Microsoft 365 Services In a Single Kit

Secure Cloud Services for your online business since 1999.

.Reliable .Secure .Speed .Scalable .Manageable .Compliant

Powered by:

Microsoft 365 Consulting

When you decide to start your cloud path, we are to back you up on the way. Our Microsoft 365 consultants help you make your cloud solution an integral part of the enterprise digital environment and a useful tool for each employee. We provide both advisory and technical assistance depending on your business needs.

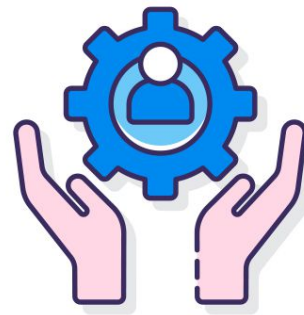

Microsoft 365 Migration

Our team helps you plan and carry out smooth migration of your on-premises, cloud or hybrid solutions to Microsoft 365 along with preserving the integrity of your business data. To assess the preliminary scope of your Microsoft 365 migration project.

Microsoft 365 Implementation

We help you select a suitable Microsoft 365 subscription plan aligned with your budget, IT strategy and collaboration scope. We can implement the selected Office 365 toolset in line with the Microsoft requirements and set your cloud solution to ensure its efficient management and use.

Microsoft 365 Managed Services

We take over the administration of your Microsoft 365 ecosystem to ensure its availability, security and performance stability. Our services include managing Microsoft 365 accounts, preventive monitoring and prompt troubleshooting, protection from security vulnerabilities, monthly reporting on resources consumption, and more.

Microsoft 365 Customization

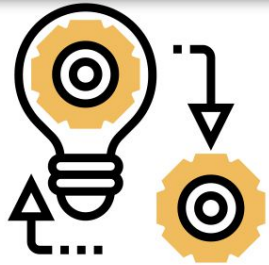

We tailor your Microsoft 365 solution to your specific corporate environment, industry requirements and employees' preferences. We handle all-out customizations and develop unique custom features, including complex workflows, branded site templates, interactive chatbots, ready-to-go custom add-ins and more.

Microsoft 365 Consulting

Secure Cloud Services for your online business since 1999.
.Reliable .Secure .Speed .Scalable .Manageable .Compliant

Powered by:

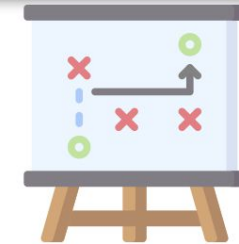

Ensuring a smooth transition to the cloud

Ensuring a smooth transition to the cloud to let you reshape IT infrastructure and restructure IT staff painlessly.

Implementing an optimal set of M365 applications

Implementing an optimal set of Microsoft 365 applications to let your employees benefit from every single element of their new digital workplace.

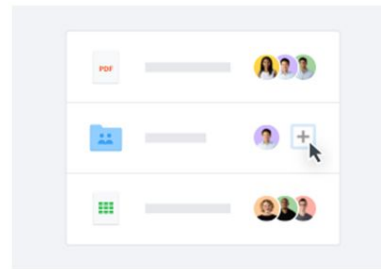

High Functional Solutions

Finding the right balance between your customization requirements and Microsoft restrictions to help you get a highly functional solution.

Enabling stable protection of your cloud solution

Enabling stable protection of your cloud solution where corporate content, sensitive data, employees' knowledge and expertise are immune.

Taking care of user adoption

Taking care of user adoption from the planning stage to guarantee your solution or its particular features are popular and meet users' needs.

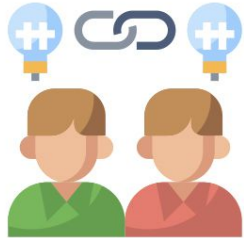

Why Microsoft 365 Managed Services

Secure Cloud Services for your online business since 1999.

.Reliable .Secure .Speed .Scalable .Manageable .Compliant

Powered by:

Access to expertise

Even with a well-trained IT team of your own, the odds are that it doesn't have a dedicated expert who specializes in support and maintenance of the M365 environment.

Timely updates

Microsoft releases updates on a regular basis and they come to the cloud first. M365 managed services will keep your enterprise in tune with the times.

Cost-effectiveness.

You don't need to hire full-time dedicated professionals, as you can use qualified expertise only when you need it and pay only for this period.

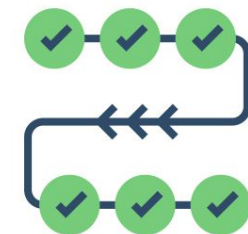

Security and compliance support.

