

# FABRICATION CONTENT & DATABASE PACKAGES

## HOW WE WORK?

The development of these Fabrication Content & Database Packages has been a collaboration between ENGworks Global and eVolve MEP to curate the best content and services. These packages include manufacturer ITM content built by ENGworks Global and System Services built by eVolve MEP.

ENGworks Global takes great pride in the fabrication database that we have created over the past 10 years. This comprehensive database allows us to extract highly detailed spool drawings to be used in pre-fabrication. Our fabrication team has many years of experience producing accurate Shop and Fabrication drawings across multiple trades, including Structural, MEP, and Civil.

## ABOUT US

ENGworks Global advises owners, product manufacturers, design professionals, and contracting companies about expanding market share within the construction industry. We focus on the future of the industry and the future of the firms we serve.

**LET US HELP WITH YOUR  
FABRICATION NEEDS!**
