PROGRAMACION DE UN JOB

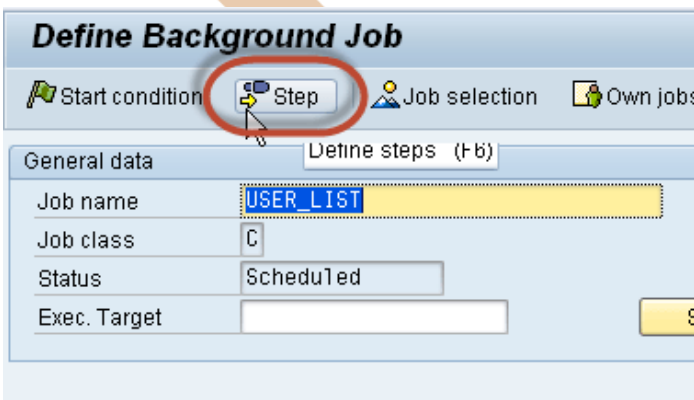

1. Se ejecute la Txn SM36

2. Se ingresa:
 - El nombre del job,
 - La prioridad (A/B/C)
 - El servidor de destino (Exec. Target)

3. Clic en el botón "Step" para definir los detalles que llevara el job:

- Se ingresa el nombre del programa ABAP, variante (en caso de llevarla) y lenguaje, después, clic en el icono  “guardar”:

Program values

ABAP program External command External program

ABAP program

Name **1** RSUSR200

Variant M_TEST 

Language EN

External command (command pre-defined by system administrator)

Name

Parameters

Operating sys.

Target server

External program (direct command input by system administrator)

Name

Parameter

Target host

2  Check   Print specifications 

- Después se muestra la siguiente pantalla con los datos capturados anteriormente y adicional, la columna en donde se define el usuario con el cual va a ejecutarse el job:

Step List Overview

      Spool |     

No.	Program name/command	Prog. type	Spool list	Parameters	User	Lang.
1	RSUSR200	ABAP		M_TEST	DEVELOPER	EN

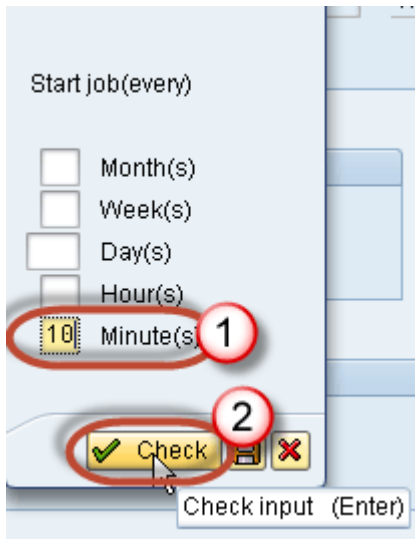

- Después se elegirá el periodo en el que quedara programado el job, es decir, este se podrá programar de manera inmediata o por hora, día, semana, mes u otro periodo

The screenshot shows a job scheduling configuration window. At the top, there are five buttons: "Immediate", "Date/Time", "After job", "After event", and "At operation mode". The "Date/Time" button is circled in red and labeled with a "1". Below this, the "Date/Time" section contains two rows of input fields. The first row is "Scheduled start" with "Date" (10.03.2013) and "Time" (11:00:00). The second row is "No Start After" with "Date" (11.03.2013) and "Time" (11:00:00). This section is circled in red and labeled with a "2". Below these are three empty sections: "After job", "At operation mode", and "After event". At the bottom left, there is a checkbox labeled "Periodic job" which is unchecked. At the bottom right, there are three buttons: "Check", "Period values", and "Restrictions". The "Period values" button is circled in red and labeled with a "3".

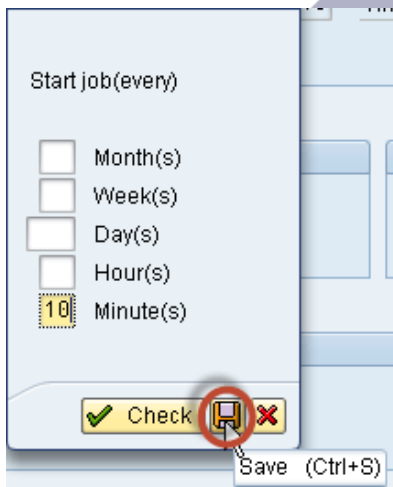

- En este ejemplo se eligió "Otro Periodo"

The screenshot shows a dropdown menu titled "N4S(3)/500 P...". It contains five options: "Hourly", "Daily", "Weekly", "Monthly", and "Other period". The "Other period" option is circled in red. At the bottom of the menu, there are three buttons: "Check", a save icon, and a close icon.