Managed services provide 24/7 security monitoring of Microsoft 365. Managed services specialists follow changes in federal and state compliance regulations like GLBA, SOX, and HIPAA.

Improved efficiency of an IT team.

If you turn to a managed services provider for handling daily maintenance of your M365 environment, the in-house IT team will be able to focus on the technological support of the core business activities, which will increase your enterprise's productivity.

Retained business continuity

Microsoft 365 managed services ensure high availability to end users and continuous performance without disruption, which supports efficiency and stability of business processes that are dependent on technology (collaboration, workflows, etc.).

What We Do

Secure Cloud Services for your online business since 1999.
.Reliable .Secure .Speed .Scalable .Manageable .Compliant

Powered by:

Round-the-clock coverage

Our managed services are available 24x7x365.

Ongoing Microsoft 365 monitoring.

Real-time access to Microsoft 365 data allows us to detect errors as soon as they appear and set up fixing them right away.

Ongoing system performance check

XcellHsot team troubleshoots performance issues of your Microsoft 365 solution, such as an outage of reporting and monitoring systems, application errors and more.

Help Desk

We process trouble, advice and improvement requests according to an SLA.

Monthly Security check

We evaluate the security level of your Microsoft 365 solution, including analyzing enabled authentication mechanisms, verifying antivirus configuration and more.

Patch Installation

Our team regularly installs security patches to ensure well-protected functioning of Microsoft 365 solutions. We apply the zero downtime patching method to avoid operating discontinuity during patch installation.

Monitoring & Remediation

Secure Cloud Services for your online business since 1999.
.Reliable .Secure .Speed .Scalable .Manageable .Compliant

Powered by:

XcellHost unique management and monitoring platform provides engineer visibility into and issue alerts for your solution

Support engineers autonomously work to remediate critical security, and data and device availability issues

The managed services team is available to address escalated standard reactive and proactive support issues

On-going work is carried out regularly to remediate lower priority issues that may not have immediate business impact

XcellHost acts fully on your behalf with Microsoft for the escalation of platform issues

Reporting & Continuous Improvement

Secure Cloud Services for your online business since 1999.

.Reliable .Secure .Speed .Scalable .Manageable .Compliant

Powered by:

Dynamic reporting is used to analyse on-going issues across the solution

Our continuous improvement service uses analysis from monitoring tools and solution support history to ensure recommendations are tailored to your business

Service review is via in-person meetings or other customer-preferred communication channel

Managed service engineers are available for 1-1 discussion regarding individual issues of concern

Advice and guidance is provided on all aspects of your Microsoft 365 solution and overall IT strategy

Microsoft 365

Secure Cloud Services for your online business since 1999.
.Reliable .Secure .Speed .Scalable .Manageable .Compliant

XcellHost Managed Microsoft 365 Services Journey

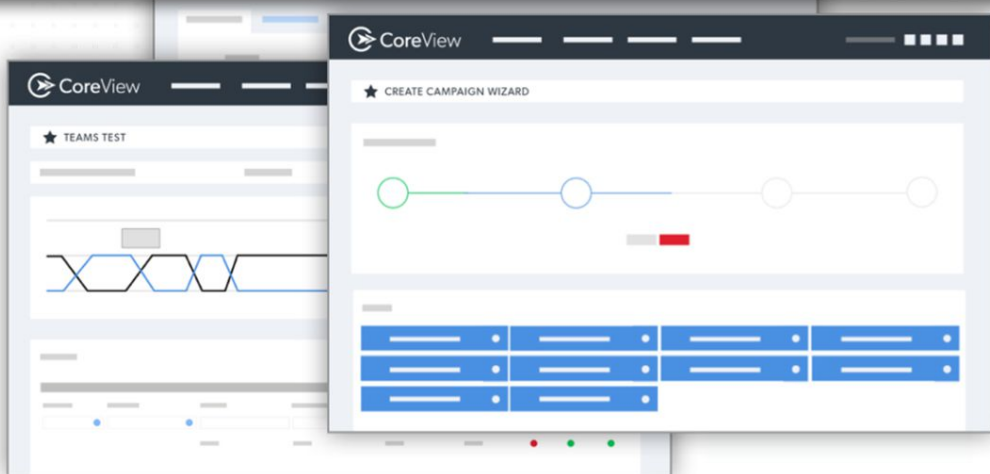

Microsoft 365 Management Tool

Secure Cloud Services for your online business since 1999.

