Colorectal Cancer Screening

The importance of getting a screening for colorectal cancer.

Getting screened for cancer is never an easy choice to make, but one that can be beneficial, as:

- Cancer screening tests can help find cancer at an early stage, before symptoms appear
- When abnormal tissue or cancer is found early, it may be easier to treat or cure¹.

When should I get a screening for colorectal cancer?

It is recommended that adults age 50 to 75 be screened for colorectal cancer.

Our Care Coordination team is here to help you.

The good news is that as a health plan member, you have access to complimentary care coordination services, which includes a quality and prevention benefit to help you keep track of visits and check-ups.

Our records indicate that you are due for a colorectal cancer screening. Your care coordination team will walk you through the process and answer any questions you have along the way.

Call for assistance.

Your care coordination team is always available to answer any questions. If you need assistance with finding a provider or have more questions, **please call your care coordination team at 1-844-218-3906.**
