

Managed Endpoint Protection (EPP)

Secure Cloud Services for your online business since 1999.

.Reliable .Secure .Speed .Scalable .Manageable .Compliant

XcellHost Certified Security Experts identify, secure & manage the security of endpoint technologies, strengthening your ability to prevent, detect & respond to today's challenging security threats.

Why Manage EPP

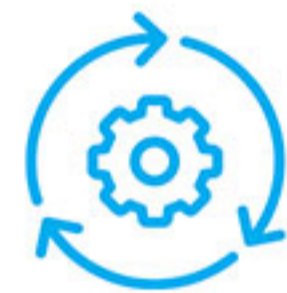

True Zero-Day Prevention

AI Driven Malware Prevention

SIEM integration & Script Management

Service management & reporting

Fault/incident management

We are SOC 1, SOC 2, Protected B, & PCI certified in our data centre controls

Easily deployed via the cloud portal or with on-premise dedicated infrastructure

Key Benefits

Simplifying Management of Security Updates

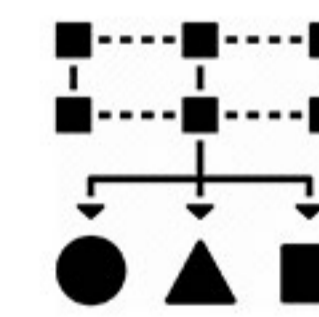

Global SOC 24/7/365

Optimizing Endpoint Security Measures for Both Security & User Experience.

Renders malware virtually useless by proactively preventing malicious code from executing on the host

Data classification Endpoint anti-virus & anti-malware

Provides forensic information on attempted attacks & infection vectors

Fully PCI DSS compliant

Supported Tools

LifeCycle Modules Covered in Managed EPP

XcellHost is not limited to clients, but also supports server endpoints. XcellHost collects indicators, analyses them in its multi-stage analysis process, and alerts XcellHost Managed SOC, enabling active threat management 24/7. The multi-stage analysis include:

* Achieves Instant Security Maturity * Maximizes Security Productivity * Reduces Time to Remediate * Mitigates and Transfers Risks
