

WE HOST, YOU SUCCEED

TOSIBOX OT MANAGED SERVICES

Your End-to-End OT Platform Provider

CYBER SECURITY

TOSIBOX is your OT network infrastructure, cyber security and risk management partner. Networks will be fully segmented, encrypted from edge to edge and protected by physical-first multi-factor authentication. All networks are invisible from the public Internet space, travel from point to point, and are managed by our team of networking and cyber security experts.

NETWORK DESIGN

TOSIBOX will work with you and local IT teams to create & optimize OT infrastructure tailored for you.

NETWORK MANAGEMENT

TOSIBOX will expertly maintain your operational networks for cyber security, remote maintenance, access control and data collection.

HOSTING

Your OT networks will reside in our Global Tier 4 data center hosting environment. All data is always backed up and fully encrypted at rest.

We understand the challenges faced by organizations, large and small, who are working to leverage data and connectivity for business models and decision support.

TOSIBOX® SaaS provides a Hosted Management Layer that turns your operational applications, machines and their users into a Controlled OT Network.

TOSIBOX is managing OT networks in 150 countries in every major operational vertical. Our SaaS offering will unlock trapped value by focusing time, energy and money on business applications not IT. Our networks are expertly managed and optimized allowing you to create business models and revenue streams that make sense for today's connected world.

YOU CHOOSE
