

A DOSE OF FACTS

✓ DRUG PRICES ARE RISING DRAMATICALLY

38%

growth in inpatient drug spending on a per admission basis over a two year period.

- Total annual spending on prescription drugs has reached \$309 billion, the fastest growing segment of the U.S. health care economy.
- The price of drugs, not utilization, is the predominant contributor to the increase.
- The cost of some drugs jumped as much as 3,600% over two years.

✓ UNEXPECTED, IRREGULAR, & SUSTAINED PRICE INCREASES UNDERMINE PATIENT CARE

More than 90%

of hospitals said drug spending was of moderate or severe concern.

- The rising cost of drugs challenges hospitals ability to retain patient access to a broad range of affordable treatments.
- Medicare reimbursement, a critical source of payments to hospitals, cannot keep pace with price increases.

✓ HOSPITALS AND PATIENTS HAVE FEWER LOWER-COST ALTERNATIVES

The prices of **both branded and generic drugs** are increasing.

- Many drugs with steep price increases are common and have been approved and on the market for years.
- These common drugs include everything from anesthesia to antibiotics.
- About half of the sampled drugs have no generic competition.
