DIFFERENTIATORS

We garner our partners' trust and confidence that we will support them and deliver the highest quality services through the following differentiators:

Delivery

Commitment to on-time, on-budget, with quality or we don't charge. Agile development methodologies providing project transparency and clear prioritization. Scrum-certified product owners and project managers.

Relationships

Customer-driven development model focused on solving customer challenges in a way that has a powerful impact on the end-user experience. Open and candid communication to minimize breakdowns and accelerate breakthroughs.

Values

Commitment to delivering business value as defined by our clients. Commitment that our clients experience our core values of Trust, Transparency, Integrity, and Leadership.

WE PROMISE

ROI or you don't pay

CREATING ABUNDANCE THROUGH MOBILE APP DEVELOPMENT

Mobile applications are running the business world. Having one can allow you to streamline behind-the-scenes operations, increase engagement with your customers, and increase productivity.

By outsourcing software development, you can focus on your core business. We have onshore and offshore resources that can help you develop, maintain, or improve any mobile application you have or want to have.

STREAMLINE
behind-the-scenes
OPERATIONS

ATTENDANCE TRACKING APPLICATION

The Challenges

Our client, a non-profit association that administers learning certificates and courses, had a manual honor-based system for tracking continuing education courses. Members would attend an event to get credits, get a piece of paper that would show the credits, and then manually enter credits in the non-profits existing system. Many people were forgetting to log or logging incorrect data and there was too much room for inaccuracies.

The Solution

In Time Tec built a mobile application that brought the whole system online. The app allows members to register, check in, and track events they attend for continuing education credits. Instead of remembering to manually track credits, members now just scan a QR code when they arrive at an event and their attendance is tracked for credit.

The Results

Saves members and client time: More accuracy of continuing education credit tracking with less room for human error. Easier and more efficient tracking

WEATHER ALERT APPLICATION

How we helped

In Time Tec developed an application for receiving emergency alerts from the public safety agencies concerning severe weather and community safety warnings. This free application allows users to add their location and set preferences to receive alerts concerning that location. It also has a feature to track the user's location to enable an emergency rescue notification, should it be needed. Additionally, it allows users to view maps of areas of impact with the ability for the user to tap and check each notification.
