

2020
HOLIDAY SEASON

The Ultimate Technical Gift Guide

For Digital Health
Tech Product Owners
to treat themselves
and their teams.

Ho Ho
Hi-Tech.

PokerBot

The gift:

Less.
Dang.
Meetings.

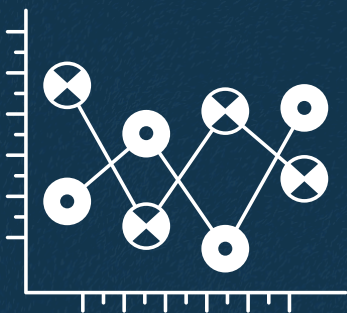

Cost: Free

This is a really quick and easy way to do point estimation for your tickets + issues, and it's perfect for remote teams on Slack. Trigger PokerBot from any channel to ask specific users for their points estimate. It's a great way to get estimated timing on key deliverables without keeping your engineering resources tied up in hours of planning meetings.

[Add PokerBot to your Slack](#)

Lucidchart

The gift of visual charts and diagrams but super fast.

Cost: Free to sign up; very affordable thereafter

Our team likes using this to build and share product roadmaps and offer a lil clarity on product vision to fellow engineers and UX/UI designers.

[Check out Lucidchart](#)

Atom

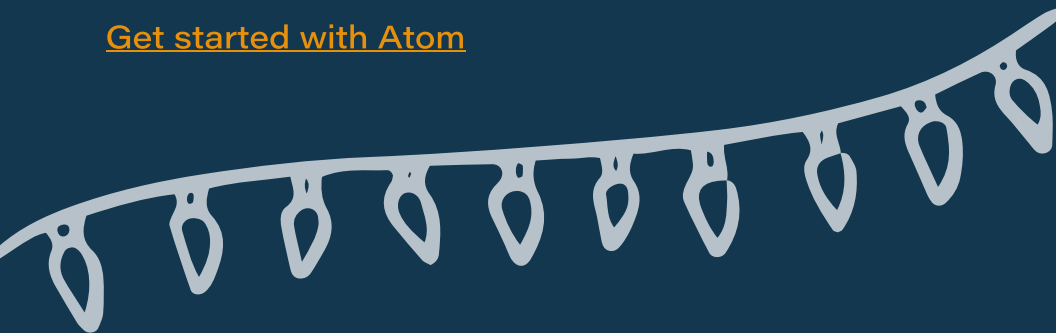

The gift of reading code + data responses

Cost: Free

It's the hackable text editor for the 21st Century! Make it crazy simple to highlight and format your code so that it's easier to read and understand.

[Get started with Atom](#)

Postman

The gift of testing more, and writing less code.

Cost: Free to sign up; very affordable thereafter

Team member Chris wanted to remind everyone to stop writing a bunch of code just to test an API's functionality. Postman's a great interactive tool with nice UX + makes it easy for developers to create, share, test and document APIs.

[Rev up your testing with Postman here](#)

Synthea

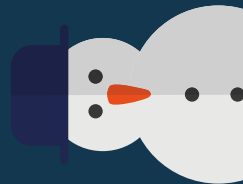

When fake news is a gift.

Cost: Free

Synthea is an open source, synthetic patient generator that offers a risk-free environment for Health IT development and experiments. The fake data is generated from tons academic publications. Be compliant, be wicked smaht, and start collaborating.

[Take it for a spin](#)

Read Aloud

The gift of multi-tasking even more like a pro.

Cost: Free

Our very own Product Manager was quick to add this to the Gift Guide-- Sarita says she loves the ability to make lunch while having PDFs or Google Docs read out loud to her.

[Download the Read Aloud extension here](#)

Krisp

Sometimes the greatest gift is silence.

Cost: Free for individuals; super cheap for teams

More or less we've learned to live with background noise-- the sirens, barking, doorbells, kids-- but we were pretty relieved when Keith, one of our senior engineers, found a magical mute button to drown it all out and stay professional and focused.

[Shhh: try Krisp](#)

Typeform

The gift of beautiful forms, integrated.

Cost: \$35 - \$70/mo

(depending on added bells + whistles of your choice)

Marlena recommends switching to Typeform. Not only can the forms behave amazingly well as an extension of your brand, the integrations are endless-- connect it to your Google Drive, Jira, Github, or CRM of choice.

[Explore Typeform integrations](#)

Mercury in Retrograde API

The gift of the excuse.

Cost: Free

Some folks believe that tracking when Mercury is in retrograde can increase productivity and avoid frustration. We say, present your team the gift of the ironclad excuse when everything inexplicably goes wrong.

[Psst: next one's coming up in January 2021](#)

Founder Prayers

The gift of inspiration.

Cost: \$12 per candle;
\$35 for set of 4

Whether you and your team are wishing for **Product Market Fit** (seek Paul Graham), **Product Refinement** (seek Steve Jobs) or even **Perseverance** (seek Elon Musk) these prayer candles really ought to help provide that guiding light.

[Prayers, answered??](#)

Quark

The gift of
endless
healthcare
possibilities.

quark
BY PARTICLE

Cost: Free to sign up

Quark enables health tech companies to build and test new products with a sandbox containing hundreds of synthetic patient records, then go live -- all in one place. Quickly and easily comply with and leverage the ONC information blocking and interoperability rules, which are set to go into effect April 5th, 2021.
