

DESTROY POLLUTANTS IN SMALL SPACES.

THE BREEZE.

- Whisper-quiet motor
- Compact design
- Ideal for spaces up to 160 sqft
- All-natural disinfecting
- Light-weight
- HydroClear Technology

The Breeze is the newest addition to the ClearZone family of products that combines thoughtful design with powerful cleaning properties. It is a compact product that is ideal for use in exam rooms, elevator, offices, restrooms, hallways and more. It is lightweight making it easy to move from room to room. The motor is so quiet it will not disrupt even the lightest sleepers. Using the Breeze is as simple as turning the machine on, eliminating human error and decreasing labour costs.

The Breeze uses our HydroClear Technology, harnessing the power of UV light, catalytic filters and electrostatic fields to generate hydroxyls and inactivate pathogens continuously in occupied spaces. ClearZone's HydroClear Technology is an air-based solution that reduces pathogens on hard and soft surfaces and in the air. UV-C is a germicide, which means it can kill up to 99.99% of bacteria and viruses. The Breeze is environmentally sustainable leaving behind no residue and requiring no chemical refills. It has proven to kill everything from allergens to bacteria and viruses.

We work with top laboratories to privately test our products and proprietary process to meet federal and international standards. We focus on science and safety, so you can focus on your business.
