

Content On Demand

Why Using **Content On Demand** Makes Sense

In these days of Covid-19, funding for small and large content creation projects is getting harder every day. If you have this problem, then maybe ENGworks can help. We have created an on-demand web service that allows practitioners and Building Product Manufacturers the opportunity to create much needed BIM content in bite size volumes at a lower overall cost and quicker turnaround.

Our Content On Demand (CoD) service is available entirely online and self-serve

Content

DELIVERS

- High Quality
- Multi-Application
- Multi-Discipline
- Design To Construction Product Content For Your Immediate Project Requirements

On

MORE

- Small Projects, Quick Turnaround
- Pick The Formats You Need
- Quality Deliverable Reasonable Price

Demand

BENEFITS

- Save Time and Money
- Global Service to Local Projects
- Guaranteed Value
- Respond to Specific User Demand

Request Content

Features:

Model Ownership

You own the models created and are free to use in whatever project you wish.

Quality Matters

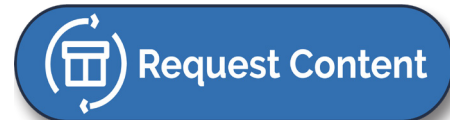

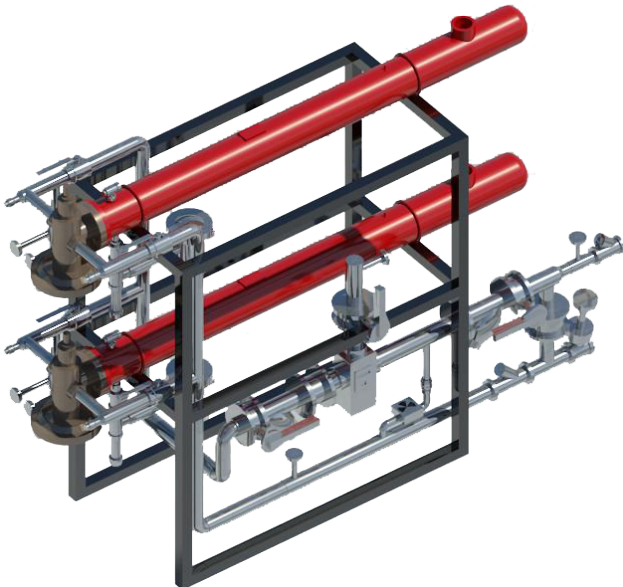

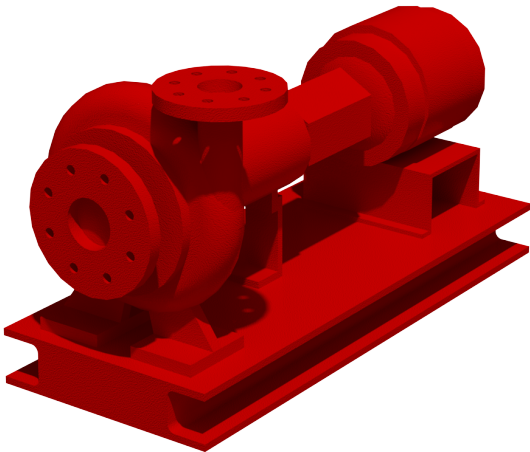

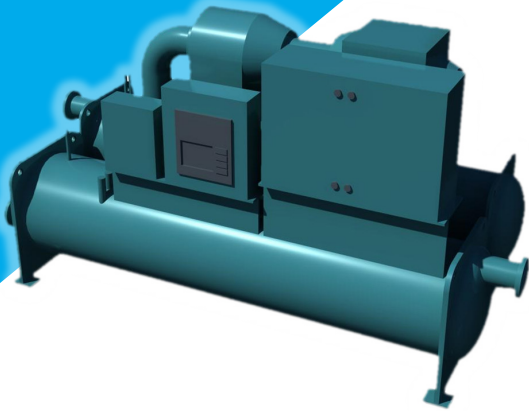

Careful consideration is given in the development of all models to ensure that they behave correctly in each application, contain the metadata and meet the standards and codes expected.

Localization

All content is created locally based on the project requirement and location, especially with respect to language, units and local construction codes.

End User Expertise

"Users creating content for users" You can have confidence that the content is being created to meet the demands of your application and workflows such as visualization, analysis, connectivity and performance
