# Top Reasons To Adopt GPU Cloud Desktop

Secure Cloud Services for your online business since 1999.

**.Reliable .Secure .Speed .Scalable .Manageable .Compliant**

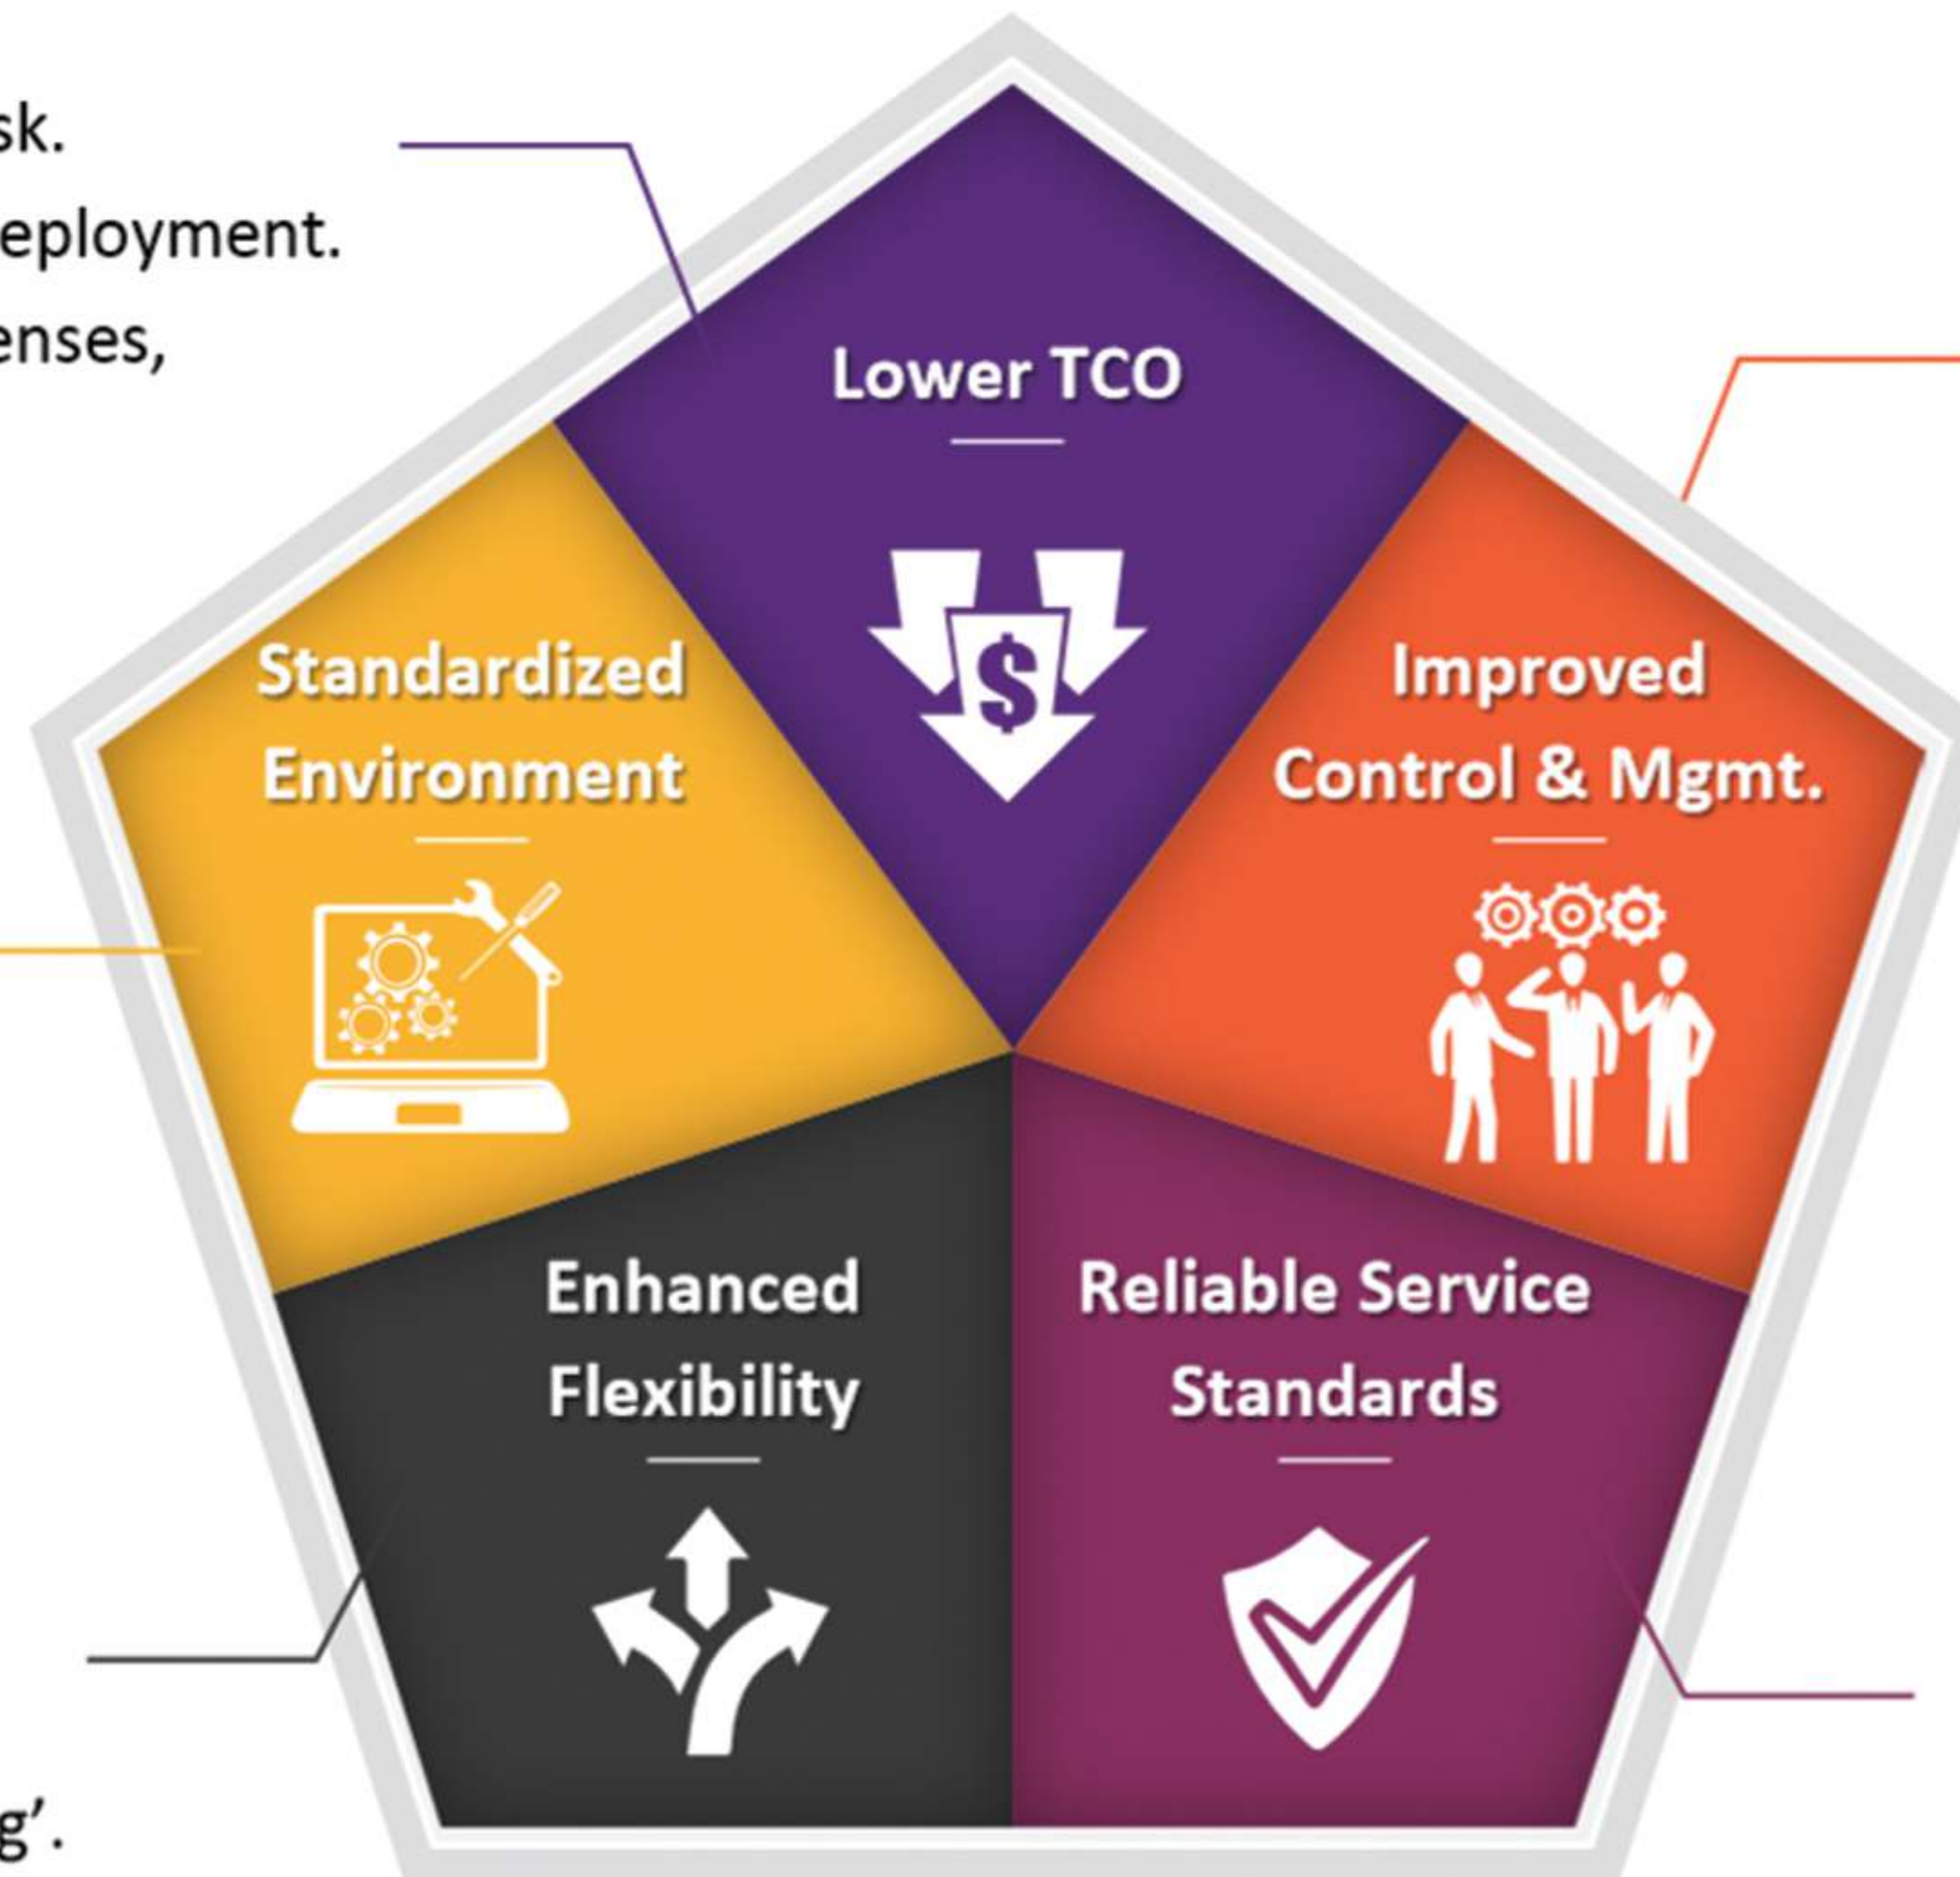

Powered By:

