Secure Cloud Desktop Overview

Secure Cloud Services for your online business since 1999.

.Reliable .Secure .Speed .Scalable .Manageable .Compliant

XcellDesktopSM | Secure Cloud Desktop, allows users to access session-based desktops from the cloud. The terminal sessions run on your private corporate network and stream over a secure Internet connection. This allows you to deploy multi-purpose desktops for a pool of users without dedicating a virtual desktop to each person.

Top Reasons To Deploy Secure Cloud Desktop

Secure Cloud Services for your online business since 1999.
.Reliable .Secure .Speed .Scalable .Manageable .Compliant

NO CAPEX ONLY OPEX

To maintain a sizeable IT hardware on premise, you need to shed loads of cash up front. You need to provide each employee with a dedicated desktop or laptop PC.

IT SUPPORT

With a large IT infrastructure housed within the organization, you need a strong team of IT personnel that ensures all the hardware is working fine and for its troubleshooting.

INTEGRATION ISSUES

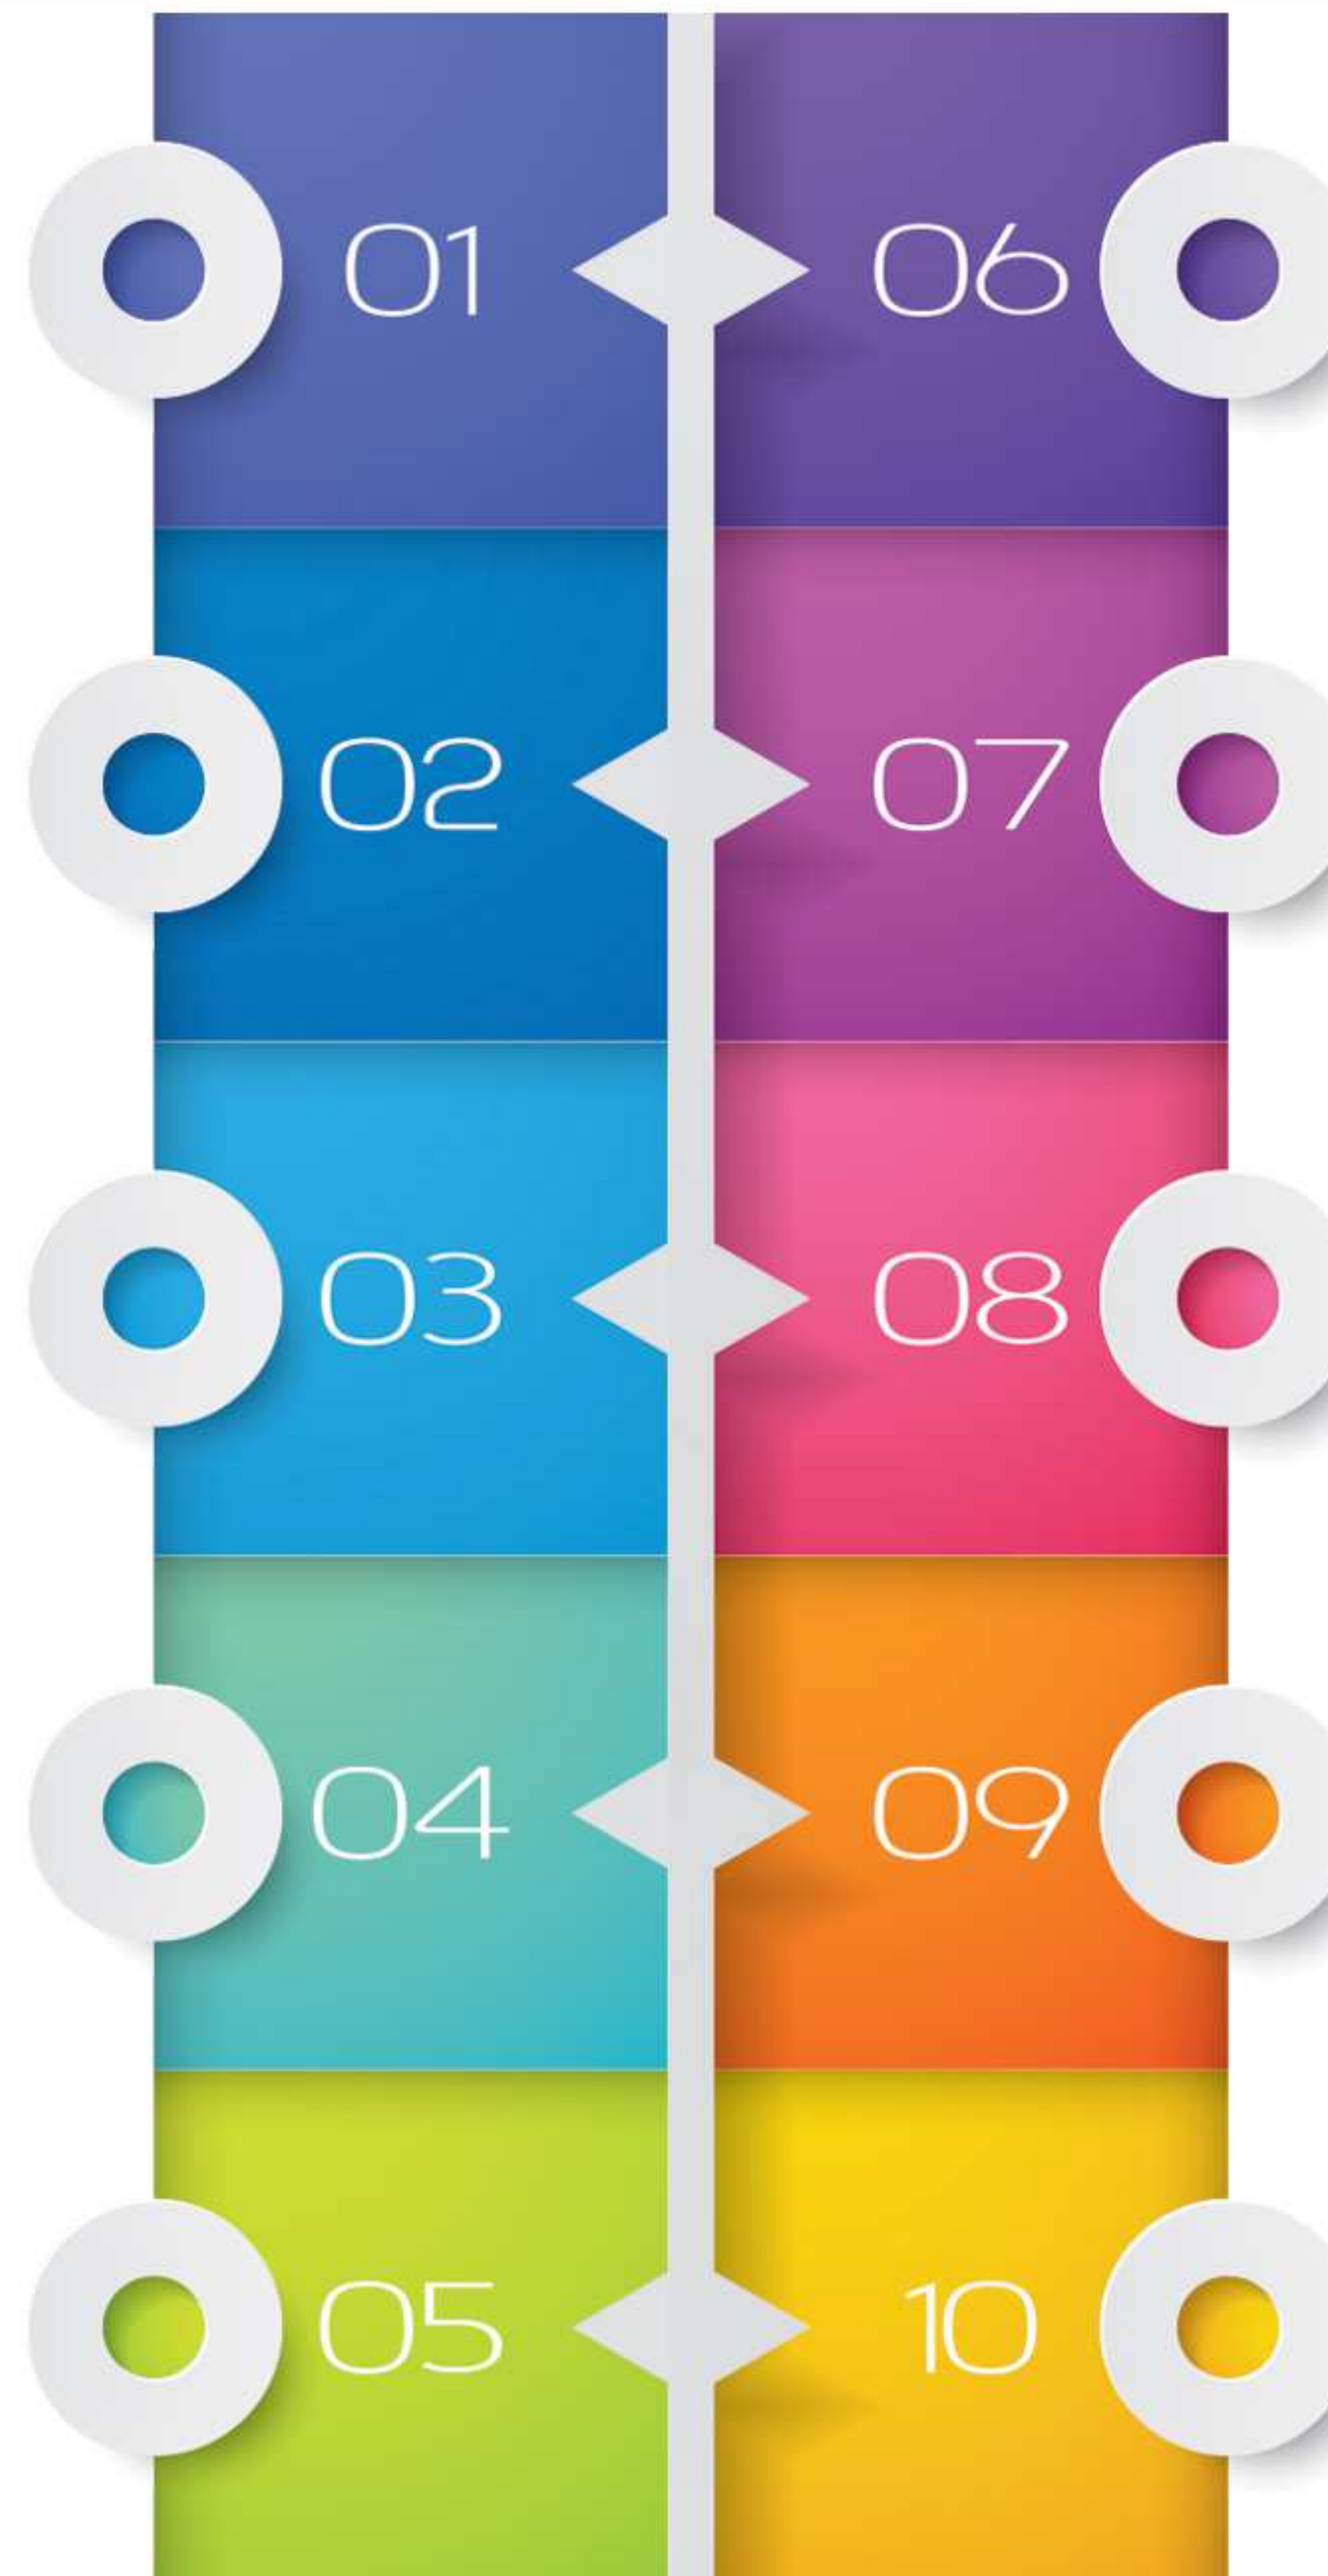

As your organization grows, you keep adding IT hardware on a piece meal basis from various manufacturers and vendors. This creates major integration challenges.

DATA SECURITY

In the conventional IT setup, your organizational data is scattered over hundreds or thousands of end point devices that poses serious risks related to its security.

PRODUCTIVITY

If your employees don't have access to the workplace for some odd reason, productivity would either suffer or be non-existent unless the situation subsides.

