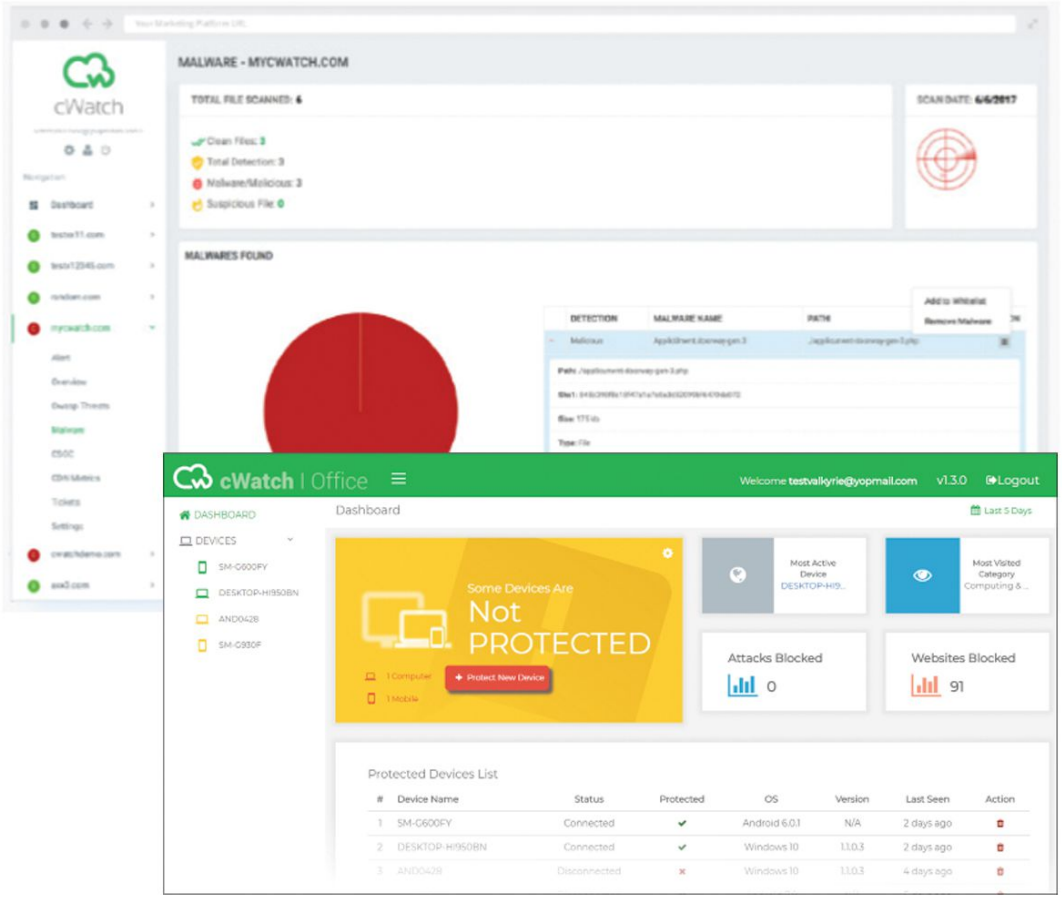
  Actionable intelligence on mitigating OWASP 10 Threats.

Website Security Benefits

Secure Cloud Services for your online business since 1999.

.Reliable .Secure .Speed .Scalable .Manageable .Compliant

Powered By: cWatch by COMODO



- Quickly identifies and eliminates malware
- Blocks malware before hitting the network through quarantine management of detected threats
- Instant alerts and remediation steps
- Automated behavioral analysis for zero-day malware detection
- Custom scanning capabilities – scheduled or on demand – with unlimited page scans included
- Full reporting capabilities - Site, scan and summary reports in multiple formats including PDF and HTML
- Combines advanced analytics with human expertise

Benefits of cWatch WAF

Secure Cloud Services for your online business since 1999.

.Reliable .Secure .Speed .Scalable .Manageable .Compliant

Powered By: cWatch by COMODO

Zero Day Immediate Response

Regular updates of virtual patches for all web sites under management and immediate response to apply a patch for the zero-day attacks when they become known to the public.

Stop Website Attacks and Hacks

Protects vulnerable websites by identifying and removing malicious requests and thwart hack attempts. Also focuses on application targeting attacks for example Joomla, WordPress and plugins, Drupal etc

Malicious Bot and Brute Force Prevention

Malicious bots and brute force attacks are blocked from websites. Protection of account registration forms and login pages from various attack vectors plus protection from application denial of service, reconnaissance attacks and web scraping.