- ▶ Lower onsite IT staff required.
- ▶ Fewer calls/ tickets for the helpdesk.
- ▶ Reduced cost of new application deployment.
- ▶ Better resource utilization (e.g. licenses, storage, processing power) and load-balancing.

- ▶ Standardization across hardware and software resulting in reduced cost to serve and manage the environment.

- ▶ Remote access to desktop environment.
- ▶ Flexible working scenarios such as 'work from home' and 'hot-desking'.

- ▶ Enhanced control over desktop images.
- ▶ Improved business continuity and data integrity through data centralization.
- ▶ Enhanced security levels and compliance.

- ▶ Reliable desktop performance.
- ▶ Managed application response service levels.
- ▶ Faster TATs when provisioning IMACs (Install, Move, Add, Change).  
Reduced downtime in the event of hardware failures.
- ▶ Limited desk-side break/fix support required.

# Why Choose GPU Cloud Desktop?

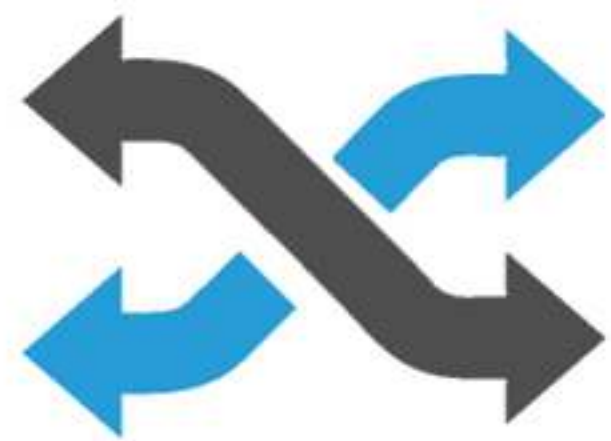

Secure Cloud Services for your online business since 1999.

**.Reliable .Secure .Speed .Scalable .Manageable .Compliant**

Powered By:

## Below are a few compelling reasons you should switch to a GPU Cloud Desktop instead of a conventional personal computer.

### Flexible

With GPU Cloud Desktop, your data and applications move with you. You can use multiple devices such as smartphone, tablet, laptop or desktop to access your apps and data over the GPU Cloud Desktop.

### Productive

If you have an GPU Cloud Desktop, you can remain productive even without turning up for work. All your data and applications are accessible from the comfort of your home or while you are on the move.

### Efficient

The server that houses your GPU Cloud Desktop packs a lot of processing power. Any task you execute on the GPU Cloud Desktop will use the resources of the server, instead of the machine used for login. This will result in efficiency.

### Versatile

You can access your GPU Cloud Desktop from devices running different operating systems. The compatible operating systems include Windows, Linux, Mac, iOS and Android. The broad choice of operating systems makes GPU Cloud Desktop a highly versatile cloud solution.

### Economical

In GPU Cloud Desktop, the resources of the Cloud Service Provider will be used. You can execute work even from a low spec machine or device. This will save you the additional cost of keeping your personal hardware up to date.

### Secure

In case of GPU Cloud Desktop, all your data and applications will be stored safely in a central server of the Cloud Service Provider like XcelHost. There are multiple layers of security before access is granted to the sensitive data.

### Compliant

The data centers of Cloud Service Providers (CSPs) like XcelHost comply with industry leading standards of data security. At times, this is also mandated by the law when data of sensitive nature is involved.

### User Experience

One more advantage of using an GPU Cloud Desktop is that CSPs use licensed software and productivity applications. This results in a seamless user experience, unlike a pirated software that keeps crashing or generating errors.

# GPU Cloud Desktop Security Features

Secure Cloud Services for your online business since 1999.  
.Reliable .Secure .Speed .Scalable .Manageable .Compliant

Powered By:

## Secure Infrastructure

ISO 270001 Certified, Multi-Tier Security Infrastructure. Hosting in Tier 4 Datacenters

## Virtual Firewall

Next Generation firewalls combine application awareness and deep packet inspection to give companies more control over applications while also detecting and blocking malicious threats.

## Encrypted Backup

We take backup every 3 hours and the backup is encrypted & ransomware proof

## Encrypted Data

Your Data is utmost secured with our server as we assure that your account is accessible to only the authorised users.

## Endpoint Security

Block cyber threats before they compromise your system Through its traffic filtering capability, EDR stops ransomware attacks at all stages: before, during and after the attack.

## Multi-Layer Security

With an enhanced anti-DDoS solution & multiple ISO/IEC certifications, we cover every aspect of security & business continuity.

## SSL VPN

SSL VPN lets remote users access Web applications, client-server apps, and internal network utilities

## Site to Site VPN

IPsec security method is used to create an encrypted tunnel from one customer network to remote site of the customer.

## 99.95% Uptime SLA

We guarantee that all critical infrastructure components will be available 100% of the time in a given month, excluding scheduled maintenance.

# Secure Cloud Desktop Use Cases

Secure Cloud Services for your online business since 1999.

**.Reliable .Secure .Speed .Scalable .Manageable .Compliant**

Powered By:

## Move your Game Engine Software Online

With a virtual desktop, take online popular game engine software such as: Unity, Blender, Unreal Engine, GameMaker, Construct, Cocos2D, and more.

## Access Live Production & Streaming Apps from the Cloud

Record video and stream live events with a virtual desktop using apps such as: OBS Studio, VLC Media Player, WebEx, Zoom, XSplit, and more.

## Move your Engineering Design Software on Cloud

Use GPU enhanced virtual desktops to work productively with CAD and engineering software such as: AutoCAD, TurboCAD, Autodesk, 3ds Max, Revit, and more.

## GPU Cloud Desktop for Remote Teams

Provide to your employees accesses from their own devices, and offer them the high end machines they need without any IT skill set necessary.

## Business Continuity

Ensure desktops are still available in the case of an unexpected interruption.

## Third Party Contractors

Ramp contractors quickly while maintaining security and control.

## Work at Home Programs

Embrace the growing remote working and work at home trends with

# For Engineering Design Software

Secure Cloud Services for your online business since 1999.  
.Reliable .Secure .Speed .Scalable .Manageable .Compliant

Powered By:

## AutoCAD

AutoCAD is an Engineering Design software by Autodesk. With better graphics rendering in Latest Operating System

## nanoCAD

nanoCAD is a professional grade CAD tool for Engineering, Mechanical design interfaces.

## TurboCAD

TurboCAD is a CAD software application for 2D and 3D design. With better graphics rendering in Latest Operating System

## ArchiCAD

ArchiCAD is an architectural BIM CAD software for Macintosh & Windows developed by Graphisoft.

## 3ds Max

3ds Max is an Architecture Design and Character modeling software by Autodesk.

# For Game Engines Software Online

Secure Cloud Services for your online business since 1999.  
.Reliable .Secure .Speed .Scalable .Manageable .Compliant

Powered By:

## Blender

Blender is a professional, free and open-source 3D computer graphics software toolset used for creating animated films, visual effects and video games.