ADMIN EXPENSES

Having a large IT hardware footprint spells further bad news for your operating expenses, which will keep swelling on account of upgrading and maintaining hardware resources.

LOWER OPERATING EXPENSES

As DaaS uses the hardware resources of your CSP, you no longer need to invest in high spec end point devices. You can make do with relatively obsolete IT hardware for a much prolonged period as your end point devices are just used for inputs.

ENHANCE ORGANIZATIONAL AGILITY

DaaS solutions are highly agile, which in turn improves the agility of your organization. You can easily deploy and decommission Virtual Desktops at will, without ever worrying about the underlying hardware resources, which are managed by your CSP.

CENTRAL DEPLOYMENT OF APPLICATIONS

Over the DaaS solution, you no longer need to install, update or patch productivity applications on each end point device. All this needs to be done once at the data center level and the impact is universally passed on to all your Hosted Desktops deployed.

BUSINESS CONTINUITY

DaaS solutions are nearly immune from disruptive events such as earthquakes, floods, strikes and pandemics etc. Your workforce can remain fully productive even if they cannot physically turn up at the workplace.

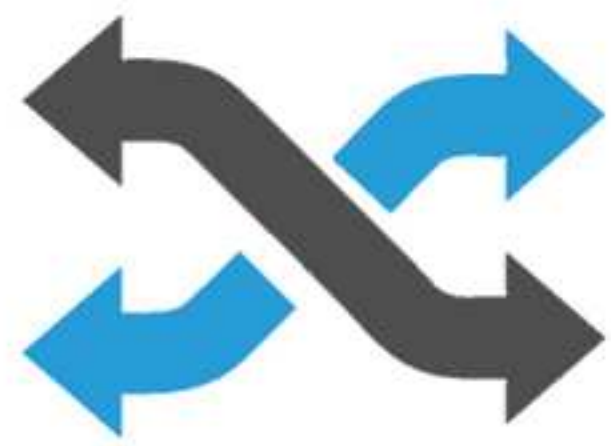

Why Choose Secure Cloud Desktop (SCD)?

Secure Cloud Services for your online business since 1999.

.Reliable .Secure .Speed .Scalable .Manageable .Compliant

Below are a few compelling reasons you should switch to a Secure Cloud Desktop instead of a conventional personal computer.

Flexible

With SCD, your data and applications move with you. You can use multiple devices such as smartphone, tablet, laptop or desktop to access your apps and data over the SCD.

Productive

If you have an SCD, you can remain productive even without turning up for work. All your data and applications are accessible from the comfort of your home or while you are on the move.

Efficient

The server that houses your SCD packs a lot of processing power. Any task you execute on the SCD will use the resources of the server, instead of the machine used for login. This will result in efficiency.

Versatile

You can access your SCD from devices running different operating systems. The compatible operating systems include Windows, Linux, Mac, iOS and Android. The broad choice of operating systems makes SCD a highly versatile cloud solution.

Economical

In SCD, the resources of the Cloud Service Provider will be used. You can execute work even from a low spec machine or device. This will save you the additional cost of keeping your personal hardware up to date.

Secure

In case of SCD, all your data and applications will be stored safely in a central server of the Cloud Service Provider like XcellHost. There are multiple layers of security before access is granted to the sensitive data.

Compliant

The data centers of Cloud Service Providers (CSPs) like XcellHost comply with industry leading standards of data security. At times, this is also mandated by the law when data of sensitive nature is involved.

