# CONNECT TO DOCUSIGN
Powered by **IN TIME TEC.**

1. Description

Connect to DocuSign allows users to quickly create and send DocuSign envelopes to any recipient, straight from the HP MFP. After the document is scanned, the user can save the document for later use. The user can also use an existing template for creating or saving documents, directly from the HP MFP control panel. All the documents are easily accessible from one screen named "Inbox, Sent, Drafts and Deleted." By navigating to an envelope, the user can print any attachments.

2. Key Features

Connect to DocuSign allows you to connect with your authenticated DocuSign account directly from your HP MFP. With this app, you can print straight from the control panel. The app also allows you to scan and save instantly, scan and send directly to recipients, and scan with a template.

2.1 Direct Connection

Connect to DocuSign allows you quick access to all your DocuSign documents, straight from your HP MFP. Directly connecting to DocuSign saves time, since you don't have to run back, and forth from your desk. Print directly from your account, all with the tap of a control panel.

2.2 Easier Scanning

With Connect to DocuSign, you can scan and save documents instantly to your DocuSign account. Once the document is saved, you can send it directly to your recipients. Easily use templates for scanning, saving valuable time.
