PROTECT YOUR ATHLETES AND YOUR ORGANIZATION WITH PLAYER'S HEALTH

TRIGGER BACKGROUND CHECKS AND COACH COMPLIANCE STRAIGHT FROM LEAGUEAPPS

Player's Health offers a full risk management solution to local and youth sports organizations. They provide a fully customized coach compliance training based on your state, sport, and affiliations. This includes conducting a free risk assessment of your organization, and then helping you mitigate all the risks via a partnership with JDP to perform background checks, coach compliance training, and an abuse reporting tool that complies with federal requirements. We've teamed up with Player's Health to make it as easy as possible for you to better comply with the evolving safety and legal requirements for you and your sports organization, right inside LeagueApps.

HOW THE INTEGRATION WORKS

Coaches will be invited to register for Player's Health when they register for any designated LeagueApps programs. They will receive an email prompting them to complete registration, coach certification training, and a background check. Basic elements of Player's Health, including concussion training and a 'coach pay' option for background checks, are totally free of charge for you. Additionally, you can choose to pay for background checks and have your coaches enrolled in premium compliance courses, incurring fees per coach.

WHY CLUBS LOVE PLAYER'S HEALTH

MAINTAINS A SAFE, ACCOUNTABLE, AND COMPLIANT ORGANIZATION

The all-in-one management system that houses compliance and abuse reporting, risk assessment, and injury recording makes it easier for organizations to comply with dynamic athletic responsibilities.

PROVIDES ORGANIZATIONS WITH TRANSPARENCY

Player's Health technology allows organizers to see which training and background screenings their coaches have completed, along with updates on flagged screenings—giving organizations up-to-date insight.

SIMPLIFIES ORGANIZATIONS' OPERATIONS

Digitizing the background check, compliance, and insurance processes frees up organizers' time while ensuring that processes are operating smoothly and concisely.