.Reliable .Secure .Speed .Scalable .Manageable .Compliant

Powered By:

For enterprises, Microsoft 365 admin tasks are multiplied across thousands of employees & multiple geographies. Single platform approach makes it easy to delegate admin tasks, automate alerts and facilitate adoption.

Features

Administration & Reporting

Manage licenses in Azure with single sign-on, one dashboard and 200+ out of the box reports.

Permissions & Delegation

Assign license pools and remote admins to efficiently manage thousands of users across multiple regions.

SaaS Product Adoption

Report product usage across a variety of user cross sections and set up email campaigns to drive adoption.

Accounting & Chargebacks

Filter chargeback costs by department, region or a custom license subpool. Plan budgets with usage data.

Security & Compliance

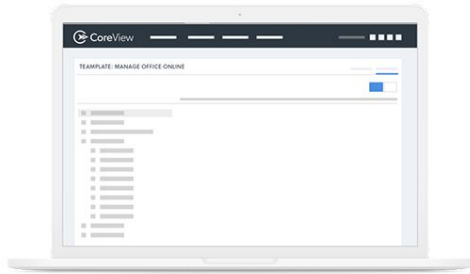

Track suspicious sign-ins, email forwards and external server attacks. Get alerts for potential data breaches.

Hybrid & Cloud

Manage Microsoft 365 solutions across multiple deployment structures, whether cloud or hybrid.

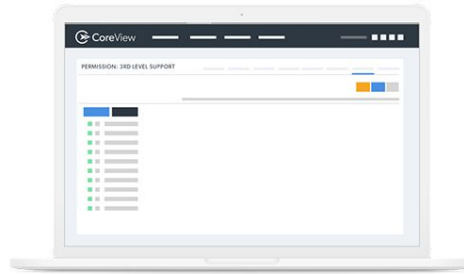

Learn More

<https://www.xcellhost.cloud/m365-management>

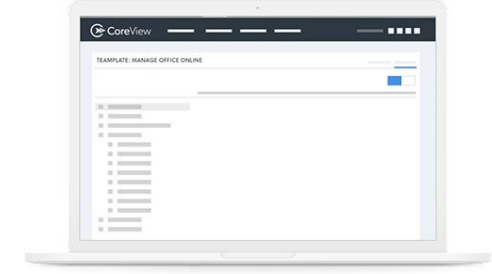

RBAC Admin Rights

Delegate Control Over Reporting, Admin Functions And Customization. CoreAdmin allows global IT administrators to delegate control over all aspects of the management interface, including reports, custom Powershell scripts and everyday admin functions.

License Reclamation

Find Inactive Office 365 Licenses And Reallocate Them With Ease. With CoreAdmin, you can find all of your inactive, oversized and duplicated Office 365 licenses and reallocate them without ever leaving the management platform. This prevents overspending and helps you identify zones with poor product adoption.

Custom Actions

Embed Custom Powershell Scripts In Your Personalized Portal To Use Again And Again. Not only do we provide out of the box webform-based management actions, but we also allow you to embed your custom scripts into our framework as new menu options.

The Benefits of CoreAdmin

■ Deep Workflow Automation

Customizable IT admin process step can be run from the CoreFlow workflow engine. Steps can be chained together so they are performed in the proper sequence. All management actions can be part of a workflow, including custom PowerShell scripts, leading to unlimited scenarios.

■ Reduce Admin Mistakes

Streaming administration through workflows takes the guesswork out of account management, license management, and security and compliance operations.

■ Provision and Deprovision Safely and Easily

Workflow templates automate provisioning/deprovisioning. With automation, IT ensures users have the right licenses to access the right infrastructure. IT can "clone" users or create them from template to reduce errors and speed provisioning.

■ External Users lifecycle governance

From our usage stats, we have found that 90% of External Users become inactive after 90 days. With automation, you can automatically block access and remove the user, or asking consent to the person or the manager who invited them. Any active account is an additional endpoint opened on your tenant.

■ Stop Cloud Attacks

Gartner finds that most successful cloud attacks exploit misconfiguration. Once you have a secure approach to configure, map it to a workflow so it is done properly each time.

■ Automate Licenses Management Easily

Create and automate a process to reclaim licenses when a user becomes inactive, ask approval to the manager or IT or to start the process to buy additional licenses, automate the request to you LSP through a workflow when a usage threshold is reached.