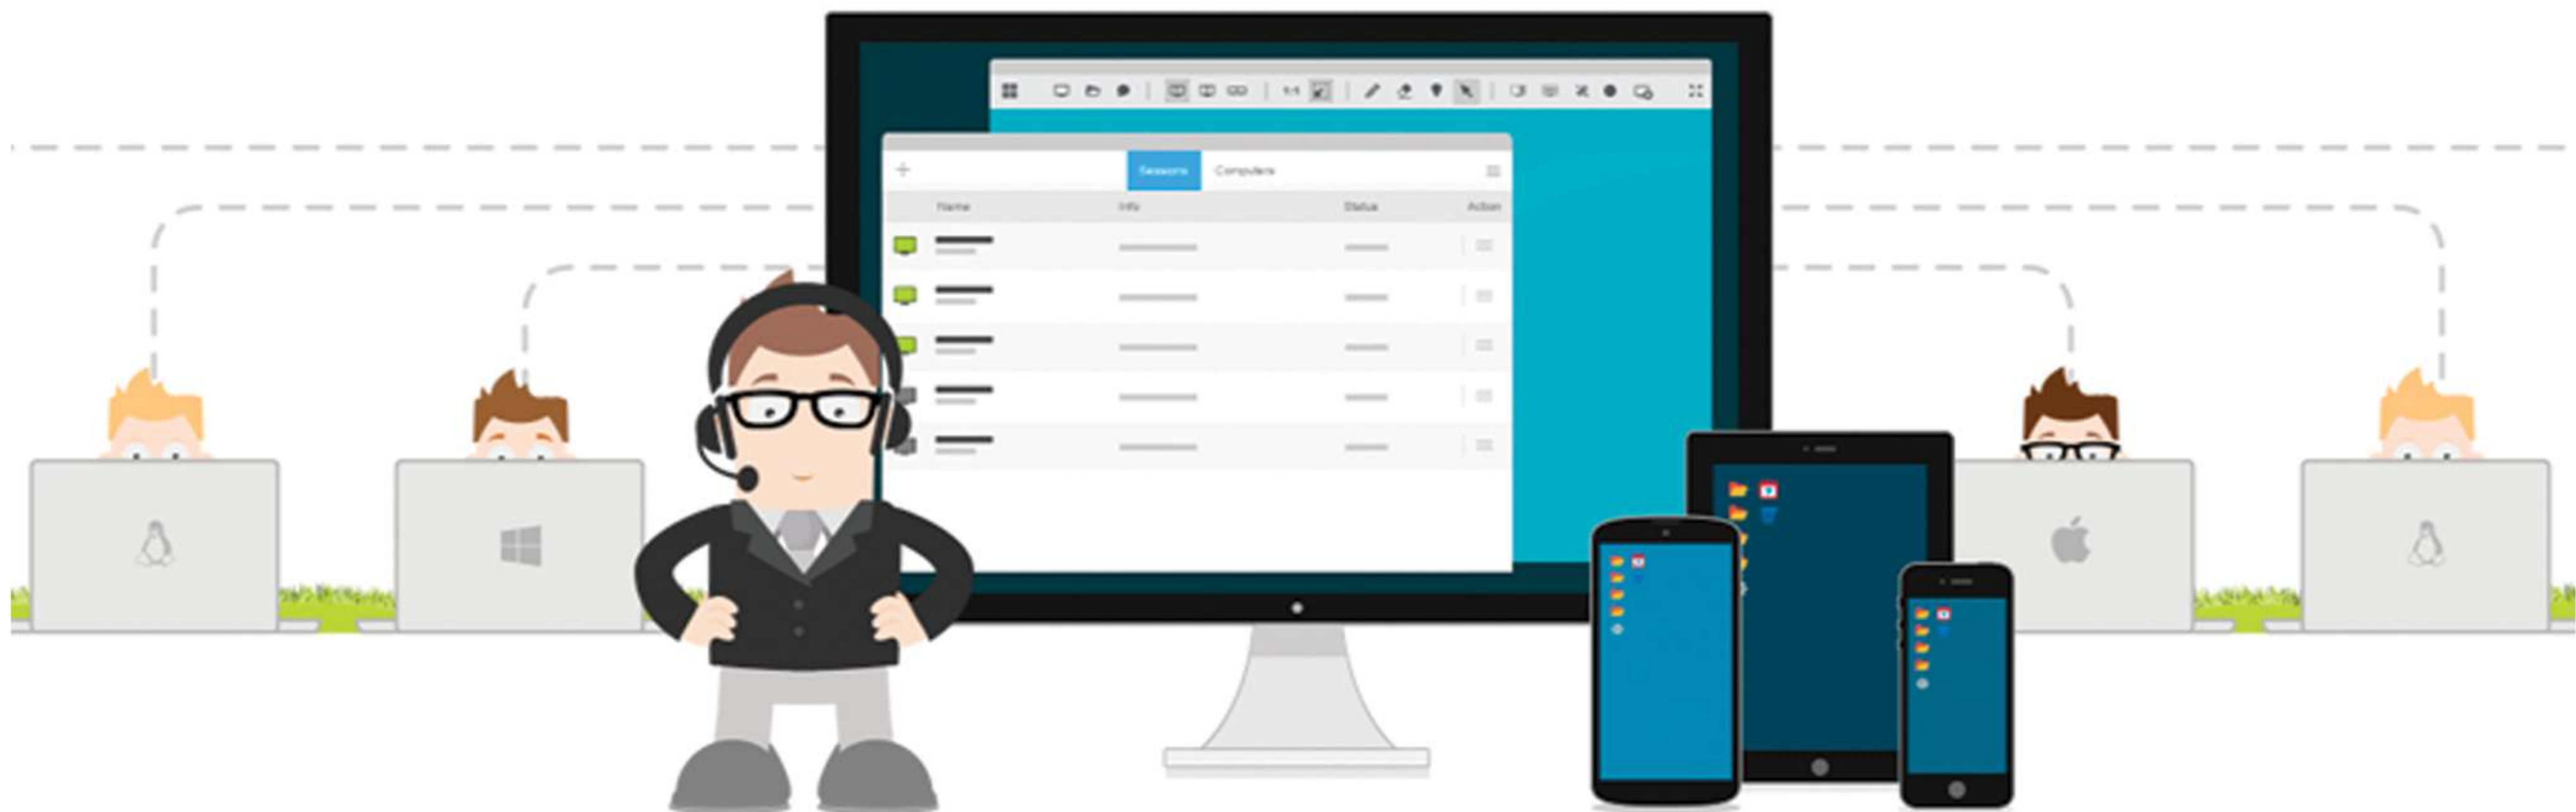

## Lego

Lego is best known for the manufacture of Lego-brand toys, consisting mostly of interlocking plastic bricks.

## Unity

Unity is a popular cross-platform game engine used to develop video games for computers and mobile devices.

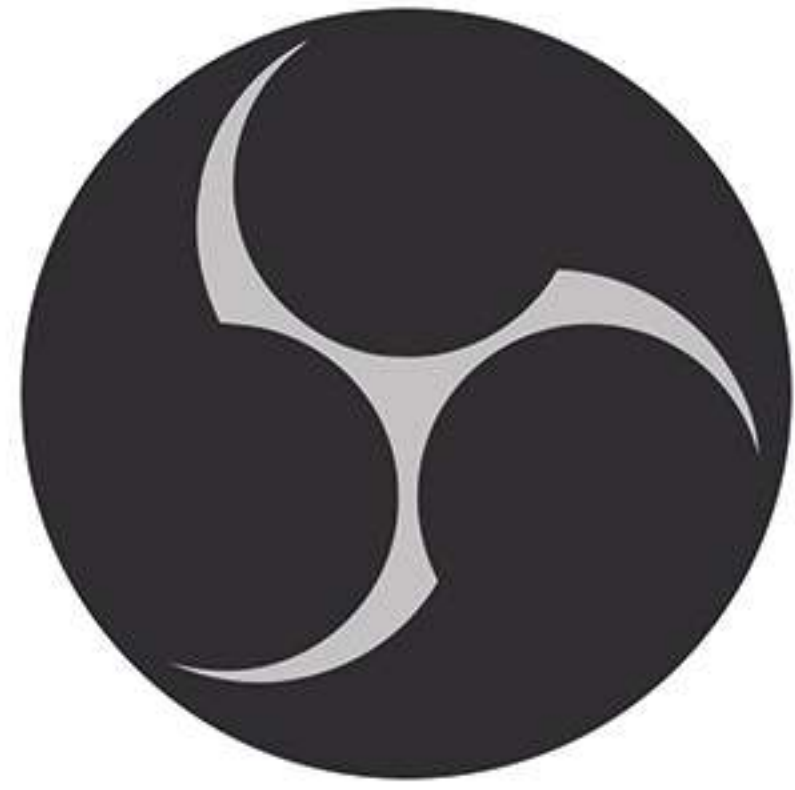

# For Live Production & Streaming Software

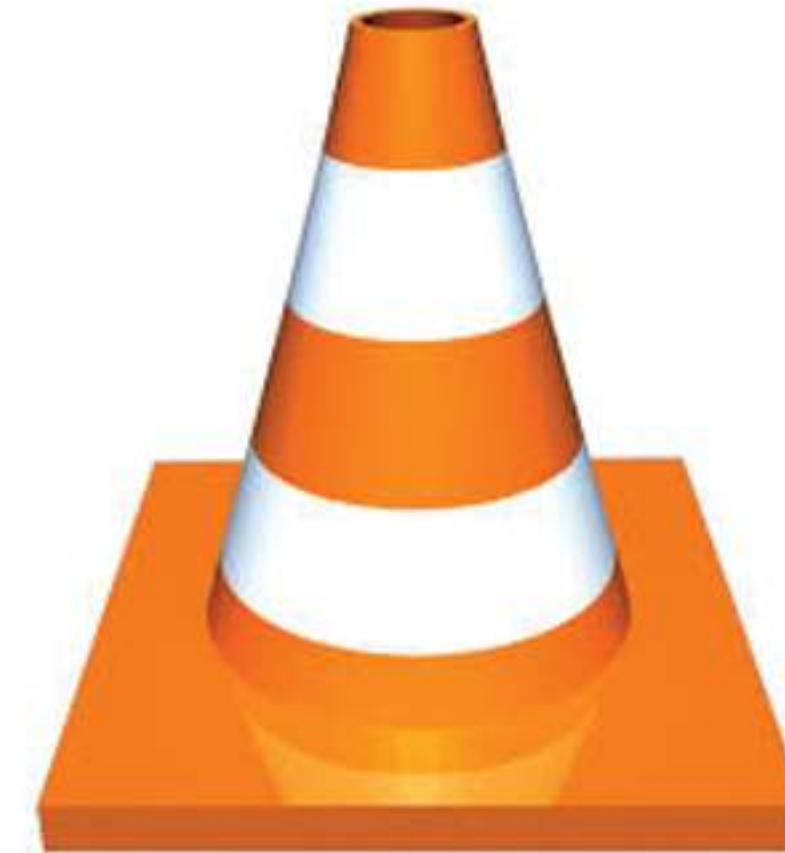

Secure Cloud Services for your online business since 1999.  
.Reliable .Secure .Speed .Scalable .Manageable .Compliant

Powered By:

## OBS Studio

OBS Studio is a free and open source software for video recording and live streaming