User Experience

One more advantage of using an SCD is that CSPs use licensed software and productivity applications. This results in a seamless user experience, unlike a pirated software that keeps crashing or generating errors.

Premium Cloud Desktop Infra

Secure Cloud Services for your online business since 1999.

Secure Cloud Desktop Security Features

Secure Cloud Services for your online business since 1999.

.Reliable .Secure .Speed .Scalable .Manageable .Compliant

Secure Infrastructure

ISO 270001 Certified, Multi-Tier Security Infrastructure. Hosting in Tier 4 Datacenters

Virtual Firewall

Next Generation firewalls combine application awareness and deep packet inspection to give companies more control over applications while also detecting and blocking malicious threats.

Encrypted Backup

We take backup every 3 hours and the backup is encrypted & ransomware proof

Encrypted Data

Your Data is utmost secured with our server as we assure that your account is accessible to only the authorised users.

Endpoint Security

Block cyber threats before they compromise your system Through its traffic filtering capability, EDR stops ransomware attacks at all stages: before, during and after the attack.

Multi-Layer Security

With an enhanced anti-DDoS solution & multiple ISO/IEC certifications, we cover every aspect of security & business continuity.

SSL VPN

SSL VPN lets remote users access Web applications, client-server apps, and internal network utilities

Site to Site VPN

IPsec security method is used to create an encrypted tunnel from one customer network to remote site of the customer.

99.95% Uptime SLA

We guarantee that all critical infrastructure components will be available 100% of the time in a given month, excluding scheduled maintenance.

Secure Cloud Desktop Use Cases

Secure Cloud Services for your online business since 1999.

.Reliable .Secure .Speed .Scalable .Manageable .Compliant

Work at Home Programs

Embrace the growing remote working and work at home trends with confidence.

Contact Centers

Scale rapidly and efficiently to accommodate new agents or seasonal demand spikes.

Cloud Desktop for Remote Teams

Provide to your employees accesses from their own devices, and offer them the machines they need without any IT skill set necessary.

Cloud Desktops For CA's

Access your favorite accounting software directly in your web browser from anywhere with internet access, at any time and with everyone you want.

Business Continuity

Ensure desktops are still available in the case of an unexpected interruption.

Third Party Contractors

Ramp contractors quickly while maintaining security and control.

Mergers and Acquisitions

Quicker, easier tech integration during mergers or acquisitions.

Cloud Desktops For Lawyers

Access your favorite legal software directly in your web browser from anywhere with internet access, at any time and with everyone you want.

For Work at Home Programs

Secure Cloud Services for your online business since 1999.
.Reliable .Secure .Speed .Scalable .Manageable .Compliant

Increased Employee Satisfaction

Enhance employee productivity and engagement by allowing a flexible, work at home model with enterprise tools.

Secure Sensitive Data & Intellectual Property

Over 100 user controls to regulate users' ability to transfer data (i.e. copy/paste functionality, USB drives, etc.).

Centralized, Simplified IT Management

Deploy and support remote employees by easily delivering app and resources via cloud desktops.

Reduced Hardware Costs

Implement a BYOD model or utilize accops endpoint solutions to lower hardware costs.

Expand Your Hiring Pool

Hire the best talent for your organization rather than being bound by physical office constraints.

Softphone Compatibility

Allow users to make high-quality voice and video conferencing calls through their cloud desktop.

For Contact Centers | BPO | KPO

Secure Cloud Services for your online business since 1999.
.Reliable .Secure .Speed .Scalable .Manageable .Compliant

Secure Data

More than 100 user controls to regulate users' ability to transfer data thereby protecting sensitive data, regulated information or IP.

Centralized Management

Focus IT resources on business process and customer satisfaction instead of endpoint device management and desktop support.

Personalized Experience

Customize application delivery, security and controls according to job role, group or campaign (i.e. shift supervisor, agent, quality assurance, etc.).

Minimize Capital Investment

Avoid costly hardware refresh cycles, infrastructure overbuying and capital intensive in-house VDI deployments while managing a more consistent, monthly operating cost.

Robust App Support

Seamless support for HD video, VOIP softphone integration and other necessary apps directly within the cloud desktop to keep agents productive.

Increased Agent Productivity

Quicker provision timelines, faster login times and accurate troubleshooting mean agents spend more time in front of customers and less time getting setup or offline.

For Mergers & Acquisitions

Secure Cloud Services for your online business since 1999.
.Reliable .Secure .Speed .Scalable .Manageable .Compliant

Easily Deploy to Employees

Bring hundreds or thousands of employees onto a consistent platform within days – not months.

Secure Sensitive Data & IP

Over 100 user controls to regulate users' ability to transfer data (i.e. copy/paste functionality, USB drives, etc.)

Centralized IT Management

Handle desktop provisioning, patching and updates from a central location. No physical device access needed.

Reduce Hardware Costs

Deploy cloud desktops to employees' and contractor's existing endpoints, including laptops and thin clients, regardless of OS.

High Performance Experience

Purpose built infrastructure delivers 99.99% availability on high availability configurations and supports capability for VOIP softphone solutions and high definition video.

Instantly Increase Compliance

Issue PCI or HIPPA compliant virtual desktops to ensure the entire organization is operating within a compliant desktop environment from day one.

