

## Vyopta provides the only monitoring and analytics platform with visibility across hybrid work.

Organizations need to support virtual collaboration from homes and offices, as well as in-person collaboration in conference spaces. Vyopta helps organizations plan, manage, and operate hybrid work initiatives through insights and monitoring data for collaboration technologies and workspaces.

### Safely Manage Return to Office

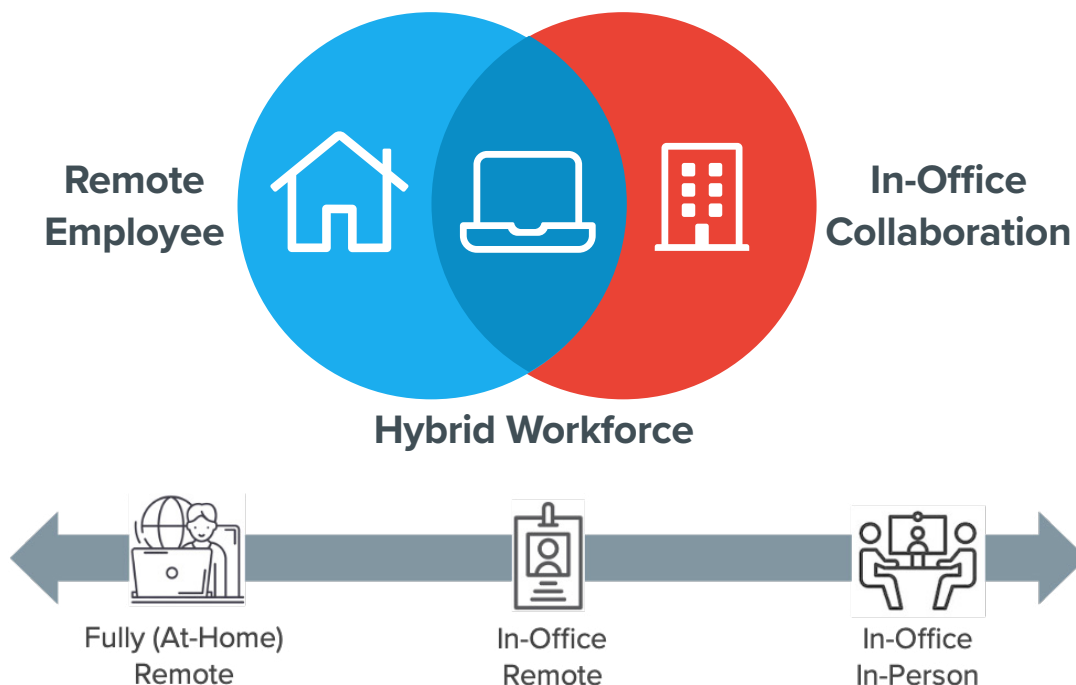

Gain actionable insights into space usage and track adherence to social distancing guidelines as employees resume in-office collaboration.

### Ensure Business Continuity

Plan for increased network bandwidth needs prior to office re-entry, and monitor quality once employees return to prevent disruptions.

### See Across Hybrid Work Modes

Trust one solution that will provide complete visibility into quality of experience and usage for remote workers and in-office collaborators.

## Vyopta Provides Collaboration Intelligence to Aid in Planning and Operations

### 1 Pre-Return Planning

- Do we know whether our tech investments are still the right ones?
- Will our network stand up to increased virtual collaboration in the office?

### 2 In-Office + At-Home Virtual Collaboration

- Can we assure quality of experience for both at-home & in-office users?
- How will we reduce and address call/meeting issues for our VIPs/ execs?

### 3 In-Room Collaboration

- Is social distancing capacity being breached?
- Can we reduce booking and usage inefficiencies across meeting rooms?

# Ensuring Social Distancing for Safe Office Re-Entry

Gain actionable insights into space usage and track adherence to social distancing guidelines as employees resume in-office collaboration.

## ENSURE SAFE RE-ENTRY PLANS

Use data on how employees collaborate to identify meetings or spaces that exceed safe occupancy, and create more space by clearing unused room bookings.

## AID CONTACT TRACING

Identify invitees for meetings with known exposure to proactively aid contact tracing.

## ESTABLISH SANITATION PROTOCOLS

Determine highest trafficked spaces to prioritize room decontamination and deep cleaning, and confirm people presence in spaces during regular night shift cleaning rounds.

## Success Story: Vyopta is key to Return to Office plan

“It used to be about using data to maximize ROI and cram people into spaces. Now we still want ROI, but we need data not only for that but to also make sure people are safe!”

- Set up new occupancy limits to monitor safe space capacity
- Track areas of concern if outbreak occurs
- Ensure compliance with preventative guidelines
- Avoid \$1M building cleanup cost if employee has COVID-19
- Identify and address those in non-compliance
- Leverage existing in-room endpoints with sensors
- Provide reports for corporate compliance, governance