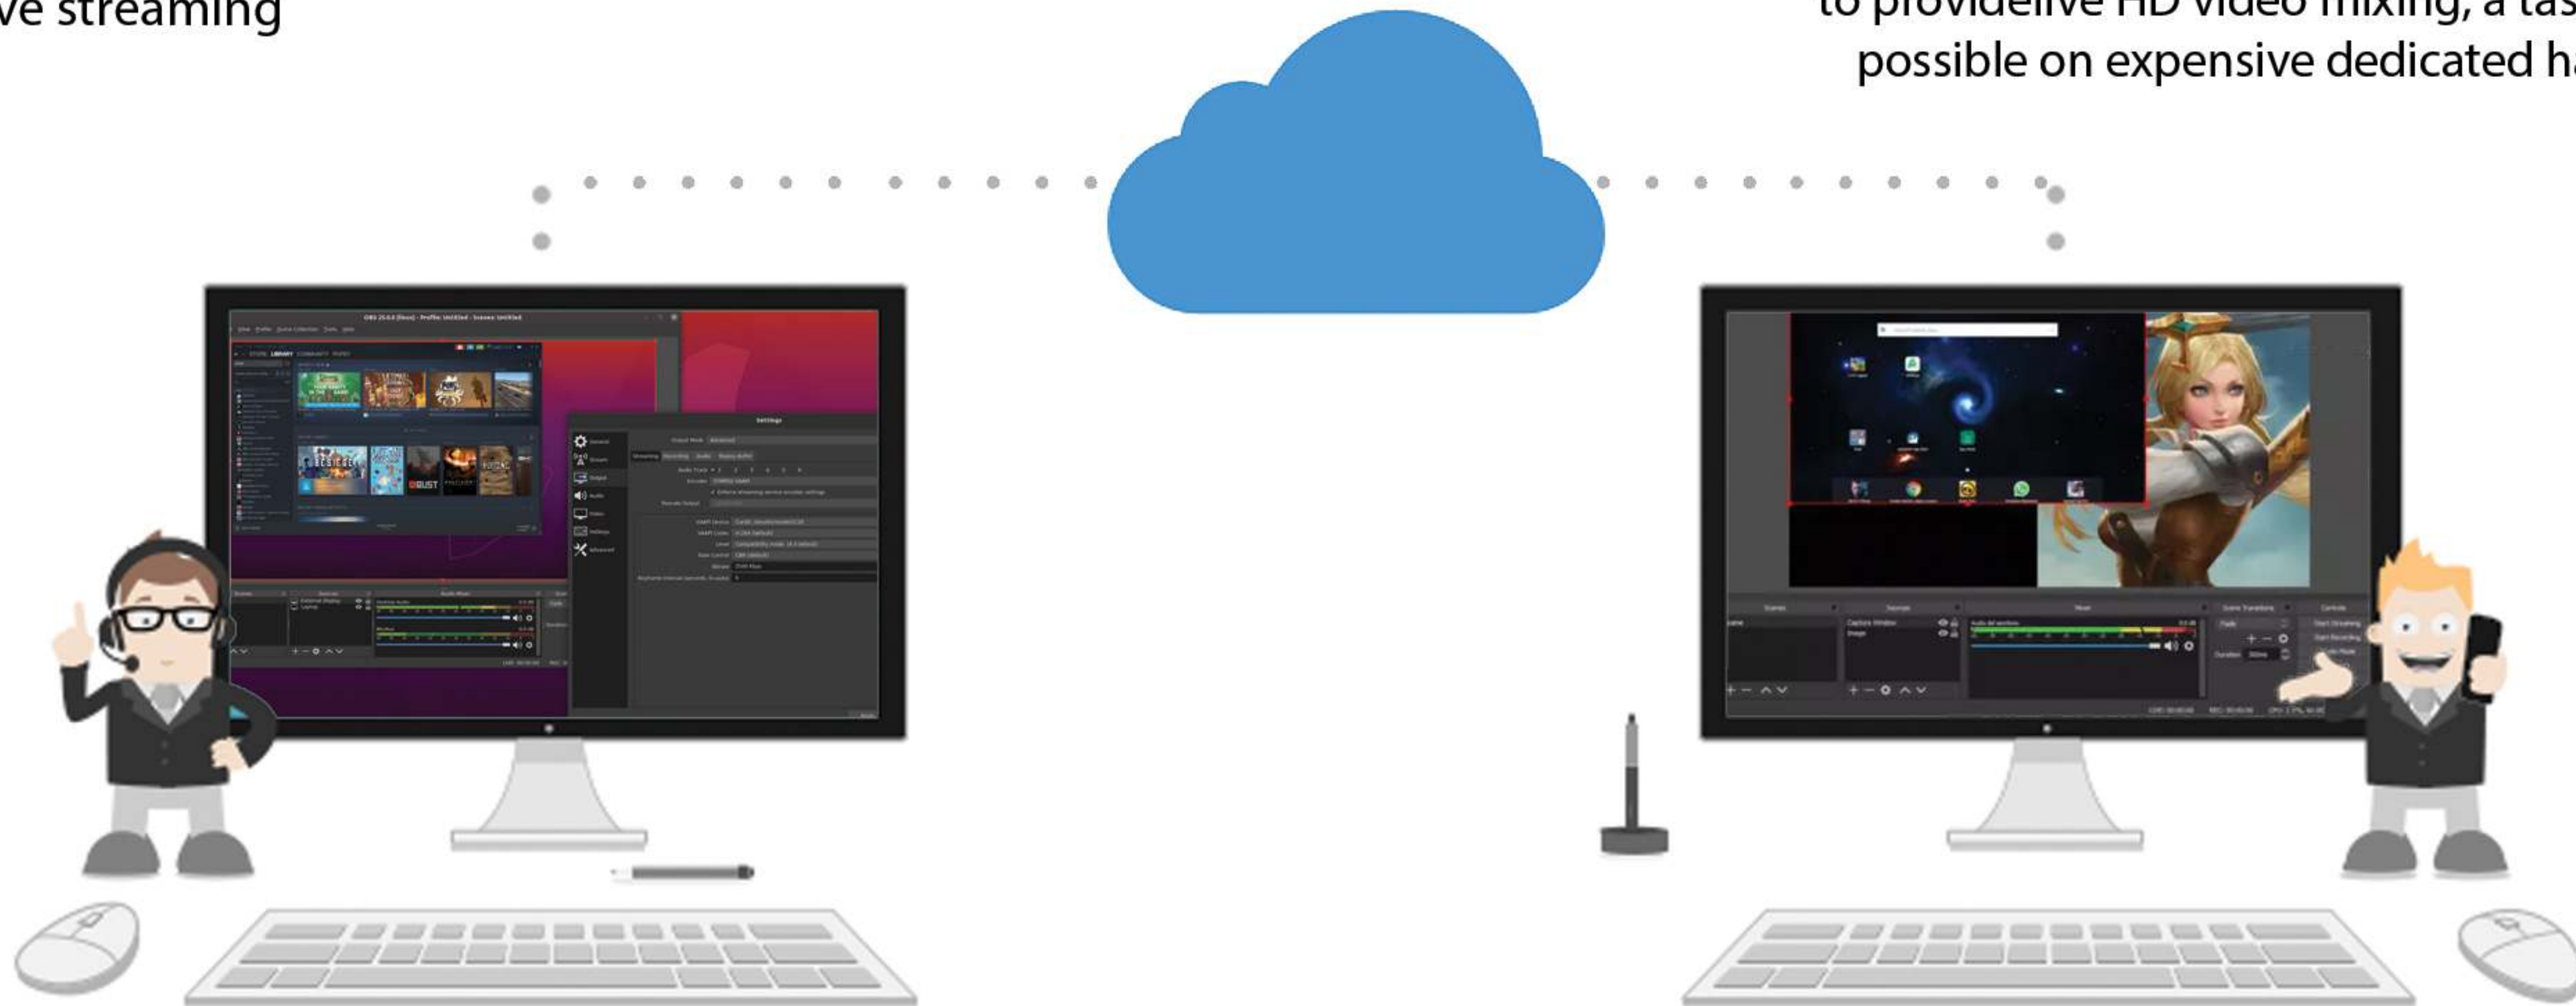

## VLC Media Player

VLC media player is a free and open-source software for video and streaming media.

## vMIX

vMix is a Software Video Mixer and Switcher that utilises the latest advances in computer hardware to provide HD video mixing, a task previously only possible on expensive dedicated hardware mixers.

# For Work at Home Programs

Secure Cloud Services for your online business since 1999.  
.Reliable .Secure .Speed .Scalable .Manageable .Compliant

Powered By:

## Increased Employee Satisfaction

Enhance employee productivity and engagement by allowing a flexible, work at home model with enterprise tools.

## Secure Sensitive Data & Intellectual Property

Over 100 user controls to regulate users' ability to transfer data (i.e. copy/paste functionality, USB drives, etc.).

## Centralized, Simplified IT Management

Deploy and support remote employees by easily delivering app and resources via cloud desktops.

## Reduced Hardware Costs

Implement a BYOD model or utilize accops endpoint solutions to lower hardware costs.

## Expand Your Hiring Pool

Hire the best talent for your organization rather than being bound by physical office constraints.

## Softphone Compatibility

Allow users to make high-quality voice and video conferencing calls through their cloud desktop.

# For Third Party Contractors

Secure Cloud Services for your online business since 1999.  
.Reliable .Secure .Speed .Scalable .Manageable .Compliant

Powered By:

## Immediate Productivity

Get contractors productive today without waiting for a laptop, desktop or VPN connection.

## Secure Sensitive Data & IP

Over 100 user controls to regulate users' ability to transfer data (i.e. copy/paste functionality, USB drives, etc.)

## Centralized IT Management

Deploy and support third-party contractors without ever touching their endpoint.

## Save Money Through BYOD

Allow contractors to use their own endpoints to access cloud desktops using the controls and security parameters you prescribe.

## High Performance Experience

Purpose built infrastructure delivers 99.99% availability on high availability configurations and supports capability for VOIP softphone solutions and high definition video.

## Scale Quickly

Quickly provision or remove contractor desktops from your pool to meet the needs of your business.

# For Business Continuity

Secure Cloud Services for your online business since 1999.  
.Reliable .Secure .Speed .Scalable .Manageable .Compliant

Powered By:

## Sustained Productivity

When office access is impossible, enable workers to maintain productivity using any device, anywhere with a reliable internet connection.

## Geographic Separation

Secondary site and operational reserves can be configured to warm-hot or hot-hot scenarios to get backup desktops online quickly.

## Complete Backup & Replication

Backups and replication of desktop images and data from the primary site to secondary site based on customer interval requirements and needs.

## Centralized IT Management

Deploy and support employees or third-party contractors by easily providing necessary applications & resources directly to their cloud desktop.

## Customized DR Plan

Consult with our dedicated engineering team to come up with a plan that meets your RTO, RPO and budget requirements.

# 24x7 Expert Managed Desktop Support

Secure Cloud Services for your online business since 1999.

**.Reliable .Secure .Speed .Scalable .Manageable .Compliant**

Powered By:

## Available 24/7

Lights are always on at XcellHost for your outsourced web hosting support. You & your customers will get lightning-fast response 24 hours a day, 7 days a week.

## Multi-Channel Support

Your customers can reach us in a channel they are comfortable with – Phone, Live Chat, Help desk or Email.

## Customized Support SLA

Need 15 minute responses to tickets? 5 minute response to alerts? You can do all that & more with dedicated support.

## Single Point Of Contact

An account manager familiar to you will act as the single point of contact at XcellHost for everything that relates to operations, projects, quality & more.

## 24/7 Monitoring & Rescue

We prevent customer complaints by monitoring your servers 24/7 and quickly rescuing failed or unresponsive services.