Distributed Denial of Service Protection

Globally-distributed Anycast network enables efficient distribution of traffic. It explicitly blocks all non-HTTP/HTTPS-based traffic, with a current network capacity in excess of 1 TB/s. Each PoP has multiple 10G and 100G ports, designed to scale and absorb very large attacks

XcellSecure

Benefits of cWatch CDN

Secure Cloud Services for your online business since 1999.

.Reliable .Secure .Speed .Scalable .Manageable .Compliant

Powered By: cWatch by COMODO

Faster Speeds

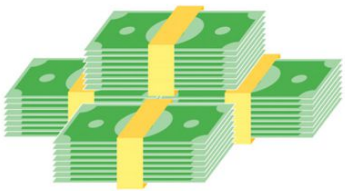
website data is copied to 29 locations around the world ensuring that data has shorter distances to reach a customer wherever they are and providing a faster experience. A person based in Europe will load data from a CDN node in Europe, even if the website is hosted on a server in the USA.

SEO Rewards

search engines reward websites using CDN with higher rankings on search results.

High Availability

since the CDN will be serving content, with virtually unlimited capacity, traffic can be scaled up & down automatically. Even unexpected to surges in traffic will no longer be a challenge to the server, as it can maintain speed and optimal speed under critical conditions



Save Money

leverages compression and browser caching technology to save on bandwidth usage and costs.

Content Protection

by putting in place flexible key and proxy authentication, you can protect "premium/paid" content and prevent hot-linking.

Security

cWatch CDN is the only web services platform built on security, with a fortified machine learning core that aggregates, analyzes and syndicates real-time threat data both to and from each of our secure services.

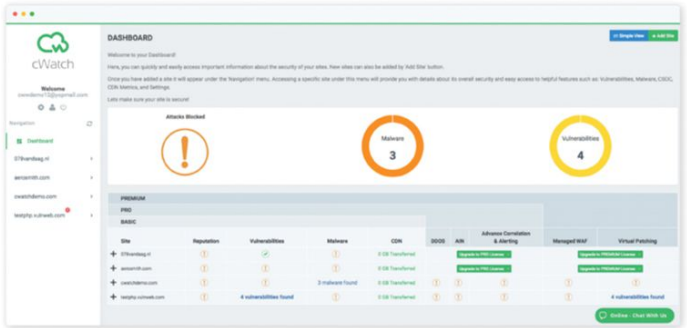
XcellSecure

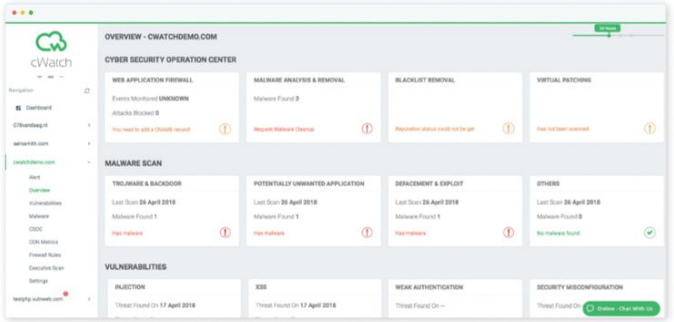
Benefits of cWatch SIEM

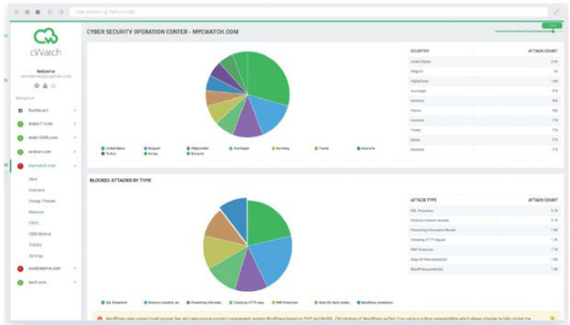
Secure Cloud Services for your online business since 1999.

.Reliable .Secure .Speed .Scalable .Manageable .Compliant

Powered By: cWatch by COMODO







Real-time Visibility

- Collects logs and events from network and web assets, security devices, operating systems, applications, databases, and identity and access management products
- Processes vulnerability information from network, web and application vulnerability scanners
- Scans and detects malware embedded in applications

Prioritized Alerts

- Performs immediate event normalization and correlation for threat detection and compliance reporting
- Reduces billions of events and flows into a handful of actionable offenses and prioritizes them according to business impact

