

The best way to monitor, support, and optimize Zoom, and efficiently support the surge in remote collaboration.

Simplify UC Monitoring

Troubleshoot video and audio calls with an intuitive interface that helps IT teams detect, diagnose and resolve issues faster.

See Zoom and Beyond

Gain richer insights by tracking key metrics across Zoom Meetings, Phone, Webinars, and Rooms, alongside your other on-premises and UCaaS systems.

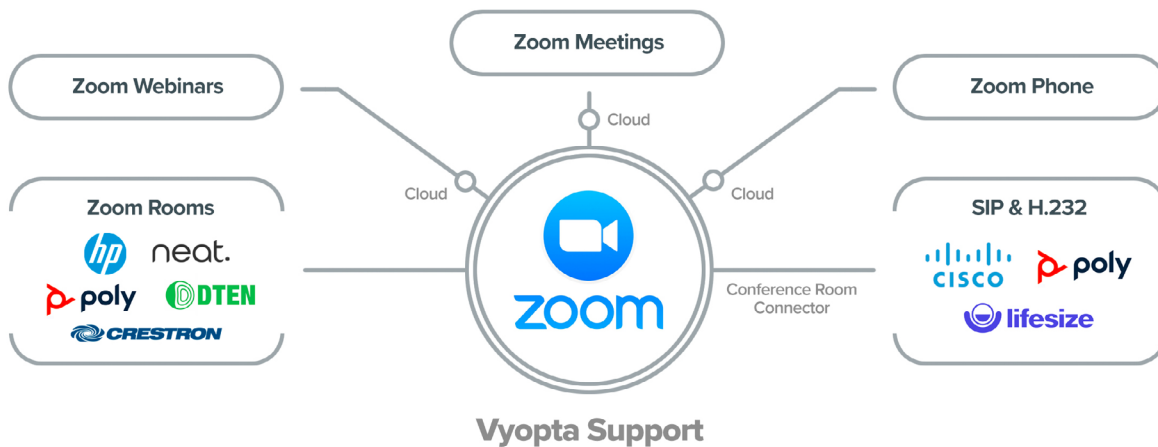

Improve ROI, Usage, and Experience

Gain insights to improve adoption, optimize costs, boost productivity, and train users, all while efficiently scaling IT to manage usage.

The Complete Zoom UC Picture

Vyopta helps to manage performance and adoption not only for Zoom Meetings, Zoom Webinars, and Zoom Phone, but also across compatible video endpoints (such as Zoom Rooms and existing conference room video hardware), all in a single pane of glass with your other calling and conferencing

technologies (including numerous on-premises & UCaaS platforms, and voice infrastructure). Vyopta's, vendor-agnostic approach helps maintain visibility into usage, performance and quality of experience across departments, and more accurately identify possible root causes for known issues.

Five Reasons Vyopta provides the best monitoring and analytics for all Zoom products

- 1 **Enable productivity** for your Zoom Phone, Webinars & Rooms users
- 2 **Simplified troubleshooting**, reducing time to issue resolution
- 3 **Proactive issue detection** thanks to data-driven investigation
- 4 **Manage total cost of ownership** with proven, multi-platform analytics
- 5 **Improved productivity** by ensuring technology is working as expected

More Support for your UC Support Teams

Vyopta's Technology Insights platform helps UC and Service Desk teams by providing:

- Detailed Zoom utilization metrics including Zoom Phone & Webinars, Zoom Rooms status & analytics
- Ability to proactively identify & quickly troubleshoot issues
- User-oriented insights into Digital Employee Experience
- Single-pane-of-glass to optimize mixed UC environments
- User tagging for customized, business-relevant reports

Vyopta support for Zoom-compatible devices