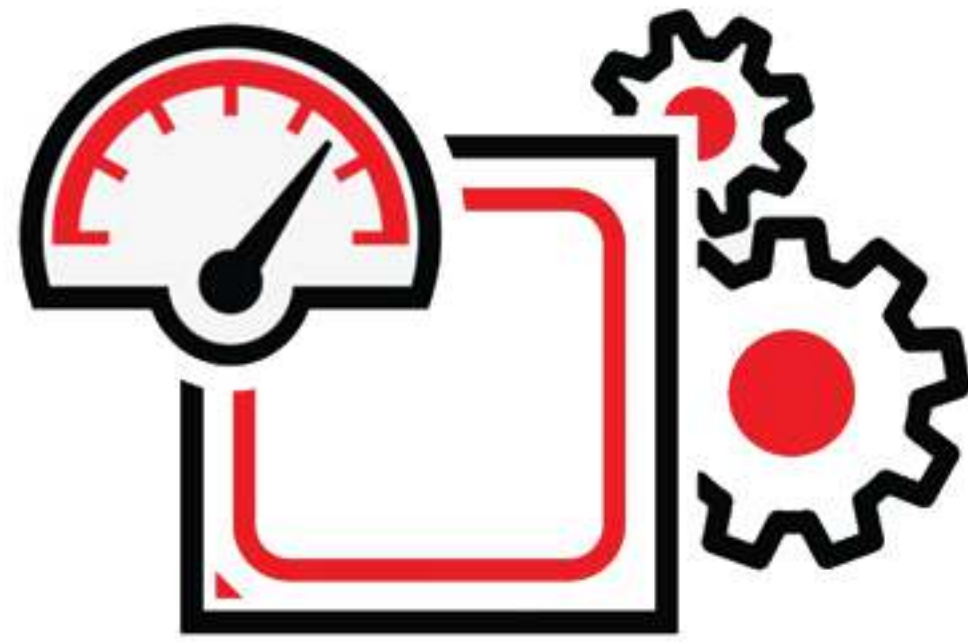

# 24x7 Expert Managed Desktop Support

Secure Cloud Services for your online business since 1999.

**.Reliable .Secure .Speed .Scalable .Manageable .Compliant**

Powered By:

## Server Performance Tuning

We'll keep your server blazing fast through periodic performance tuning and by fixing server bottlenecks in the event of server load spikes.

## Server Updates & Patching

We will apply server updates as soon as they are available. When there are unpatched vulnerability disclosures, we'll apply a hotfix to prevent exploits.

## Security Audits & Hardening

We'll audit your server every few weeks and re-harden the server to make sure it can block all new kinds of attacks.

## Backup Management

To make sure you'll always have a reliable backup, we'll monitor your backup process, fix backup errors, and periodically test backup integrity.

## Pre-Sales Support

If your prospective customers need help understanding your service features, we'll guide them towards the right package.

# Why XcellHost For GPU Cloud Desktop?

Secure Cloud Services for your online business since 1999.  
.Reliable .Secure .Speed .Scalable .Manageable .Compliant

Powered By:

## Best-in-Class Performance

Benchmarked to our competitors, our customers continually tell us that XcellHost GPU-powered DaaS solution out performs other cloud providers in terms of speed and performance.

## Straightforward IT

You no longer have to worry about infrastructure administration, security updates or system upgrades. Xcellhost manages it all for you while you can focus on your projects, your team and your clients.

## Capacity Management

Our solution supports your team as it grows & expands. Procuring and deploying desktops is as-needed either for an internal or external project to support your strategic partners or contractual workers.

## Pay-per-Use Model

When you move to XcellHost, you gain an agile & powerful solution for use on any device while only paying for what you use.

## Secure Remote Access

Any authorised end user – whether internal or external – can access data, documents and files from any device with a stable 3G, 4G or WiFi connection.

