

PRESS RELEASE

GPB RECORDED 23 PERCENT HIGHER QUARTER SALES YoY
New company strategic plan drives sales and expands LTE business

Key Highlights of Green Packet Berhad Performance:

- Solutions business pillar and Communications business pillar registered 23% higher quarter sales YoY
- Solutions pillar - The group is making a successful transition into LTE business and it currently takes up 60% of total device orders
- Communications pillar – Contributed to 20% of the quarter sales YoY increase

KUALA LUMPUR, 28 MAY 2015: Green Packet Berhad (GPB) achieved a total revenue of MYR73.8 million with 23% YoY growth in Solutions business pillar and Communications business pillar for the quarter ended 31 March 2015.

Chief Executive Officer, Kay Tan said “by going back to our roots – software solutions and communication businesses – I am glad to announce that GPB has achieved a steady growth.”

The group’s current customer base for Solutions business consists of global clients whereby 51% hail from Asia, 22% from Latin America, 20% from Africa, with the rest from Europe, Oceania, and the USA. Moving forward, GPB will continue to invest in key growth areas and concentrate resources into the development of potential markets including Europe, the USA and Middle East.

The company also reached an important milestone as part of its 2015 marketing goal early this year, where the group successfully positioned LTE as its primary main business focus with 60% of total device orders from the LTE category, 40% from WiMAX and other solutions.

The company has 21 LTE clients with 53 on trial, an improvement from the previous quarter when it had 17 clients and 46 on trial. "The projected figure of LTE networks in commercial service in the world is 350, according to GSA (Global mobile Suppliers Association). This means that there is a lot more potential clients out there and we still have room to grow," Kay added.

'Our showcase at the Mobile World Congress, Barcelona and LTE World Conference, Latin America has greatly solidified our network and exposures. Response has been favourable resulting in strong leads and we are very positive on each market's potential at the moment,' said Kay Tan.

Meanwhile, the solutions pillar experienced a stable performance of MYR25.3 million representing 29% YoY compared to end-March 2014. Whereas the communications pillar recorded MYR48.5 million, 20% YoY higher compared to end-March 2014.
