

FOR THE MOBILE BUSINESS OWNER

# The Ruby app.

Ready to be freed from the confines of your office? With our app, all you need to run your business is Ruby and a cell phone. From setting your status to texting\* from your business number, double the power of your personal device with the Ruby app.

## Status updates

Set your preferences for when and where you want to take calls, who you would like to receive calls from, for what timeframe, and more!

## Call forwarding\*

Forward and unforward your calls with the touch of a button when we host your business number.

## Schedule your time

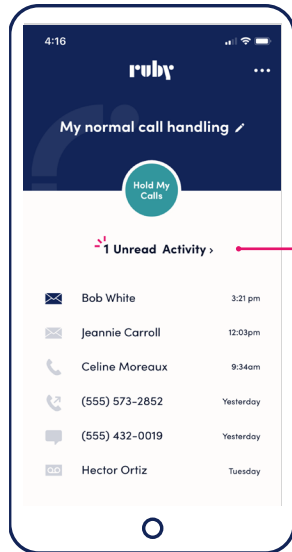

Create a call handling rhythm to align with your daily schedule.

## Contact integration

Add your saved contacts to your Ruby app, enabling our receptionists to greet your frequent callers with an added touch of familiarity.

## Voicemail access

Customize your own voicemail greeting and receive voicemail transcriptions when listening to a message isn't convenient.

## Business texting\*

Use your cell phone to text current and prospective customers from your Ruby-hosted business number.

## Home screen

View your status, hold your calls, send texts\* with your business number and access all your most recent activities from the app's home screen!

## Choose your caller ID\*

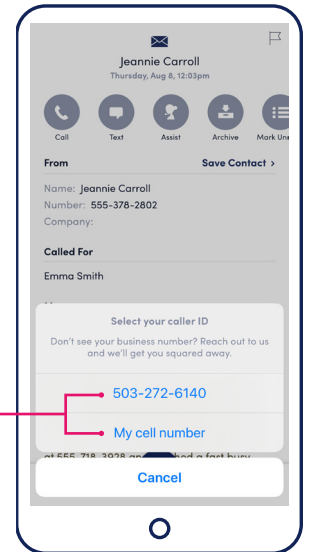

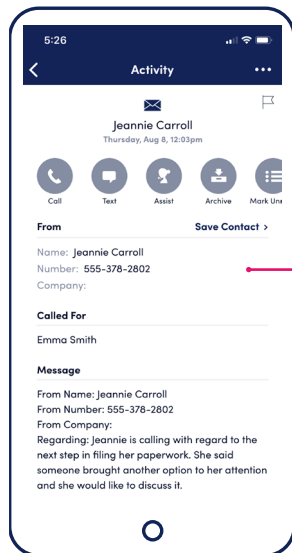

Make calls or send texts from your Ruby-hosted business number to keep your professional appearance polished and personal information private.

## Message details

Tap on any message from your team of virtual receptionists on the Home Screen to get the full scoop on who called and why.

## Monitor usage

Stay up-to-date on how many minutes you have used in you chosen plan.

## Ready to download?

Get the app in the [App Store](#) or [Google Play](#) today!

\*Requires Ruby to host your phone number. [Learn more about porting here.](#)