For Third Party Contractors

Secure Cloud Services for your online business since 1999.
.Reliable .Secure .Speed .Scalable .Manageable .Compliant

Immediate Productivity

Get contractors productive today without waiting for a laptop, desktop or VPN connection.

Secure Sensitive Data & IP

Over 100 user controls to regulate users' ability to transfer data (i.e. copy/paste functionality, USB drives, etc.)

Centralized IT Management

Deploy and support third-party contractors without ever touching their endpoint.

Save Money Through BYOD

Allow contractors to use their own endpoints to access cloud desktops using the controls and security parameters you prescribe.

High Performance Experience

Purpose built infrastructure delivers 99.99% availability on high availability configurations and supports capability for VOIP softphone solutions and high definition video.

Scale Quickly

Quickly provision or remove contractor desktops from your pool to meet the needs of your business.

For Business Continuity

Secure Cloud Services for your online business since 1999.
.Reliable .Secure .Speed .Scalable .Manageable .Compliant

Sustained Productivity

When office access is impossible, enable workers to maintain productivity using any device, anywhere with a reliable internet connection.

Geographic Separation

Secondary site and operational reserves can be configured to warm-hot or hot-hot scenarios to get backup desktops online quickly.

Complete Backup & Replication

Backups and replication of desktop images and data from the primary site to secondary site based on customer interval requirements and needs.

Centralized IT Management

Deploy and support employees or third-party contractors by easily providing necessary applications & resources directly to their cloud desktop.

Customized DR Plan

Consult with our dedicated engineering team to come up with a plan that meets your RTO, RPO and budget requirements.

24x7 Expert Managed Desktop Support

Secure Cloud Services for your online business since 1999.

.Reliable .Secure .Speed .Scalable .Manageable .Compliant

Available 24/7

Lights are always on at XcellHost for your outsourced web hosting support. You & your customers will get lightning-fast response 24 hours a day, 7 days a week.

Multi-Channel Support

Your customers can reach us in a channel they are comfortable with – Phone, Live Chat, Help desk or Email.

Customized Support SLA

Need 15 minute responses to tickets? 5 minute response to alerts? You can do all that & more with dedicated support.

Single Point Of Contact

An account manager familiar to you will act as the single point of contact at XcellHost for everything that relates to operations, projects, quality & more.

24/7 Monitoring & Rescue

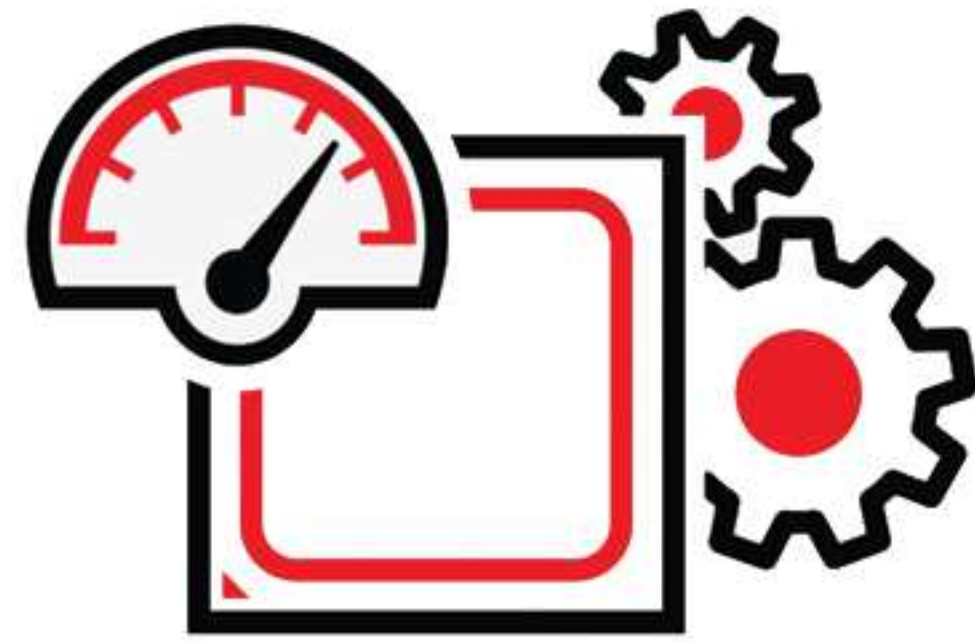

We prevent customer complaints by monitoring your servers 24/7 and quickly rescuing failed or unresponsive services.

24x7 Expert Managed Desktop Support

Secure Cloud Services for your online business since 1999.

.Reliable .Secure .Speed .Scalable .Manageable .Compliant

Server Performance Tuning

We'll keep your server blazing fast through periodic performance tuning and by fixing server bottlenecks in the event of server load spikes.

Server Updates & Patching

We will apply server updates as soon as they are available. When there are unpatched vulnerability disclosures, we'll apply a hotfix to prevent exploits.

Security Audits & Hardening

We'll audit your server every few weeks and re-harden the server to make sure it can block all new kinds of attacks.

Backup Management

To make sure you'll always have a reliable backup, we'll monitor your backup process, fix backup errors, and periodically test backup integrity.

Pre-Sales Support

If your prospective customers need help understanding your service features, we'll guide them towards the right package.

Your Journey to Secure Cloud Desktop

Secure Cloud Services for your online business since 1999.

