

# Cloud Endpoint Detection & Response (EDR)

Secure Cloud Services for your online business since 1999.  
.Reliable .Secure .Speed .Scalable .Manageable .Compliant

Powered By:

Apex One

## Root cause analysis and impact assessment. Battling Lateral Movement, Counter Incident Response & Island Hopping

Detect, hunt, isolate, & eliminate intrusions across all endpoints using AI-driven analytics, investigation playbooks, & unequalled threat intelligence.

### Key Detection and Response Features

Centralized Forensic Data Repository

IoC sweeping & IoA hunting

Root cause Analysis

Impact Analysis

Automated Response

Remediate endpoints to a pre-infection state

Open APIs and custom intelligence

### Benefits

Automates manual tasks

Helps speed up threat containment

Enables efficient workflow

Reduces the time to identify & respond to threats

Mitigates attack risks

Simplifies Threat Analysis & Incident Response

Ask for a cloud EDR consultation

## Key Protection Capabilities

High-fidelity AI/ML & Behavioral analysis

Web reputation & Exploit prevention

Command and control (C&C) blocking & Vulnerability protection

Data Leak Prevention & Device control

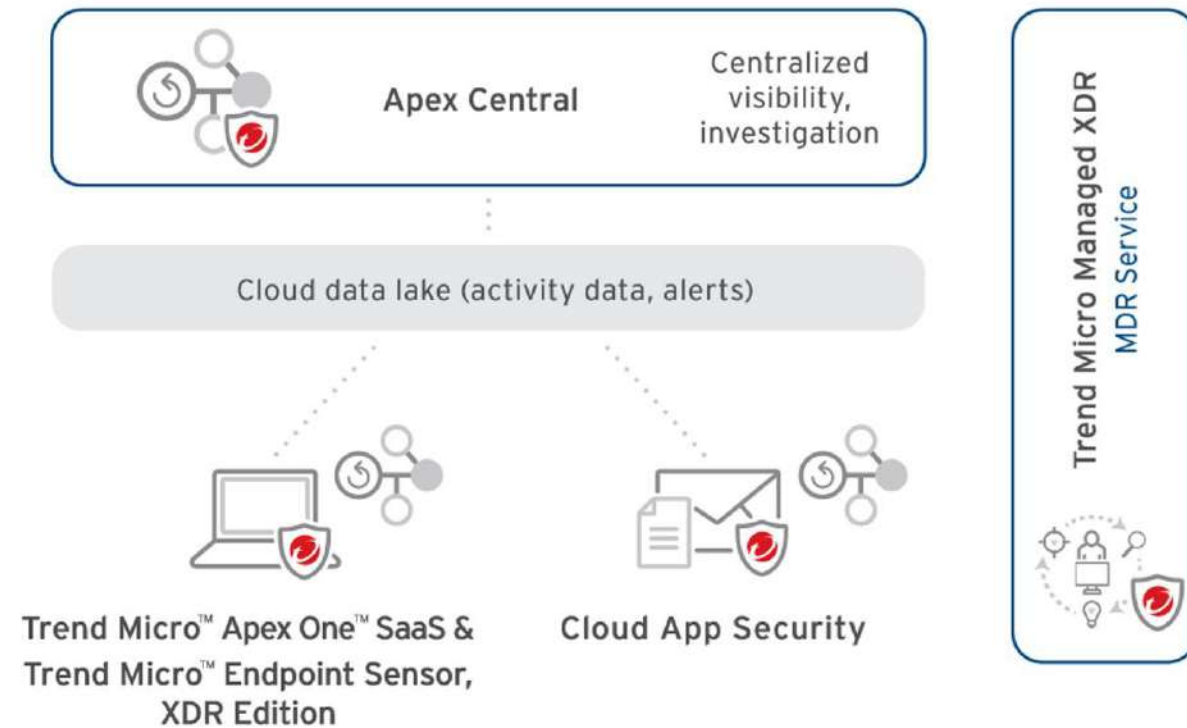

Sandbox and breach detection integration

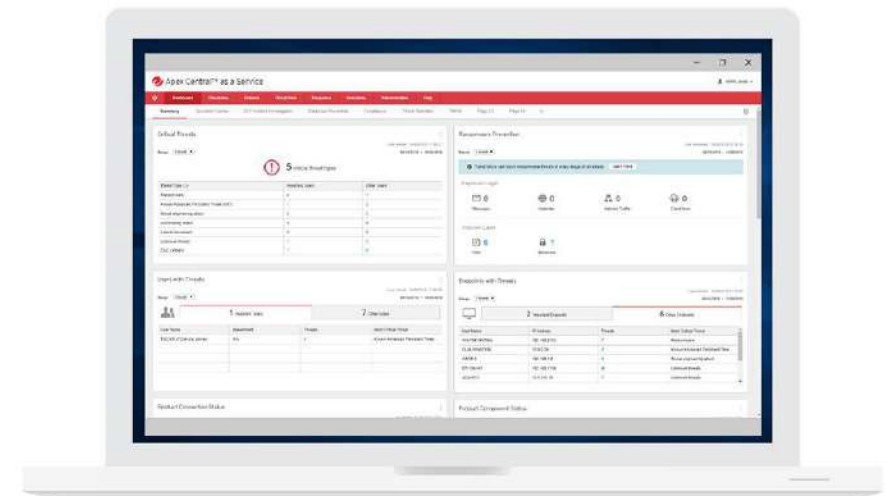

Inbound and internal phishing protection

## Detection and response capabilities across email and endpoints

## Dashboard Cloud EDR

Endpoints with Apex One Endpoint Sensor SaaS, XDR Edition enabled, and Office 365 or Google G Suite™ emails with Cloud App Security, will record system behaviors, user behaviors, and communications.
