

COVID-19 Testing Portal

Employee Experience

Our employee interface provides your workforce with direct access to manage their end-to-end COVID-19 testing cycle in a secure and HIPAA compliant environment.

1 Registration and Profile Setup

Employees receive an email invitation from their manager prompting them to register with our portal and create their profile.

To complete registration, employees provide applicable consents and input demographic information pursuant to HHS guidelines, via our portal's employee interface.

2 Test Appointment

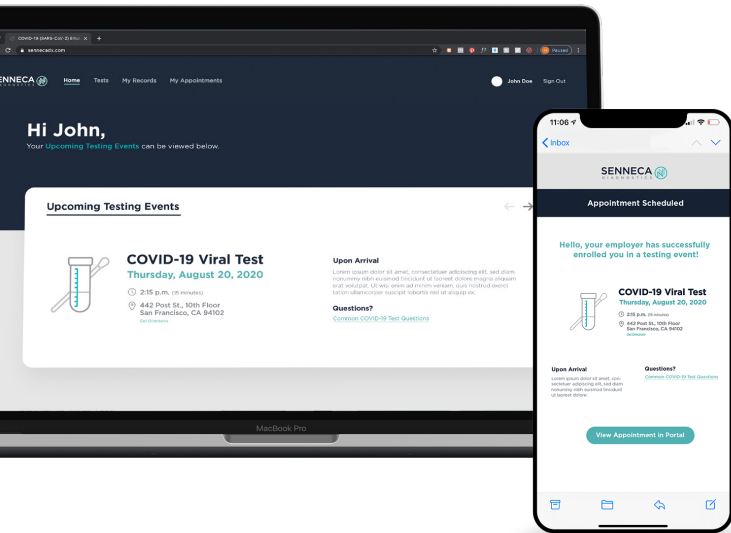

Group Enrollment

Management can schedule test appointments for employees, at which time, they receive an email invitation with details of their upcoming appointment.

Once logged into our portal, employees can print their event tickets and/or contact their site manager to ask questions.

Self Enrollment

Management can allow employees to choose their desired location, date, and time for testing, and cancel or reschedule their appointment, via our portal.

3 View Test Results

Once test results are posted, our portal notifies employees via email, inviting them to log-in and view their results in our portal's HIPAA compliant environment.

Employees can also access their results for previous tests via our portal at anytime.
