

# CONNECT TO SMARTVAULT

Powered by  IN TIME TEC

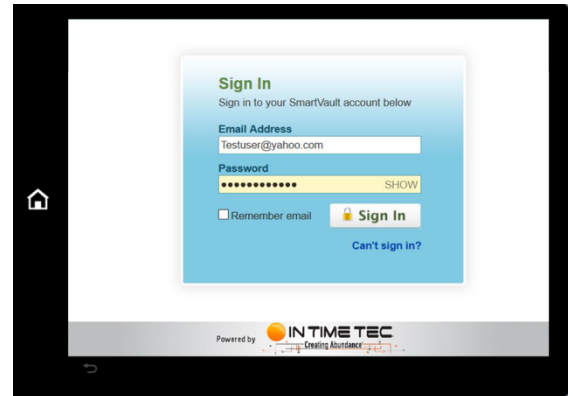

## 1. Description

Connect to SmartVault is an intuitive app that makes it simple to securely scan and upload important documents directly into SmartVault.

## 2. Key Features

### 2.1 Direct Login

The user can login to Connect to SmartVault from any Workpath-enabled HP device. The user can then access all existing accounts, vaults, folders, and uploaded files.

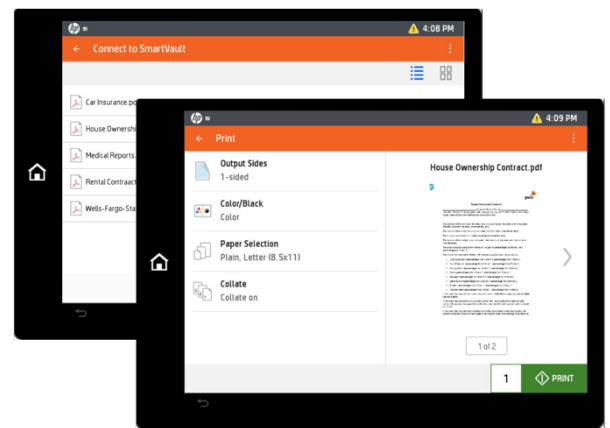

### 2.2 Scan and Print Documents

Using any Workpath-enabled HP device, users can scan and print documents directly to and from their SmartVault account. Instead of scanning, emailing, and saving, users can choose the folder and scan the file directly to that destination with the Connect to SmartVault app.

### 2.3 Added Document Security

Allowing users improved SmartVault access removes unnecessary steps in the document upload process. Lowering the chance of human error lowers the risk of confidential documents leaking.
