Value added service you can rely on from Morse Industries

ESTIMATING • ENGINEERING • SHOP DRAWINGS

Morse Industries now offers in house professional estimating for both railing and shower projects. Send us your drawings and specs and we will help you win more bids.

ESTIMATING

Our professional estimating department has the ability to prepare a take-off that shows the type and location of all items supplied by Morse. Armed with that information, we are able to quickly provide you with an accurate quote that's easy to understand. Our turnaround time on most quotes is just 1 to 2 days.

Best of all, there is no additional charge for this service!

ENGINEERING

Our customers are frequently faced with installations where engineering calculations, design, or approval are required. Common reasons include submittals, design changes, challenging attachment/substrate conditions, etc. Navigating these situations can be costly and time consuming. Let Morse Industries be your partner when you need engineering assistance on your railing job. We have aligned ourselves with a team of engineers that are accurate, affordable, and responsive to the needs of our customers. At your request, we will include the cost of engineering with any of our quotes.

SHOP DRAWINGS

Shop drawings are used to both aid in the fabrication and installation of our products and to prove to the architect that the design elements are being achieved. Although shop drawings are required on most commercial jobs, many of our customers do not have the ability to produce them in house. Morse Industries is happy to coordinate with our drafting partners to take the headache out of producing shop drawings. Please tell us if you would like the cost for shop drawing included in your next quote.
