CONNECT TO QUICKBOOKS ONLINE
Powered by IN TIME TEC

1. Description

Connect to QuickBooks makes online accounting easier. This dedicated HP WorkPath app enables users to directly scan and upload invoices directly to Quickbooks Online from the HP MFP.

2. Key Features
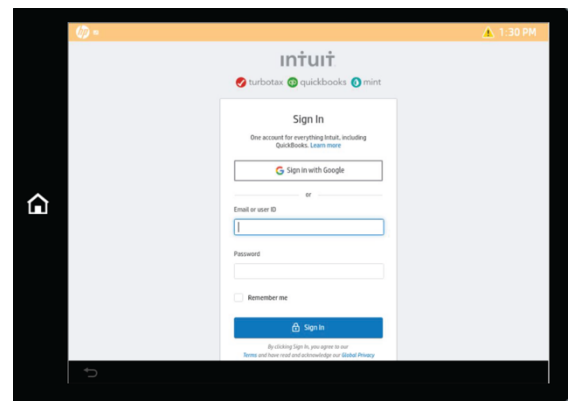

2.1 Direct upload of bills

Users can scan the bill in and fill in all the associated details. Vendor, Class, Customer, Invoice, Amount, Date, etc., can be entered on the "Create Bill" screen to create a new bill.

2.2 Scan and attach bill to an existing bill

Users can scan the bill to attach it to an existing bill. This option can be selected from the select bill dropdown list.

2.3 OCR

Optical Character Recognition (OCR) enables important data to be automatically extracted from the bill. The data is then automatically prepopulated into the QuickBooks Online fields. This automated process saves you time and reduces the chance of human error.