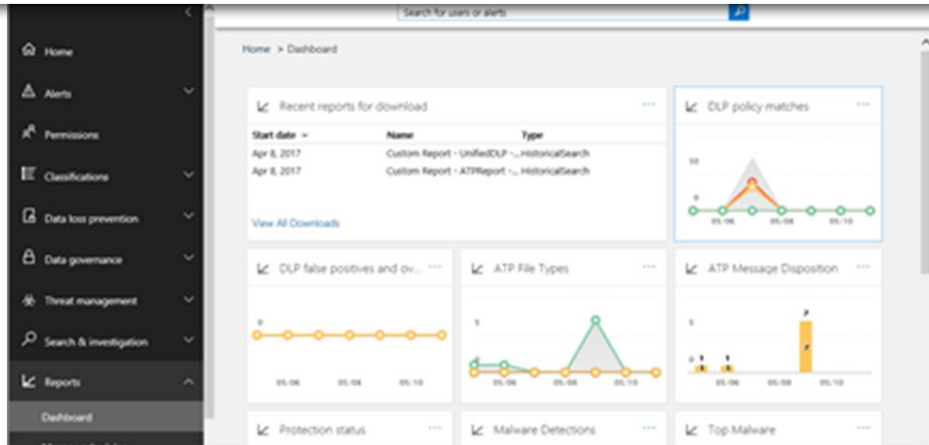

M365 ATP (Advance Threat Protection)