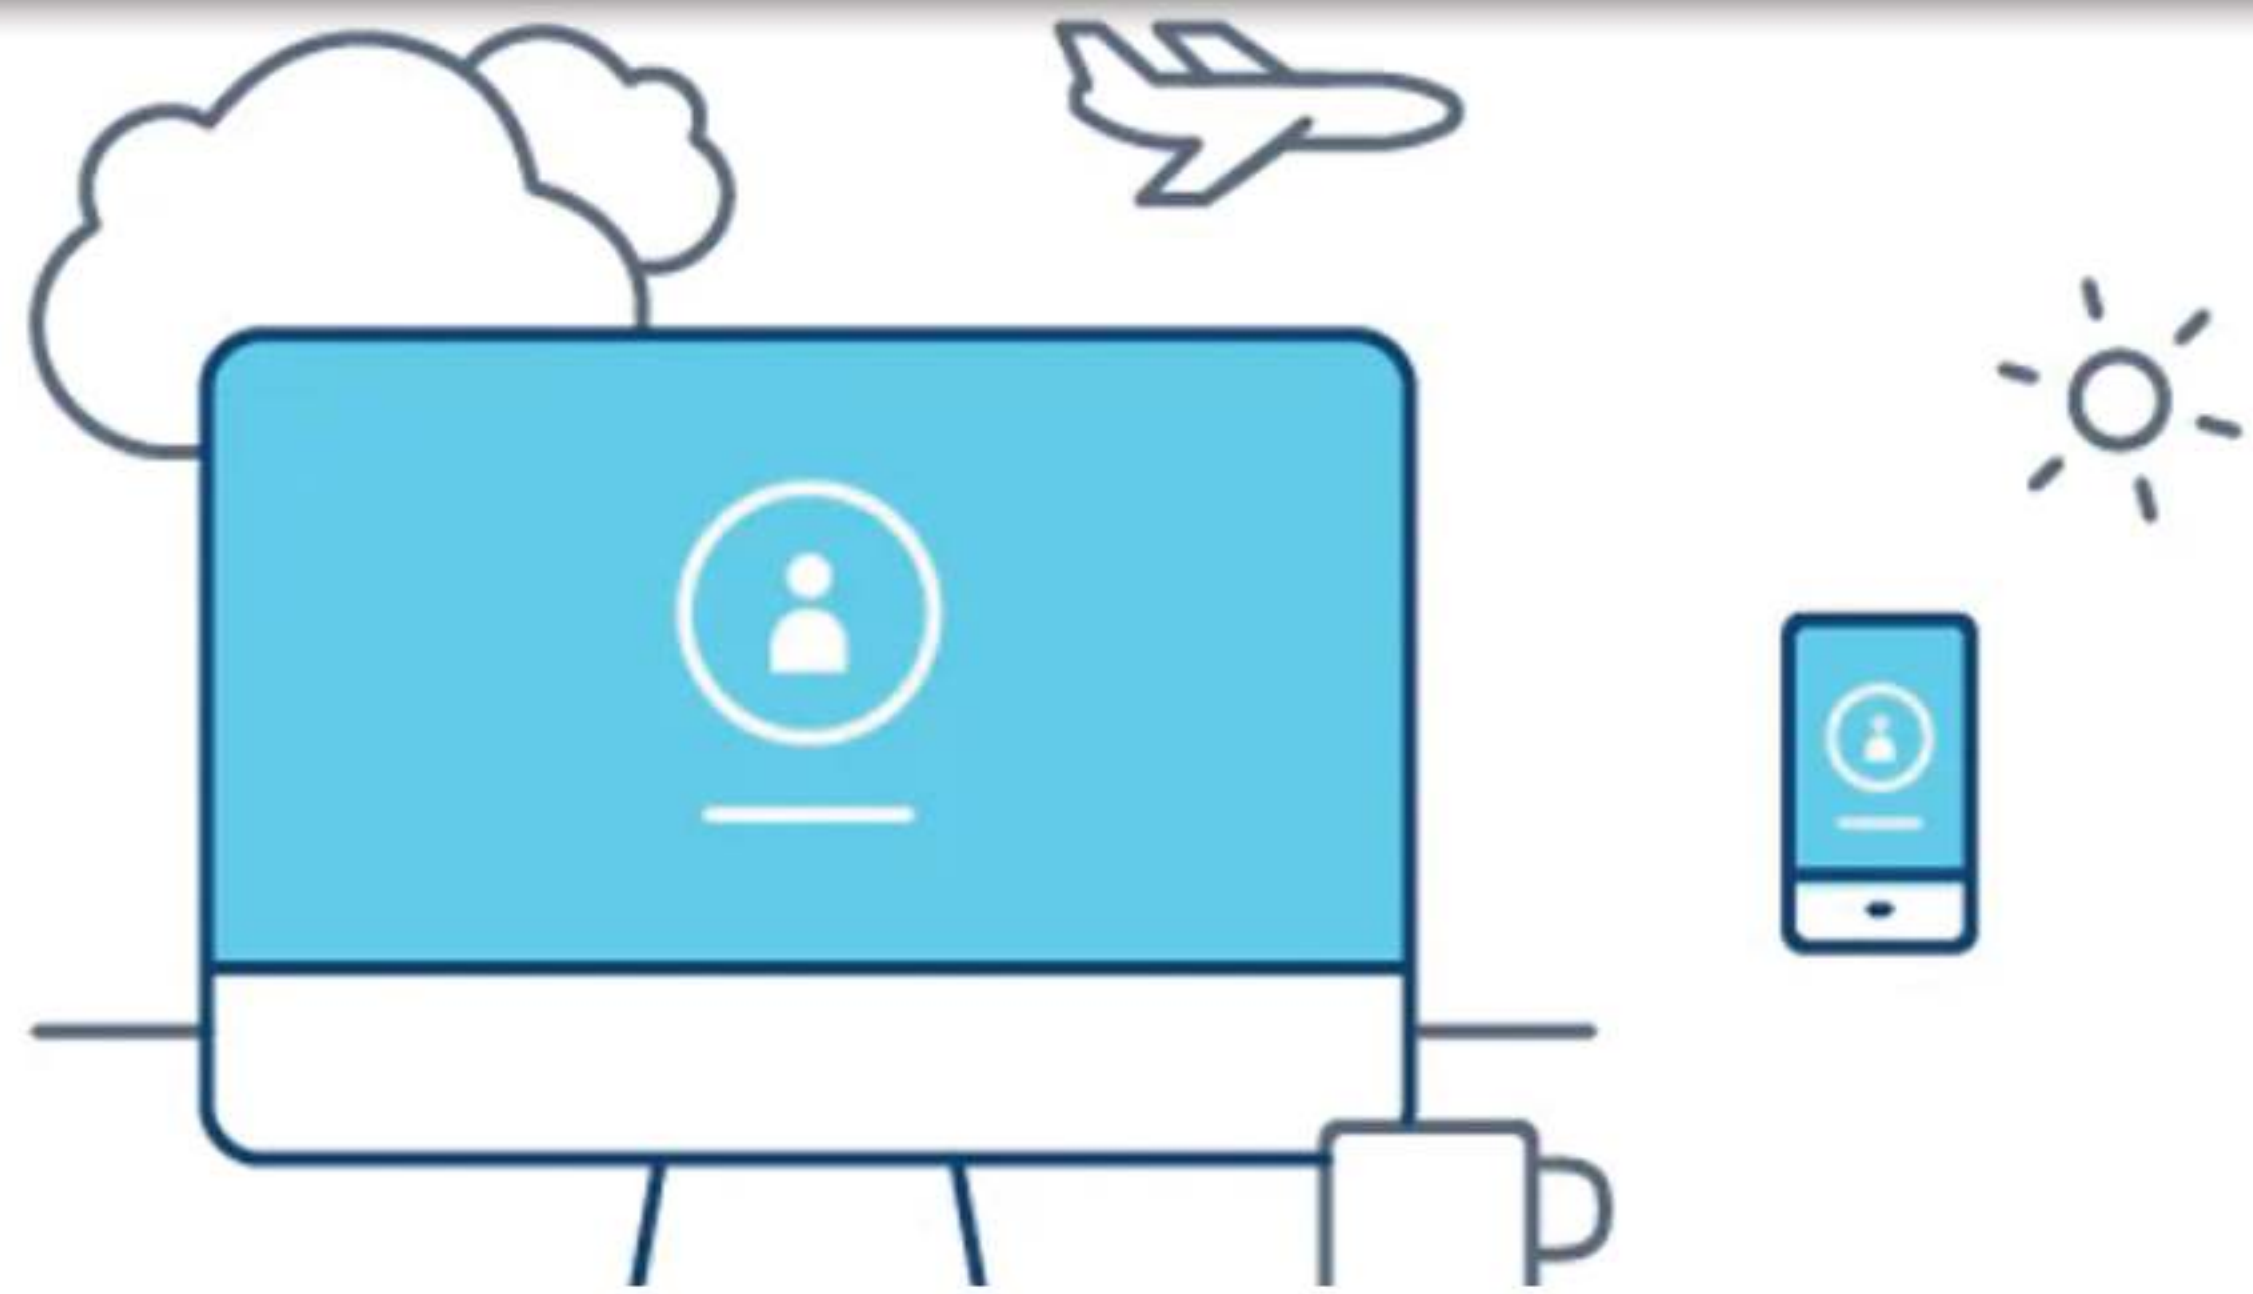

# NoTouch Desktop

Secure Cloud Services for your online business since 1999.

**.Reliable .Secure .Speed .Scalable .Manageable .Compliant**

## TeraDici PCOIP protocol for VFX workloads

NoTouch Desktop lets you transform any PC, Thin Client, Laptop or Raspberry Pi device into a secure and centrally managed Thin Endpoint. You can also instantly deploy NoTouch OS onto thousands of devices and manage them from one browser.

### Features & Benefits

Hardware Agnostic and Highly Scalable

Easily Customizable

Authentication and Single Sign-on

Standardizing Desktops and Hardware Repurposing

High Availability

Enterprise Grade Security

Easy to Install and Boot

Consistent and Timely Updates

## WHY YOU SHOULD BUY THE CLOUDDESKTOP ON THE GO

### Extends PC lifespan

Dramatically extends the life of your legacy PC, creating the perfect stepping stone to thin client computing.

### Instant Roaming

With CloudDesktop On the Go, you can easily hop from location to location taking your thin client with you. Your desktop and settings travel with you.

### Boosts productivity

Using an embedded & hardened Linux operating system, CloudDesktop boosts your user's productivity by focussing users.

### Highly Flexible

Equipped with the latest thin connectivity client software, CloudDesktop will connect to almost any server framework including Citrix®, VMware® and Microsoft®.

### Secure and stable

CloudDesktop has been designed to be secure, using a hardened Linux framework, making it perfect for corporate and financial environments

### Enterprise management available

CloudDesktop is manageable using Fusion Professional, available as an affordable cost option. Fusion Professional delivers enterprise grade features and quality.

## Benefits

Users can hot desk or roam, carrying their thin client with them

Dramatically extends the working life of legacy PCs

Provides a unique stepping stone to thin-client computing

Compatible with Microsoft, Citrix and VMware's virtualization protocols

Central management, using Fusion Professional included with CloudDesktop

Fast and simple installation,

Extremely low cost

Vastly enhanced security & Virus-free workstations

\* additional Rs.250 per user per month for software licences

plus applicable taxes

## Use Cases

							
Secure File Sharing	Data Subject Access Request	Retire Windows File Servers	Accelerate Cloud Migration	Archive in a Click	Desktop / Mobile / Web Collaboration	Dropbox Replacement	Microsoft Integrations
							
Project Efficiency	GDPR Compliance Made Easy	Cross-office Sync	Project Collaboration	Remote Office Productivity	Customer File Transfer	Business Continuity	Google App Integrations

# Secure Web Gateway

Secure Cloud Services for your online business since 1999.  
**.Reliable .Secure .Speed .Scalable .Manageable .Compliant**

Powered By:

## 64% percent of employees visit non-work related & malicious websites every day at work.

Control desktop, laptop, & mobile device internet access to malicious and inappropriate websites.

**UNMANAGED**

**Rs.299 /user /mo**

**MANAGED**

**Rs.349 /user /mo**

### Features

Single dashboard for efficient management

Better prioritize incident investigations

Predict future attack origins by pinpointing and mapping out attackers' infrastructures

