Fmst Tools

FMST Tools are the soft tissue mobilization tools that can take myo-fascial manipulation and mobilization to the next level in your practice. The design of the two tools available enables you, the practitioner to work over all surfaces of the body quickly and easily. Kit includes F1 and F2 Tools, 26 page Clinical Guide Book, Foam-lined protective case and Biotene Controlled Glide Massage Cream (.25oz. sample).

STANDARD FEATURES:

- 2 tool designed to treat all areas of the body
- Unique metal injected plastic material for superior weight and durability over other tools
- Custom molded non-slip thumb grip to create maximum angular pressure without over use by the practitioner
- Soft but aggressive treatment edge work facial adhesions, post surgical scarring and muscle injuries
- Ambidextrous Design: No more switching through multiple tools to find the right edge or angle. Both tools are designed to be used on both sides and on every surface for increased compatibility of treatment on multiple body areas

Standard FMST Tools:

☐ FMSTTools
