AUTOMATING TESTING TO SPEED UP TIME-TO-USE ENSURES YOUR APPLICATIONS AND SYSTEMS ARE READY TO USE MORE QUICKLY AND WITHOUT ERRORS.

OUR TEAM LOOKS INTO EXISTING DEVELOPMENT TO TEST CODE AND OFFER AN IMPROVED EXPERIENCE FOR THE END USER. THESE CHECKS AND BALANCES SPEED UP DEPLOYMENT AND ENSURE CODE IS CLEAN AND SCALABLE.

CASE STUDY: **AUTOMATED DATA VALIDATION**

THE CHALLENGES

Our client, an agribusiness, was migrating from an old tech, Data Manager scheduler and SQL stored procedures, to the new tech, Control-M Scheduler and Microsoft SSIS Packages. They wanted to make sure that the new tool was operating the same way as the older tool. It was of the utmost importance that nothing was changed or lost in the migration. The way to ensure this was to run both tools and compare the data. The client knew it was a near impossible task for a human to compare the millions of rows of data.

THE SOLUTION

In Time Tec built a custom tool to compare the data automatically. Every week, we ran tests. They would pass or fail and we would offer solutions for the failed tests.

THE RESULTS : REMOVE TEDIOUS MANUAL LABOR

We were able to alleviate the tediousness of someone manually comparing the data from one tool to another. We successfully moved them over to a new tool, caught defects early on, and automated it all along the way.
