

Equalum & FTI - Advanced Data Solutions & Strategy for Life Sciences

FTI, in partnership with Equalum, provides advanced data solutions for the Life Sciences industry enabling new, life changing treatments for patients. From advancing next generation clinical operating models, to harnessing the new digital data from medical devices and modern applications data that consume them, FTI and Equalum accelerate clinical development programs with world-class data solutions built to get insights out of your data faster. FTI and Equalum helps the top ten pharma companies improve and manage operations for their mission critical clinical development functions that are core to the success of their business.

Clinical Trial Services

We expedite early and late stage clinical trials by delivering faster design and implementation for CTMS workflows with intelligent automation; providing self-service access to virtually all of your data while transforming that information for modern day analytics and clinical assessments.

✓ EQUALUM / FTI VALUE

FTI and Equalum deliver powerful Analytics and with Applied Intelligence and Machine Learning that provide insights to Clinical Data Science teams.

Phase 1, 2 & 3 Services

During each critical phase, we expedite data analysis for risk assessment required across Human Pharmacology, Therapeutic Exploratory, and Confirmatory Stages as drugs advance to larger number of patients.

✓ EQUALUM / FTI VALUE

We provide breakthrough solutions for patients by providing change data capture for analytics in reporting digital virtual trials, plus patient-level data collection expediting the time to advance from one Phase to the next.

Services for Regulatory Affairs

We provide rapid data transparency for Regulatory Affairs professionals with digital connectivity providing access for all Warehoused Data. We collect, curate, interpret and apply Warehoused Data for creating and expediting critical submission documents required for review.

✓ EQUALUM / FTI VALUE

We deliver Clinical Patient Insights (first-time-right filing accuracy) for Regulatory Professionals helping bring products to market faster by providing rapid access to real-time data.

CASE STUDY | Equalum Technology In Action

A **Top 5 Pharmaceutical** company is running clinical trials for COVID-19 involving dozens, even hundreds, of upstream and downstream systems each with its own system and data stores. Equalum was brought in to **streamline and speed up integration** between these systems replacing cumbersome batch ETL jobs and frameworks that used to take days to execute. **Actionable insights** from data now comes in **real-time** within seconds using **zero-coding integration pipelines**. No changes to systems were necessary either as a result of Equalum's **non-intrusive CDC framework**.

Equalum's platform is **modernizing their clinical workflow** to expedite new **drugs to market much faster**.