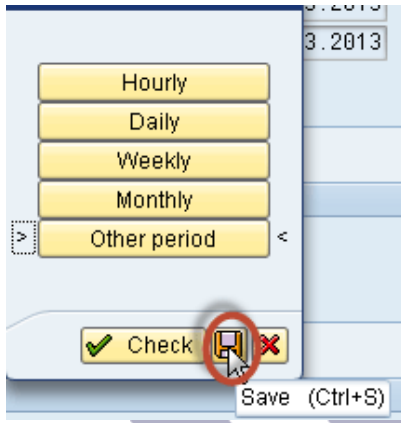

8. Es decir que se ejecutara cada 10 minutos, en donde una vez definido el periodo, se le da clic en "Check" 

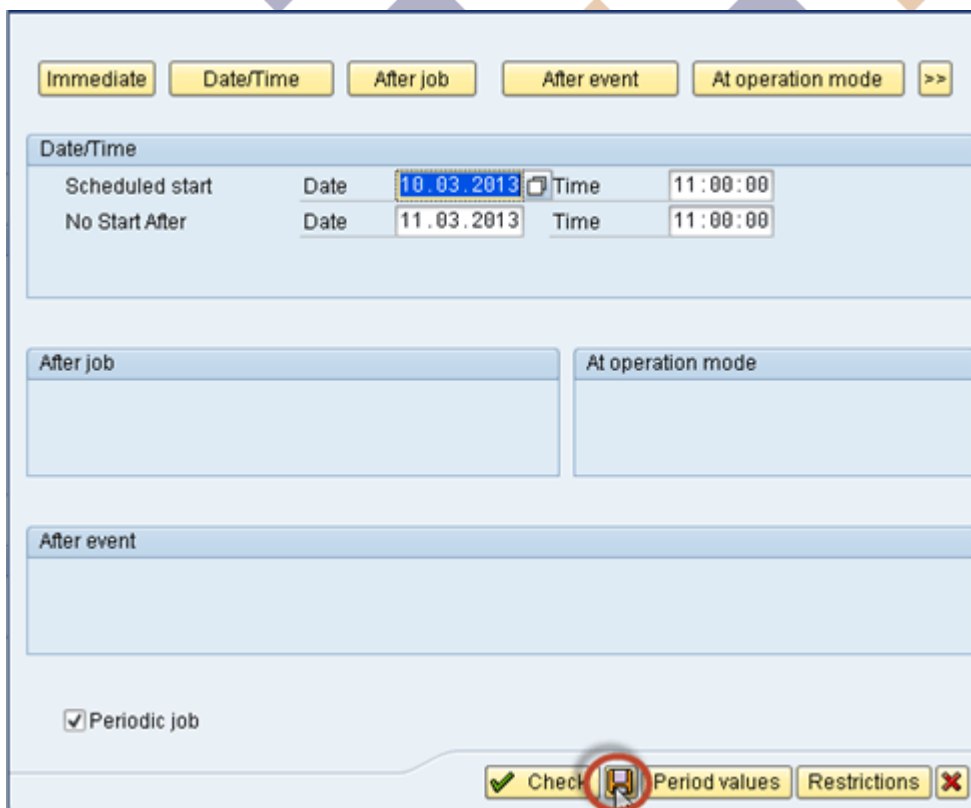

9. Y después "Guardar" 

10. Te regresa a la siguiente pantalla, en donde se le vuelve a dar clic en “guardar” 

11. Y finalmente clic en “guardar” 

12. Aparece la siguiente pantalla en donde se ve de manera general los datos que se ingresaron

Define Background Job

Start condition Step Job selection Own jobs Job wizard

General data

Job name USER_LIST

Job class C

Status Scheduled

Exec. Target Spool list recipient

Job start

Planned Start

Date 10.03.2013 Time 11:00:00

No Start after

Date 11.03.2013 Time 11:00:00

Job frequency
