# AV Solutions

## Our Solutions

Our solutions are shaped by your needs & requirements, which enables us to create spaces that teams can collaborate effectively, regardless of their location. Our Audio-Visual solutions cater to a wide range of needs, from fully connected Boardrooms and Lecture Theaters to agile Hybrid Meeting Spaces that allow participants to use their own devices.

Visit our website to see the innovative Audio Visual solutions we install in workplace environments just like yours.

**World-class Audio-Visual Solutions that enhance communication and company collaboration.**

## About Creation Networks

The Creation Networks team has 19 years of experience specializing in designing, building, installing and managing advanced Audio Visual solutions to improve client communication and collaboration.

We offer a complete range of AV hardware, design, installation and technical support services, including upgrades for conferencing systems, customized AV solutions, maintenance and on-site support for complex Audio-Visual infrastructure.

## History

Since 2006, Creation Networks has been a leading company in the Audio Visual market. As we have grown over the last two decades, our mission is to continuously improve organizations with simple and scalable collaboration technologies.

From Audio Visual video conferencing to today's integrated boardrooms, dynamic hybrid meeting spaces and one-click BYOD systems, we're excited to show you the possibilities to help your workforce work smarter, not harder!

## Our Differences

When you work with Creation Networks, you gain a trusted partner skilled in Audio Visual solutions to produce quality solutions for your collaboration needs and goals.

We begin each project with a thorough consultation. During this period we invest time and resource to understand your objectives and thoroughly identify your pain points. We provide tailored Audio Visual Solutions that surpass your expectations.

## Hybrid Meeting Workplaces

As technology continues to evolve, we've entered an era where work is no longer refined to a specific desk, phone, or computer screen. With an effective Hybrid space, the lines are intentionally blurred between physical and virtual working environments enhancing team performance and allowing for a level of collaboration. Our Hybrid spaces enhance productivity, reduce costs, environmental impact and strengthen team performance putting the user experience first.

Putting the user experience first with our hybrid workplaces.

