

# INTRODUCING THE Better Carrier

Sleek  
Design

Commercially  
Compostable

Compact  
Size

## Buckle up: your drinks can finally go for a ride!

Our disposable, compostable 4-Cup Carrier is made from unbleached sugarcane and is designed to help you achieve operational excellence, customer satisfaction and your sustainability goals.

Better Earth challenges our perceptions on how a modern compostable cup carrier should look, feel and perform, thanks to our distinctive hot press manufacturing process. In fact, the 4-Cup Carrier is designed and packed so efficiently, its carton is half the size of conventional cup carriers for the same amount of product, extending your storage capacity and reducing the product's environmental footprint.

### Did you know?

Our Carrier literally “snaps” your beverages into place.

## HOT BEVERAGE COLLECTION

### Let's talk Bagasse.

One person's trash is another person's treasure! Bagasse, a byproduct of sugarcane harvesting, is a highly versatile and often underutilized material. Instead of burning or wasting the material, it can be turned into paper, cardboard, bioplastics, or even fuel! That's why we use it for our compostable 4-cup drink carrier. It works double-time to get your drinks where they need to go while helping you meet and exceed your sustainability goals.