.Reliable .Secure .Speed .Scalable .Manageable .Compliant

In the modern era of Information & Technology, the developed businesses which were dependents on PCs (desktops) & Laptops are switching over to Cloud Workspaces. XcellHost has emerged as an enormous revolution in IT by providing Cloud Workspaces that let you deliver your resources effortlessly from various platforms like Windows, Macintosh, Linux, Android etc.

Why XcellHost For Secure Cloud Desktop

Secure Cloud Services for your online business since 1999.

.Reliable .Secure .Speed .Scalable .Manageable .Compliant

Best Desktop as a Service (Daas) Provider

Desktop-as-a-Service, or DaaS, is a desktop delivery solution that enables businesses like yours to effectively and securely deliver cloud-based desktops and applications to your workforce, regardless of their physical location or the device being used to access their workstation. DaaS removes many of the security and logistical challenges typically seen with traditional desktop delivery solutions, or even on-premise VDI solutions.

WHY YOU SHOULD BUY THE CLOUDDESKTOP ON THE GO

Extends PC lifespan

Dramatically extends the life of your legacy PC, creating the perfect stepping stone to thin client computing.

Instant Roaming

With CloudDesktop On the Go, you can easily hop from location to location taking your thin client with you. Your desktop and settings travel with you.

Boosts productivity

Using an embedded & hardened Linux operating system, CloudDesktop boosts your user's productivity by focussing users.

Highly Flexible

Equipped with the latest thin connectivity client software, CloudDesktop will connect to almost any server framework including Citrix®, VMware® and Microsoft®.

Secure and stable

CloudDesktop has been designed to be secure, using a hardened Linux framework, making it perfect for corporate and financial environments

Enterprise management available

CloudDesktop is manageable using Fusion Professional, available as an affordable cost option. Fusion Professional delivers enterprise grade features and quality.

Benefits

Users can hot desk or roam, carrying their thin client with them

Dramatically extends the working life of legacy PCs

Provides a unique stepping stone to thin-client computing

Compatible with Microsoft, Citrix and VMware's virtualization protocols

Central management, using Fusion Professional included with CloudDesktop

Fast and simple installation,

Extremely low cost

Vastly enhanced security & Virus-free workstations

Frequently Asked Questions (FAQ)

Secure Cloud Services for your online business since 1999.
.Reliable .Secure .Speed .Scalable .Manageable .Compliant

WHAT IS SECURE CLOUD DESKTOP?

Desktop is an untethered virtual workspace that provides employees with access to all of their applications, files and data from the XcelHost hosted cloud on nearly any internet-enabled 'smart' device.

HOW DO I ACCESS CLOUD DESKTOP?

Desktop from netbooks, ultra books, iPads and Android tablets, from any computer running Windows XP or greater, Linux, Macs, or from low-cost, dedicated thin client devices.

WHAT HAPPENS IF I WANT TO USE A TABLET COMPUTER?