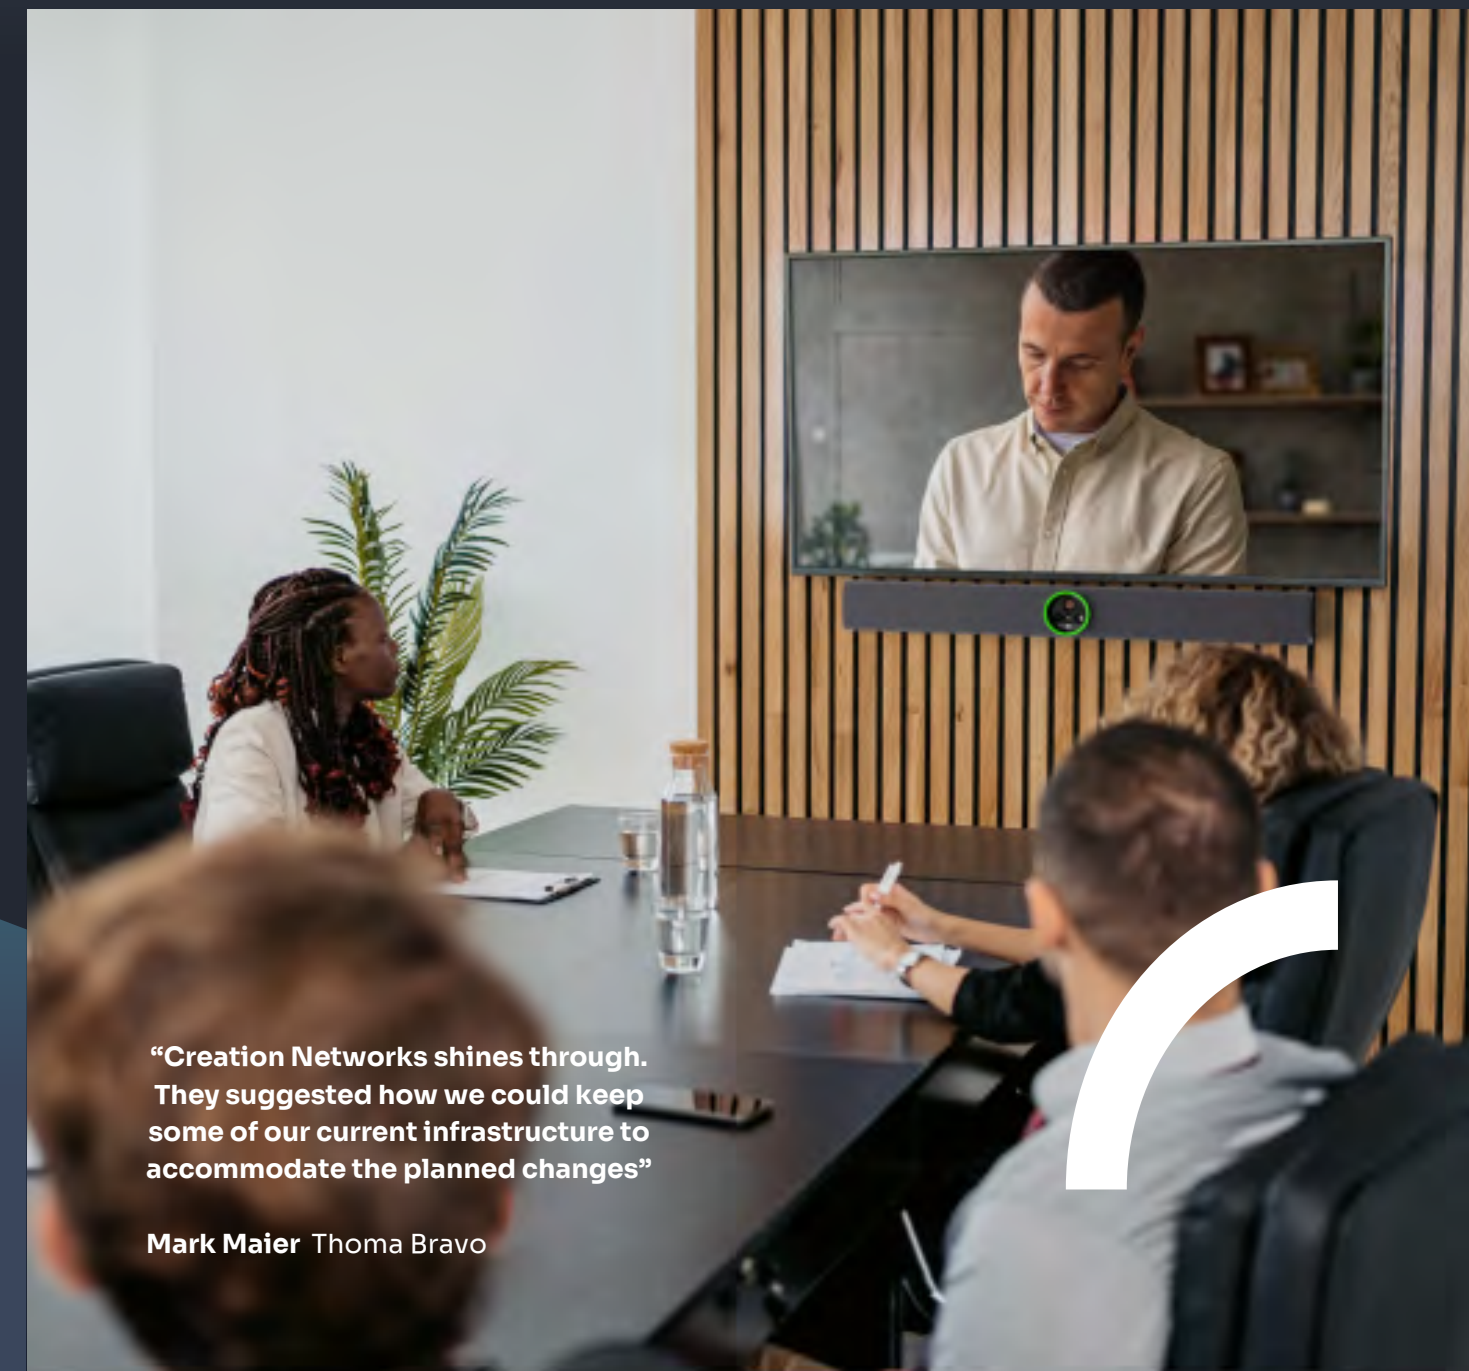

## Meeting Room Audio-Visual

The demands of a modern meeting room continually evolve.

