Peak™ -ZM

Strong substrates need strong bonds, and a strong bond starts with the primer. Peak-ZM zirconia/metal primer is specifically designed to provide high adhesion between the zirconia or metal surface and the luting material. Thanks to a chemistry containing the trusted MDP monomer, Peak-ZM primer can increase bond strengths 5 times compared to using a resin cement alone.¹ With Peak-ZM primer, you can feel confident in your zirconia and metal restorations.

- Includes a unique blend of phosphate monomers, including the MDP monomer
- Convenient syringe and bottle delivery options
- Significantly enhances bond strengths to resin cements
- Strong bond strengths to zirconia, alumina, and metal restorations

Note: Not for use with RMGI.

2464 - Peak-ZM Zirconia Primer Syringe Kit
2 x 1.2 ml Peak-ZM syringes
20 x Black Mini Brush tips

2463 - Peak-ZM Zirconia Primer Bottle 1pk
4 ml bottle

Peak™ Universal Bond adhesive helps ensure a strong, lasting bond, whether you choose a self-etch or a total-etch technique.

For optimal results, we recommend using Peak-ZM primer with PermaFlo™ DC resin cement.