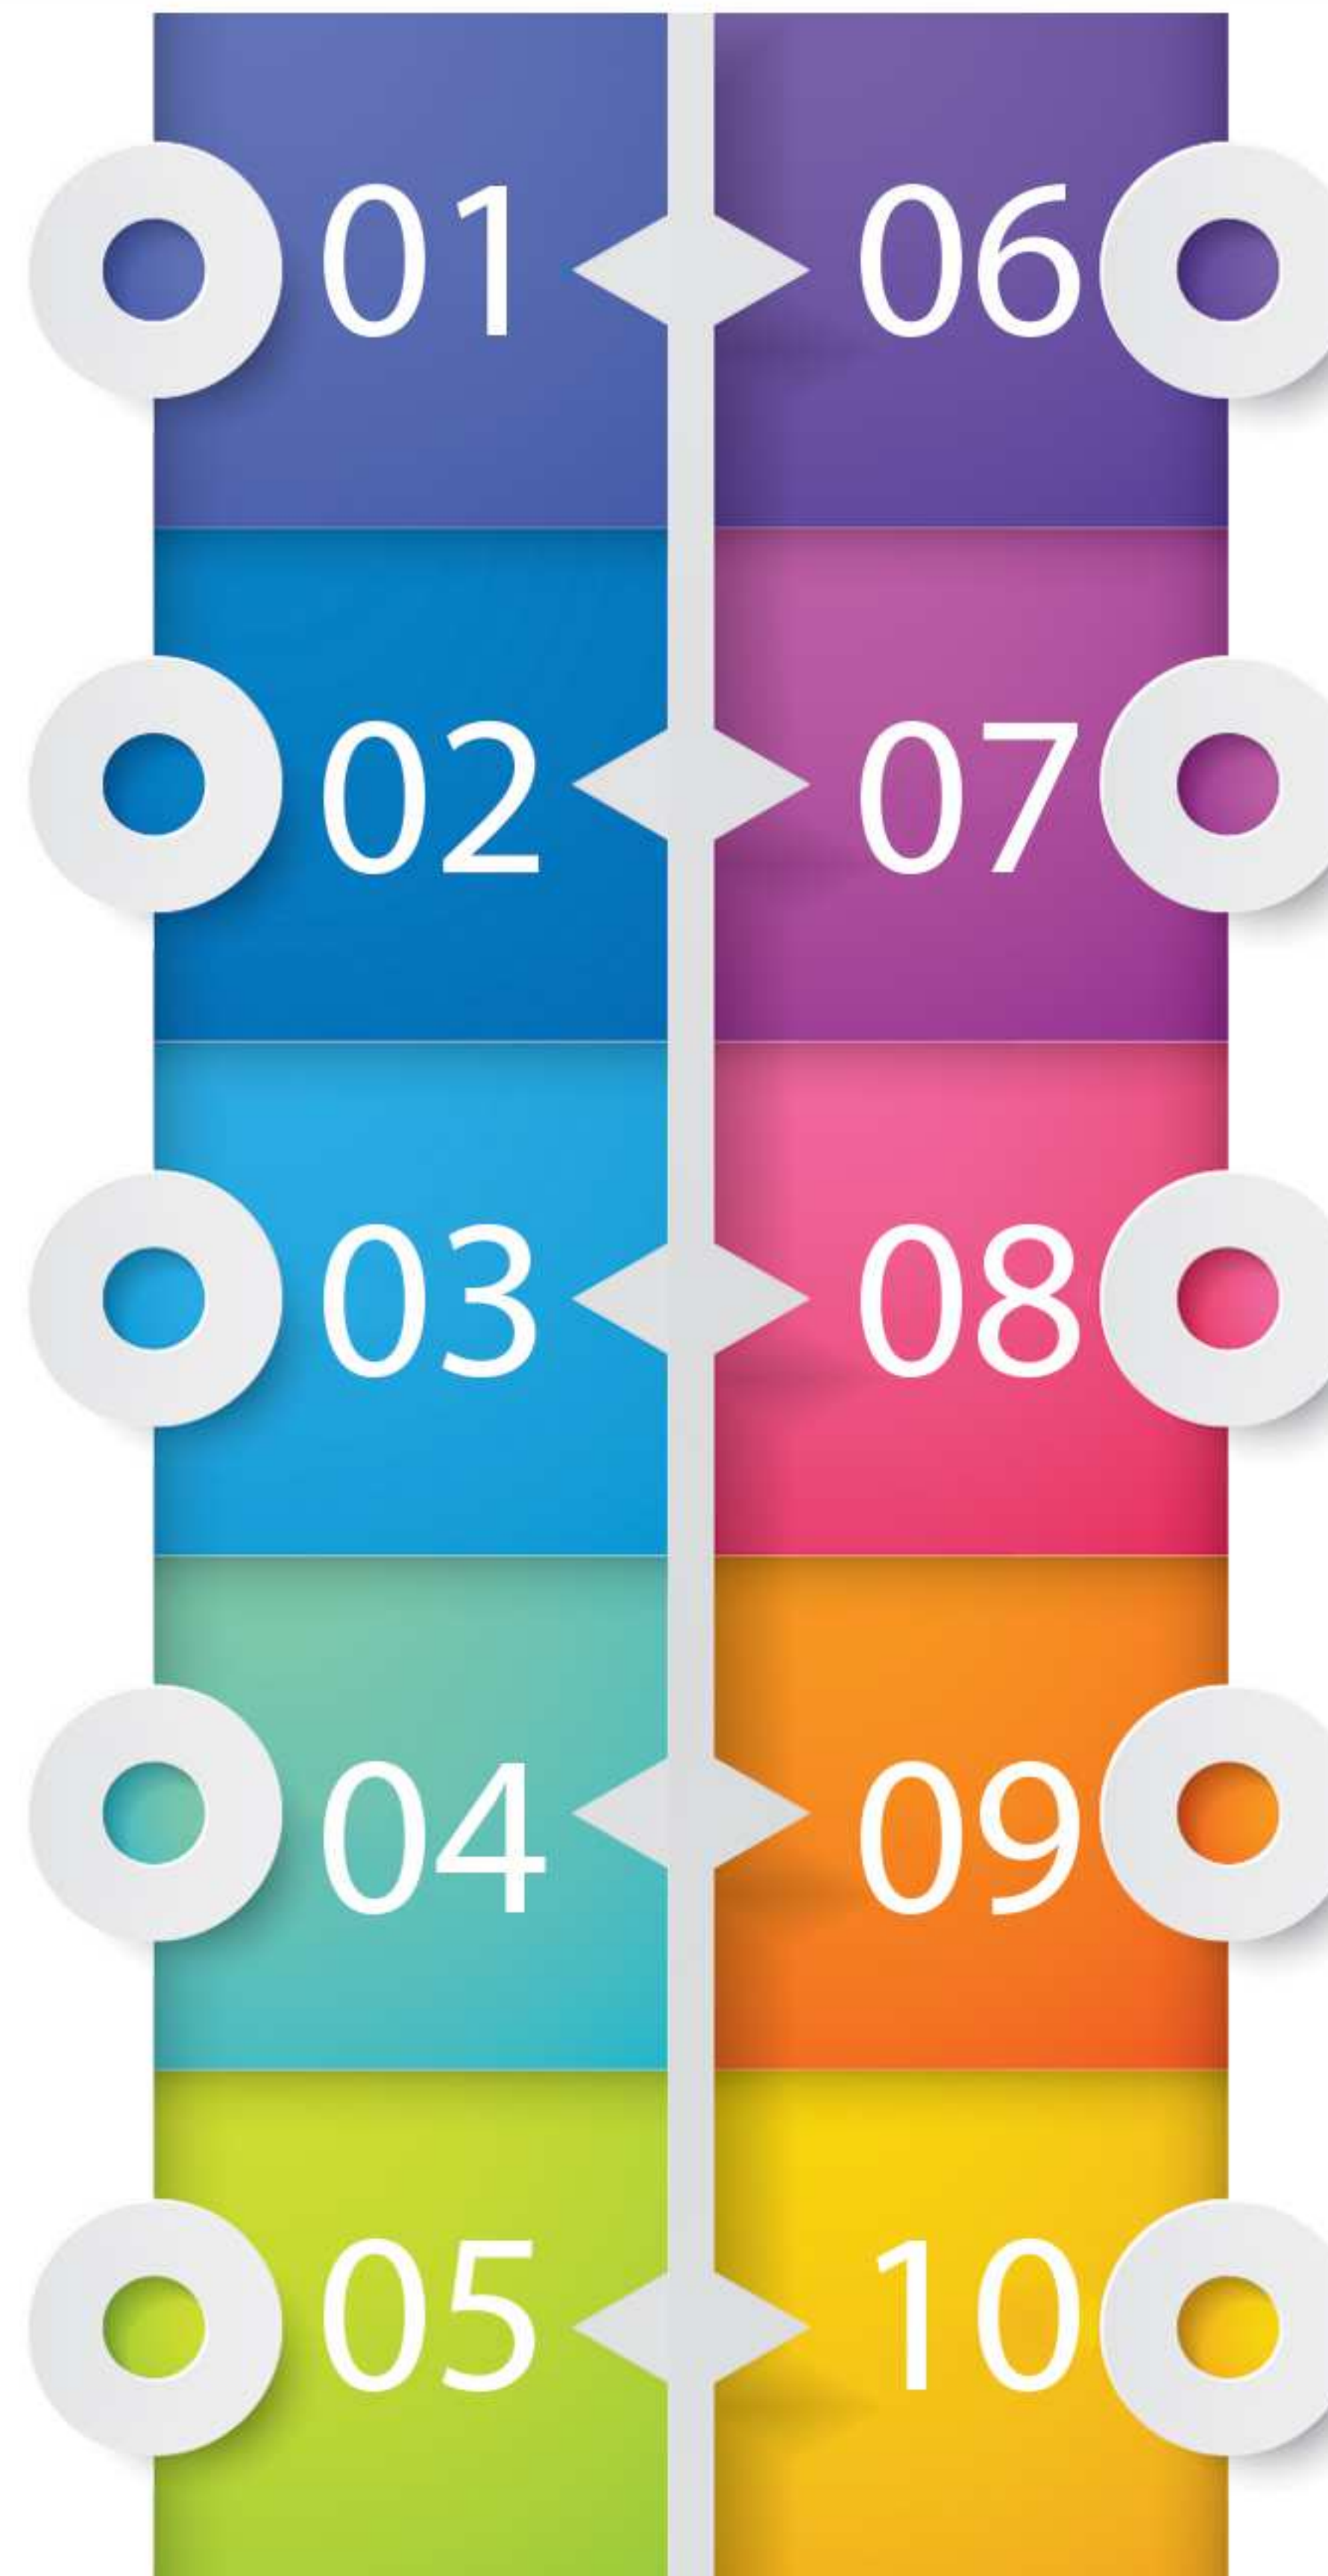

On some tablets it's possible to install software for remote desktop connectivity, however the overall experience won't be as rich as from a PC or laptop computer due mainly to screen size restrictions.

IS THIS ALL OR NOTHING – DOES EVERYONE IN THE COMPANY HAVE TO BE ON IT?

Desktop is not an all or nothing proposition. While the most common deployment, simply due to proximity, is to bring both desktops and line of business applications within the XcelHost hosting environment, businesses can select just the users for whom it makes the most sense, and hybrid deployment models are supported.

THIRD PARTY INTEGRATIONS

Secured option to connect to your third party apps (eg ERP / CRM)

WHEN CAN I ACCESS CLOUD DESKTOP?

Anywhere that you have internet connectivity including cable modem and 3G/4G wireless connections – from home, from the coffee shop, from the airport, from the office, etc.

WHICH STYLE OF WINDOWS DESKTOP DO YOU OFFER?

Windows 2019 environment with some elements being delivered from Windows 2016 servers. This means we support Windows 7, 8 and 10 style desktops. ng to local printer is possible using our Cloud Client.

CAN I USE LINUX?

Yes, you can download the free remote desktop client. Please note there are some specific issues with printing from Linux and you are advised to call our Helpdesk to discuss.

WHO MANAGES MY APPLICATIONS AND DESKTOP?

Your current administrator or third party consultant is responsible for your Active Directory, users' permissions and policies, desktop applications, and endpoint device support. XcelHost manages Cloud Desktop pools and licensing, stable and secure virtual infrastructure, network, and consumable resources (CPU, RAM, Disk).

HOW DO MY PERIPHERALS SUCH AS PRINTERS AND USB DEVICES WORK?

Most USB peripherals that are supported in Windows will be supported in The XcelHost Office: Desktop. Administrators can control the types of peripherals that can be accessed within the virtual desktop by implementing policies that make the most sense for their organization and user community.