Easily integrate Investigate data other security orchestration tools

Gain deeper visibility into threats with the most complete view of the internet

### Benefits

Broad security coverage across all ports and protocols

Security protection on and off network

Rapid deployment and flexible enforcement levels

Immediate value and low total cost of ownership

Rapid response with fast resolution, containment and remediation

Ask for a Free Trial Today

## Use Cases

Highly Secured

Empower the anytime, anywhere global workforce

The features, API, and ports of a cloud security solution

Unrivaled Threat Protection

Superior real-time reporting—simplified

Remove layers of latency

## WHAT YOU GET IN A SINGLE PANE OF GLASS

### Secure onramp to the internet, everywhere

Visibility

On & off corporate network

All internet & web traffic

All apps

All devices

SSL decryption

Protection

DNS-layer security

Web inspection

File inspection

Threat intel access

Sandboxing

Control

URL block/allow lists

Port & protocol rules

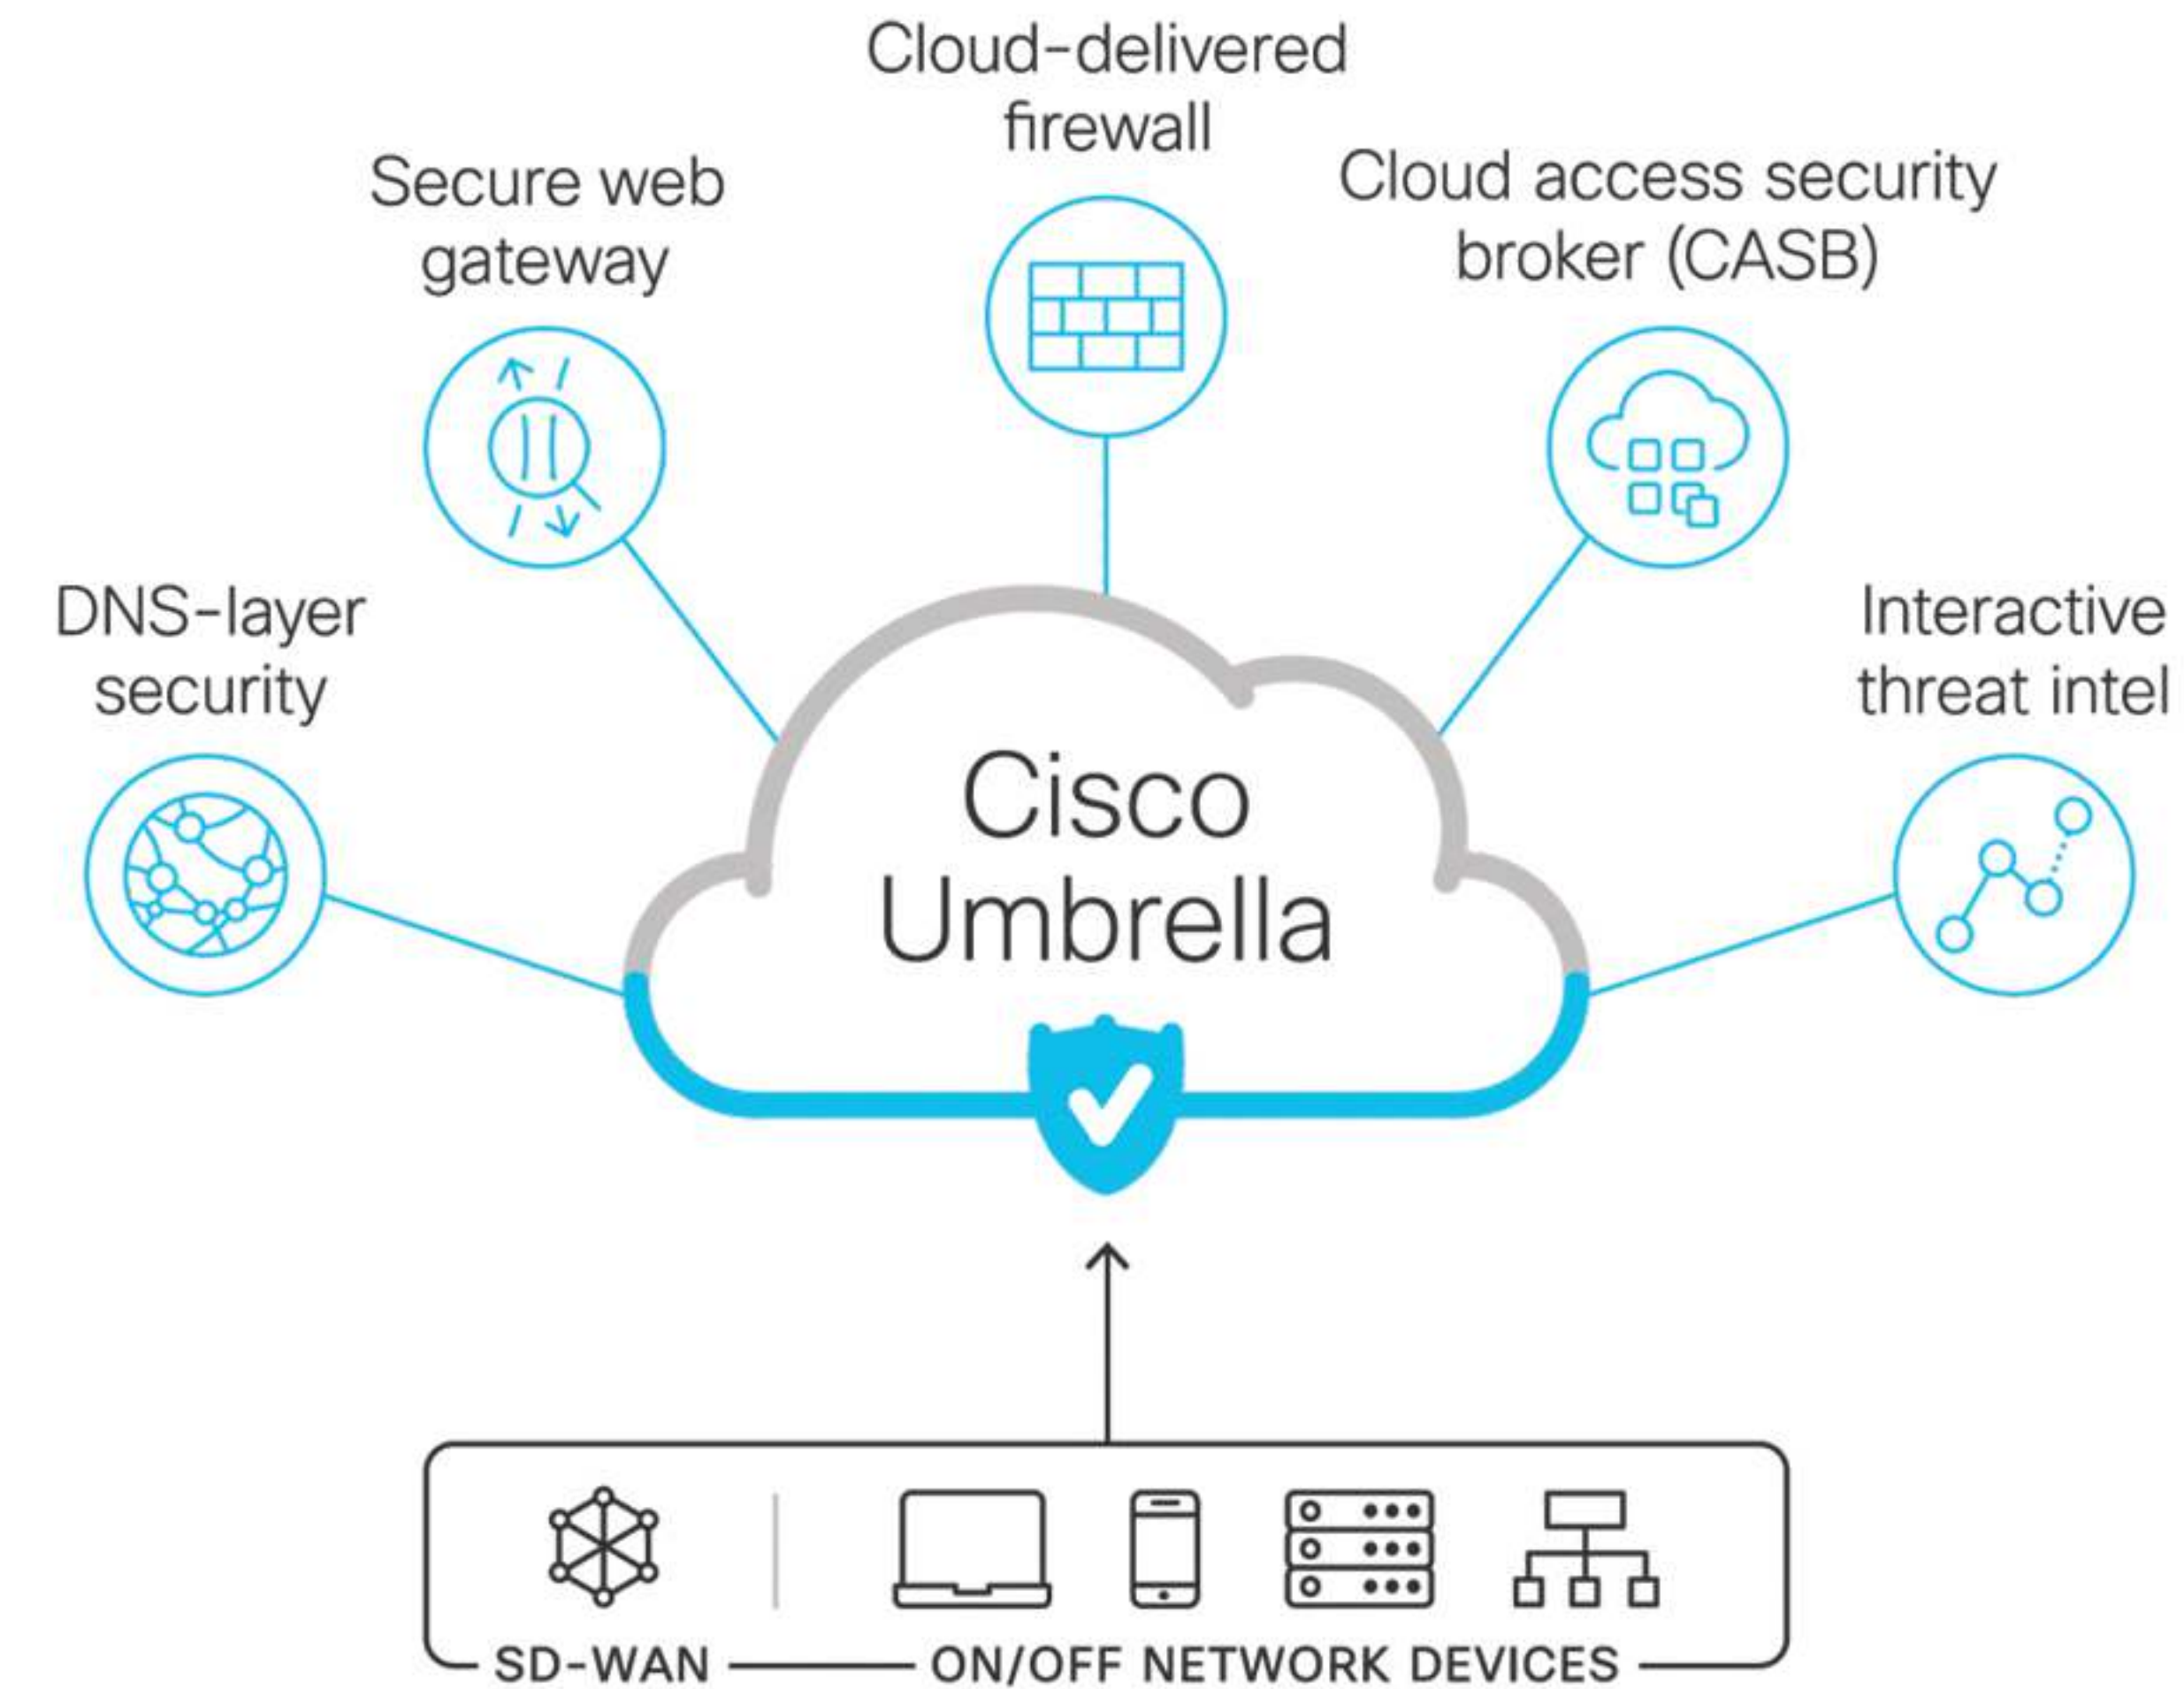

Content filtering

App blocking

Granular app controls

Powered By Cisco Talos Threat Intelligence

## UNIFY FUNCTIONS FOR DISTINCT VALUE

## THREAT PREVENTION

Proxy (Native SSL)

IPS & Advanced Protection

Cloud Sandbox

DNS Security

## ACCESS CONTROL

Cloud Firewall

URL Filtering

Bandwidth Control

DNS Filtering

# Frequently Asked Questions (FAQ)

Secure Cloud Services for your online business since 1999.  
**.Reliable .Secure .Speed .Scalable .Manageable .Compliant**

## WHAT IS SECURE CLOUD DESKTOP?

Desktop is an untethered virtual workspace that provides employees with access to all of their applications, files and data from the XcelHost hosted cloud on nearly any internet-enabled 'smart' device.

## HOW DO I ACCESS CLOUD DESKTOP?

Desktop from netbooks, ultra books, iPads and Android tablets, from any computer running Windows XP or greater, Linux, Macs, or from low-cost, dedicated thin client devices.

