

Load Balancer Monitoring

Secure Cloud Services for your online business since 1999.
.Reliable .Secure .Speed .Scalable .Manageable .Compliant

A powerful network management system with automatic discovery & comprehensive monitoring for network devices and load balancers across data centers.

Features

Distributed Network Management

Incoming & Outgoing Traffic Utilization

Custom SNMP Monitors

Track Anomalies

Deep performance visibility

Precise downtime notifications

Dashboard View

Benefits

Scalability

Network discovery

High availability

Periodic data

Visibility & Customizability

SMS/E-mail Notifications

Key Performance Attributes.

- Active client connections
- Active server connections
- CPU fan speed
- CPU temperature
- CPU utilization
- Failover status
- Global TM virtual server status
- Global TM pool member state
- HTTP requests
- Memory utilization
- Pool member status
- Power supply status
- SSL sessions count
- Total HTTP GET requests
- Total HTTP POST requests