Threat Management

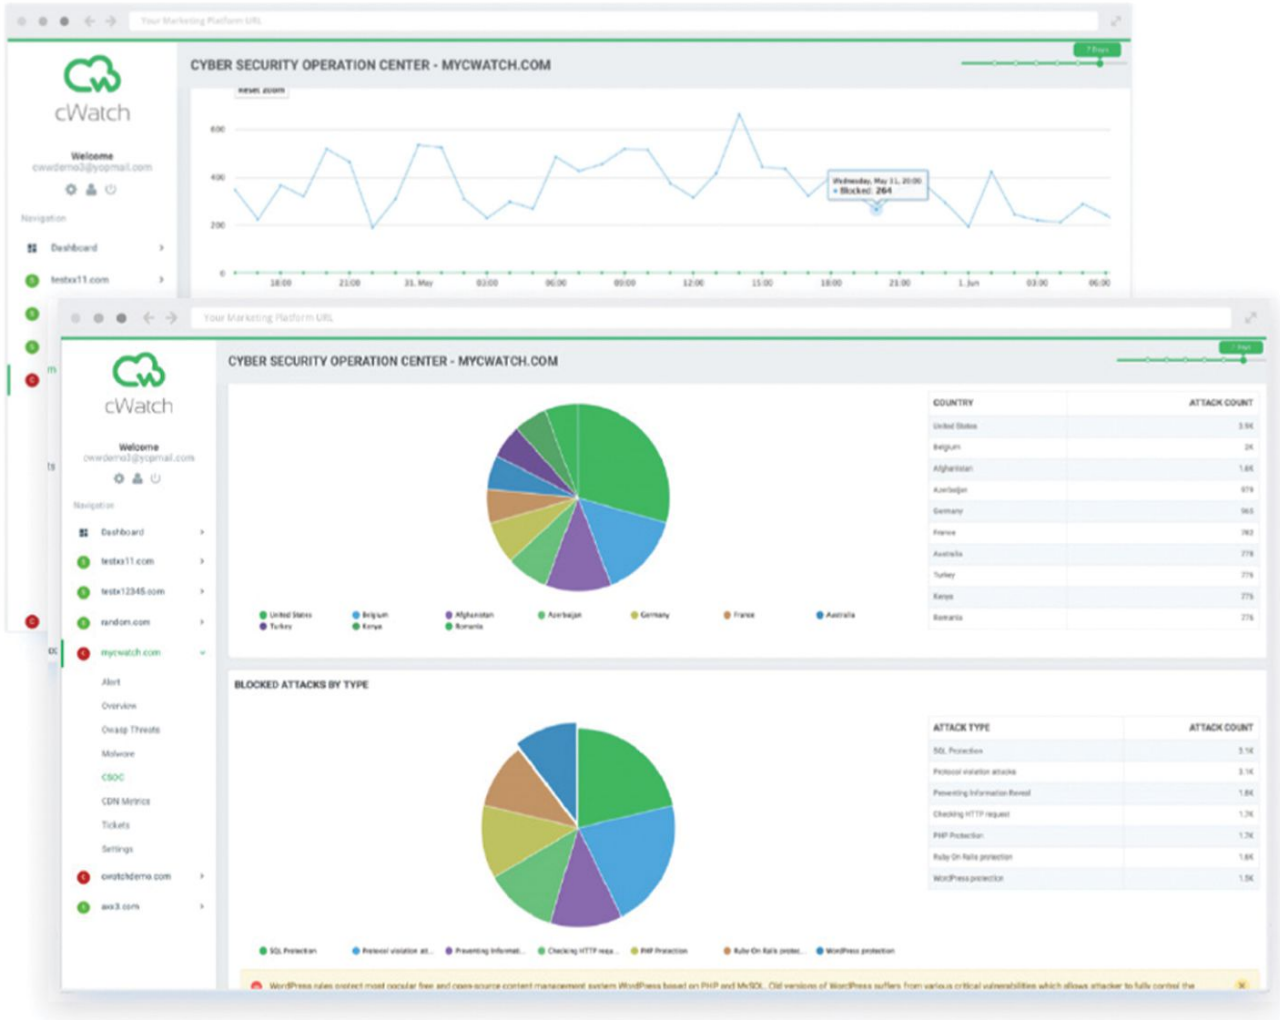
- Performs activity baselining and anomaly detection to identify changes in behavior associated with applications, hosts, users and areas of the network
- Senses and tracks significant incidents and threats, providing links to all supporting data and context for easier investigation
- Performs event and flow data searches in both real-time streaming mode or on a historical basis

Cyber Security Operations Center (CSOC)

Secure Cloud Services for your online business since 1999.

.Reliable .Secure .Speed .Scalable .Manageable .Compliant

Powered By: cWatch by COMODO



- 24x7x365 surveillance by a team of certified security analysts
- Real-time event monitoring
- Incident management and response
- Expert tuning and configuration management
- Continuous policy and prevention updates
- Fully managed WAF
- Threat investigations and analysis
- Risk assessment reports
- Reverse malware and suspect application engineering
- Blacklist repair

XcellSecure

cWatch Web provides protection against the OWASP Top 10

Secure Cloud Services for your online business since 1999.