## WHAT HAPPENS IF I WANT TO USE A TABLET COMPUTER?

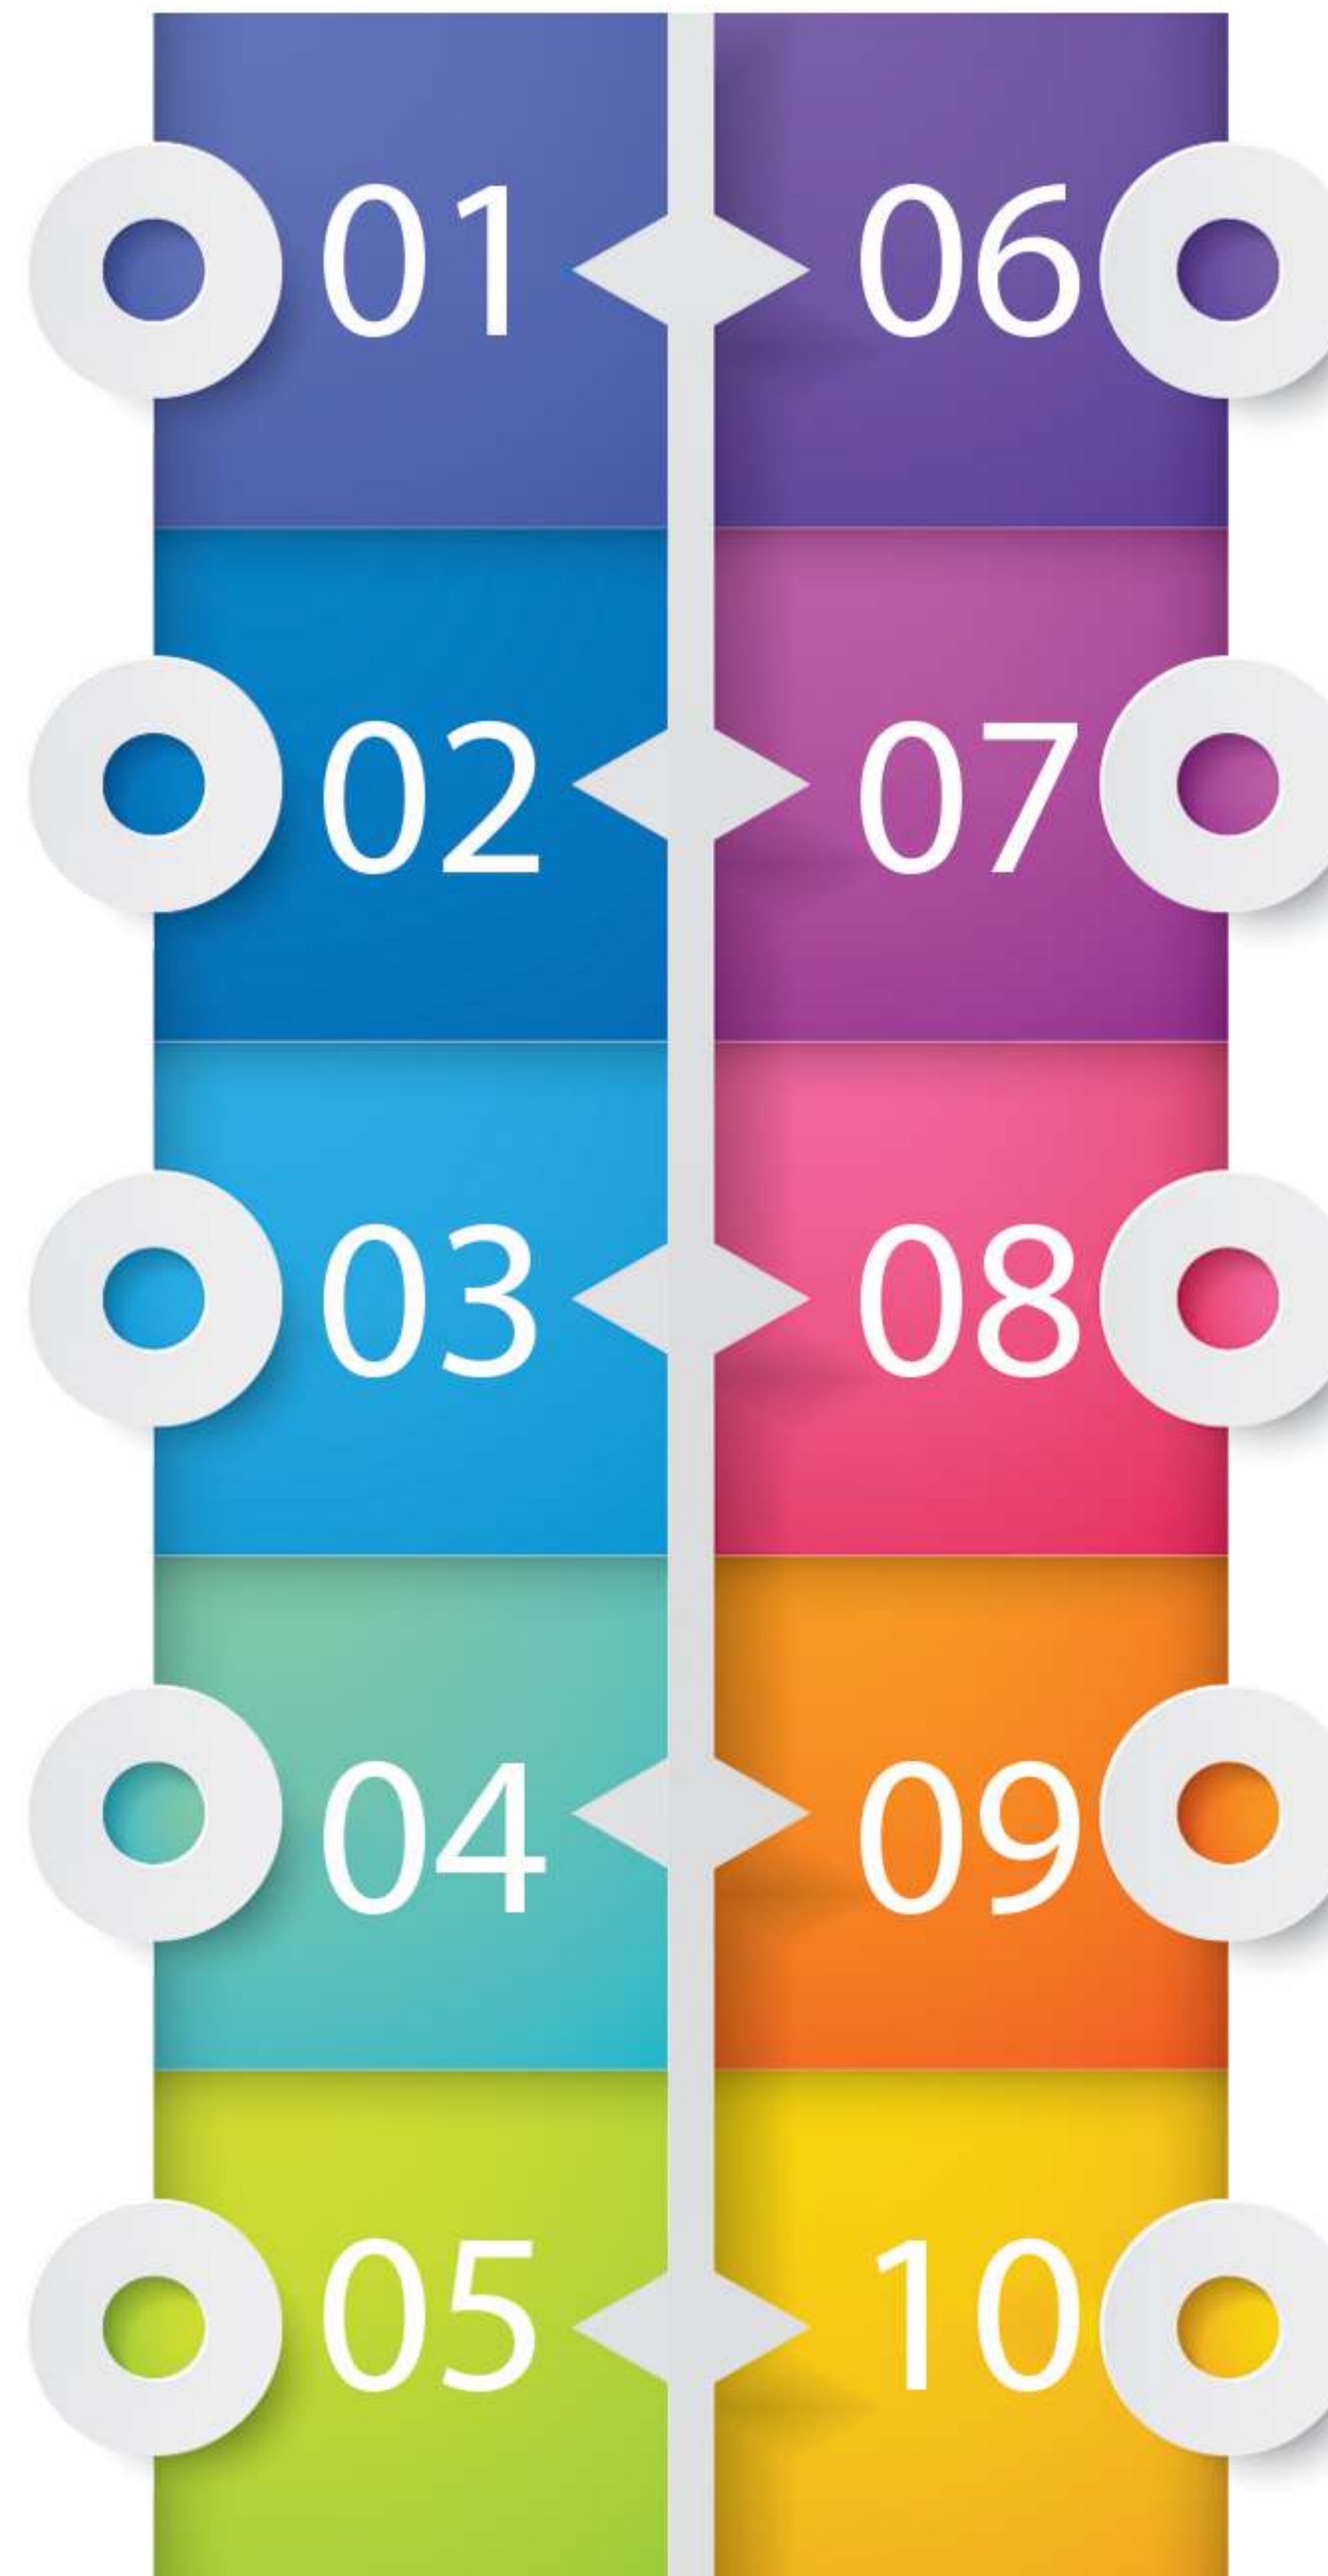

On some tablets it's possible to install software for remote desktop connectivity, however the overall experience won't be as rich as from a PC or laptop computer due mainly to screen size restrictions.

## IS THIS ALL OR NOTHING – DOES EVERYONE IN THE COMPANY HAVE TO BE ON IT?

Desktop is not an all or nothing proposition. While the most common deployment, simply due to proximity, is to bring both desktops and line of business applications within the XcellHost hosting environment, businesses can select just the users for whom it makes the most sense, and hybrid deployment models are supported.

## THIRD PARTY INTEGRATIONS

Secured option to connect to your third party apps (eg ERP / CRM)

## WHEN CAN I ACCESS CLOUD DESKTOP?

Anywhere that you have internet connectivity including cable modem and 3G/4G wireless connections – from home, from the coffee shop, from the airport, from the office, etc.

## WHICH STYLE OF WINDOWS DESKTOP DO YOU OFFER?

Windows 2019 environment with some elements being delivered from Windows 2016 servers. This means we support Windows 7, 8 and 10 style desktops. Connecting to local printer is possible using our Cloud Client.

## CAN I USE LINUX?

Yes, you can download the free remote desktop client. Please note there are some specific issues with printing from Linux and you are advised to call our Helpdesk to discuss.

## WHO MANAGES MY APPLICATIONS AND DESKTOP?

Your current administrator or third party consultant is responsible for your Active Directory, users' permissions and policies, desktop applications, and endpoint device support. XcellHost manages Cloud Desktop pools and licensing, stable and secure virtual infrastructure, network, and consumable resources (CPU, RAM, Disk).

## HOW DO MY PERIPHERALS SUCH AS PRINTERS AND USB DEVICES WORK?

Most USB peripherals that are supported in Windows will be supported in The XcellHost Office: Desktop. Administrators can control the types of peripherals that can be accessed within the virtual desktop by implementing policies that make the most sense for their organization and user community.
