphone, our Salus mobile application, and the implementation of the Salus framework of processes.

### Salus Helps Create a Protective Resort 'Biosphere'

Co-ordinates Testing, Generates QR Access Time-Sensitive Code, Monitoring and Re-Testing

## Technical Specs

- ✓ Modular infrastructure platform allows for straightforward integration with on-property systems where applicable (PMS, access control, etc.).
- ✓ The microservice-based architecture allows integration with existing customer-facing applications.
- ✓ Salus-provided apps available for both Android and iOS devices.
- ✓ Browser-based admin portal allows for configuration of Salus from any device.
- ✓ Flexible hardware integration mechanism allows Salus to remain "future-proof" as more advanced temperature monitoring solutions come to market.
- ✓ COVID-19 test kit agnostic. Salus allows the configuration of any test kit with storable properties for test accuracy.
- ✓ Leverages location services to ensure that once a guest or employee has been allowed on the resort they will be flagged as needing a retest if they leave.