Simpler and more effective

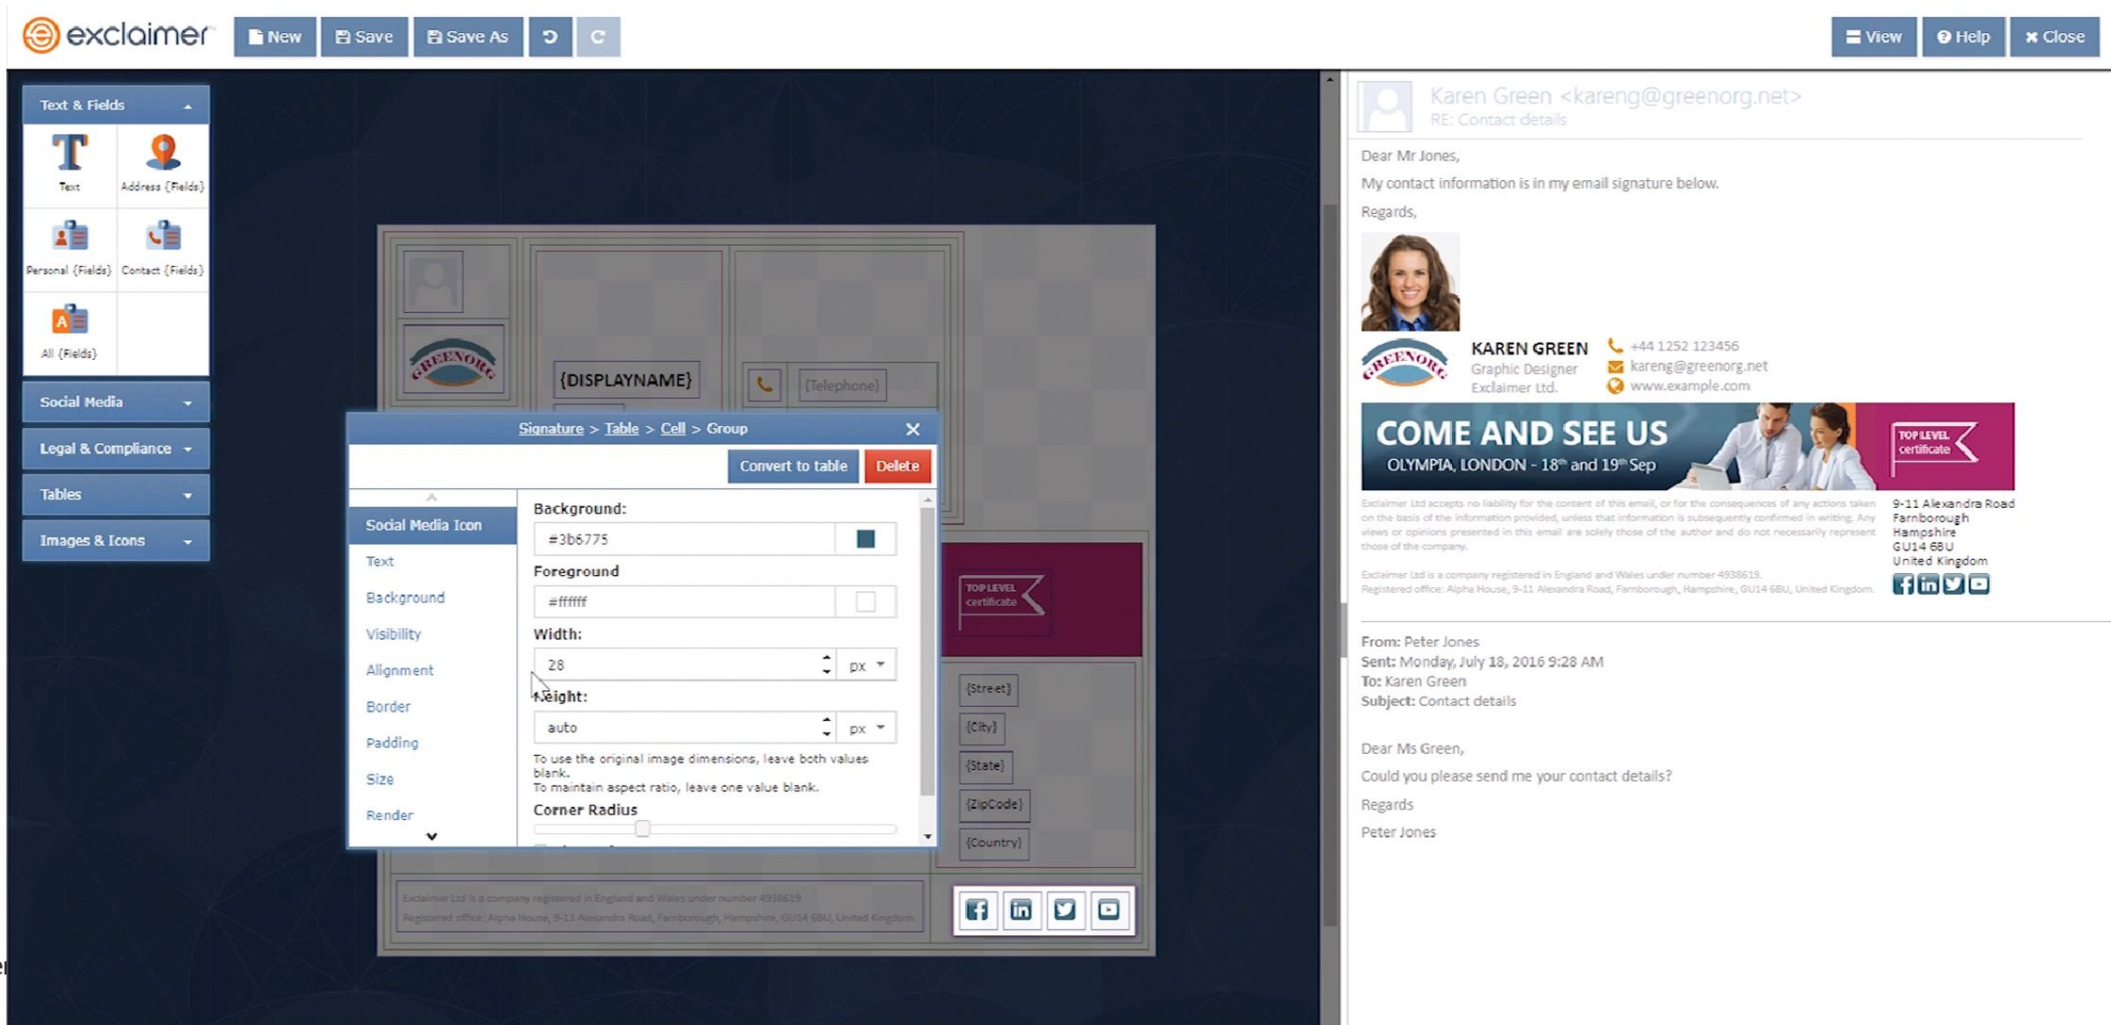

Office Efficiency

Market leading

Dashboard

The screenshot displays the Exclaimer dashboard interface. On the left, there is a sidebar with navigation options: Text & Fields, Social Media, Legal & Compliance, Tables, and Images & Icons. The main workspace shows a signature editor with a 'Signature > Table > Cell > Group' context menu open, displaying properties for a table cell such as Background, Foreground, Width, Height, and Corner Radius. On the right, a preview of an email signature is shown, including a profile picture, name (Karen Green), contact information, and a promotional banner for 'COME AND SEE US' at Olympia, London.
