The 12 pillars of the PCI DSS

Goals	PCI DSS requirements
Build and maintain a secure network	1. Use a firewall 2. Do not use default parameters
Protect card holder data	3. Protect stored cardholder data 4. Encrypt transmission of cardholder data
Maintain a vulnerability management program	5. Use anti-virus software 6. Develop secure systems and applications
Implement strong access control measures	7. Restrict access to cardholder data 8. Assign a unique ID to each person 9. Restrict physical access to cardholder data
Regularly monitor and test networks	10. Monitor all access to network and cardholder data 11. Regularly test security systems and processes
Maintain an information security policy	12. Maintain a security policy

Achieve PCI DSS Compliance Audit

All merchants from small to large organizations must comply with PCI DSS. The compliance requirements require a yearly security audit beyond an annual amount of transactions defined as follows:

	Criteria	Annual QSA Audit	Annual SAQ	Quarterly ASV Scan
Merchants	L1 6 million transactions per year or compromised	V		V
	L2 1 million to 6 million transactions per year		V	V
	L3 20 000 to 1 million e-commerce transactions per year		V	V
	L4 Others		V	V
Service providers	L1 Payment gateways	V		
	L2 Store, process or transmit 1 million accounts/transactions per year	V		
	L3 Others		V	V