Meetings no longer take place in just one room, demanding the need for seamless interconnectivity and clearer communication between participants. While the technological needs have changed, the fact remains that a meeting room is where ideas are born, relationships are formed and

deals are secured. With that in mind, we provide professional meeting room AV solutions to optimize your meeting room experience - from design and installation to maintenance and support services.

**“Creation Networks shines through. They suggested how we could keep some of our current infrastructure to accommodate the planned changes”**

**Mark Maier** Thoma Bravo

## Remote Monitoring

Your Audio Visual network is always operational, even when you're not in the room. Today, if a performance-related issue develops it's typically called into the help desk and sometimes this may not happen until the next room booking takes place when the issue is discovered. This delay could result in a loss of room availability and can add additional

pressure to the meeting organizer and participants. Our remote AV monitoring service provides an elegant solution, allowing a Help Desk Engineer to completely access network monitoring functions remotely, giving you peace of mind that any issue can be tracked & mitigated quickly.

## Workplace Integration through Accessible Technology

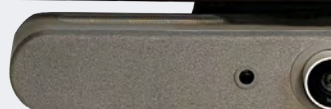

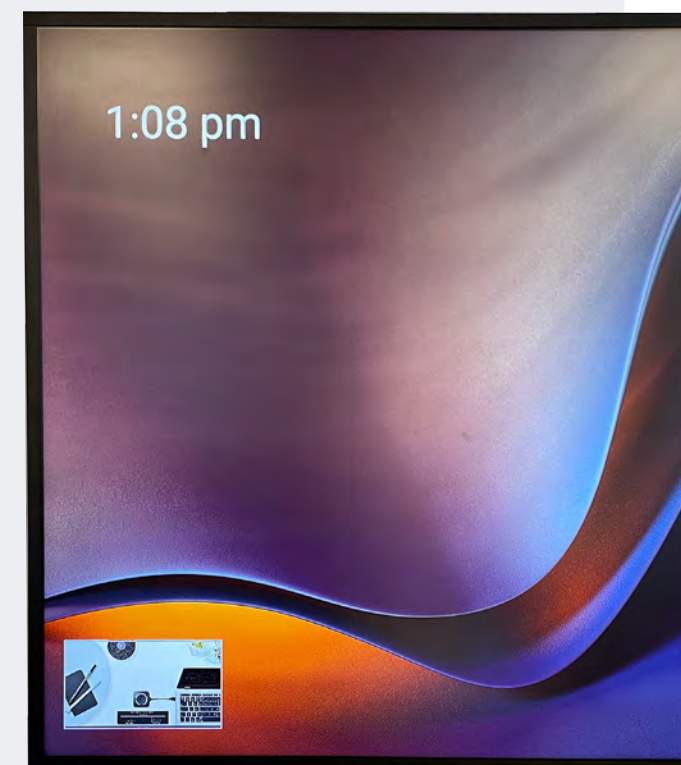

Workplace equity is a considerable asset for any business. Technology has the power to provide complete accessibility, making the workplace an efficient, welcoming, and ultimately usable environment for all staff, visitors and associates. As established experts in exceptional Audio Visual solutions, Creation Networks works with a vast range of clients and vendors to upgrade and enhance their workplaces to meet the demands of their valued teams. We believe that workplaces should provide all the resources necessary for meeting equity.

“Our relationship with Creation Networks has grown over the years; we’ve come to view them as a trusted partner.”

# Bring Your Own Device Technology

**Bring Your Own Device, or BYOD, is increasingly popular, allowing colleagues and associates the convenience to manage their meetings, with all the AV resources they need available on familiar devices.**

BYOD puts the power back into the hands of your team who decide where and how they connect with meeting participants in order to create a familiar seamless user experience. Creation Networks delivers professional BYOD solutions, facilitating streamlined communications from any device, in any workplace, with full AV integration for seamless connectivity.

**“Creation Networks staff is proactive and strategic in their approach, which is one of the reasons they have been our AV partner of choice for more than three years”**

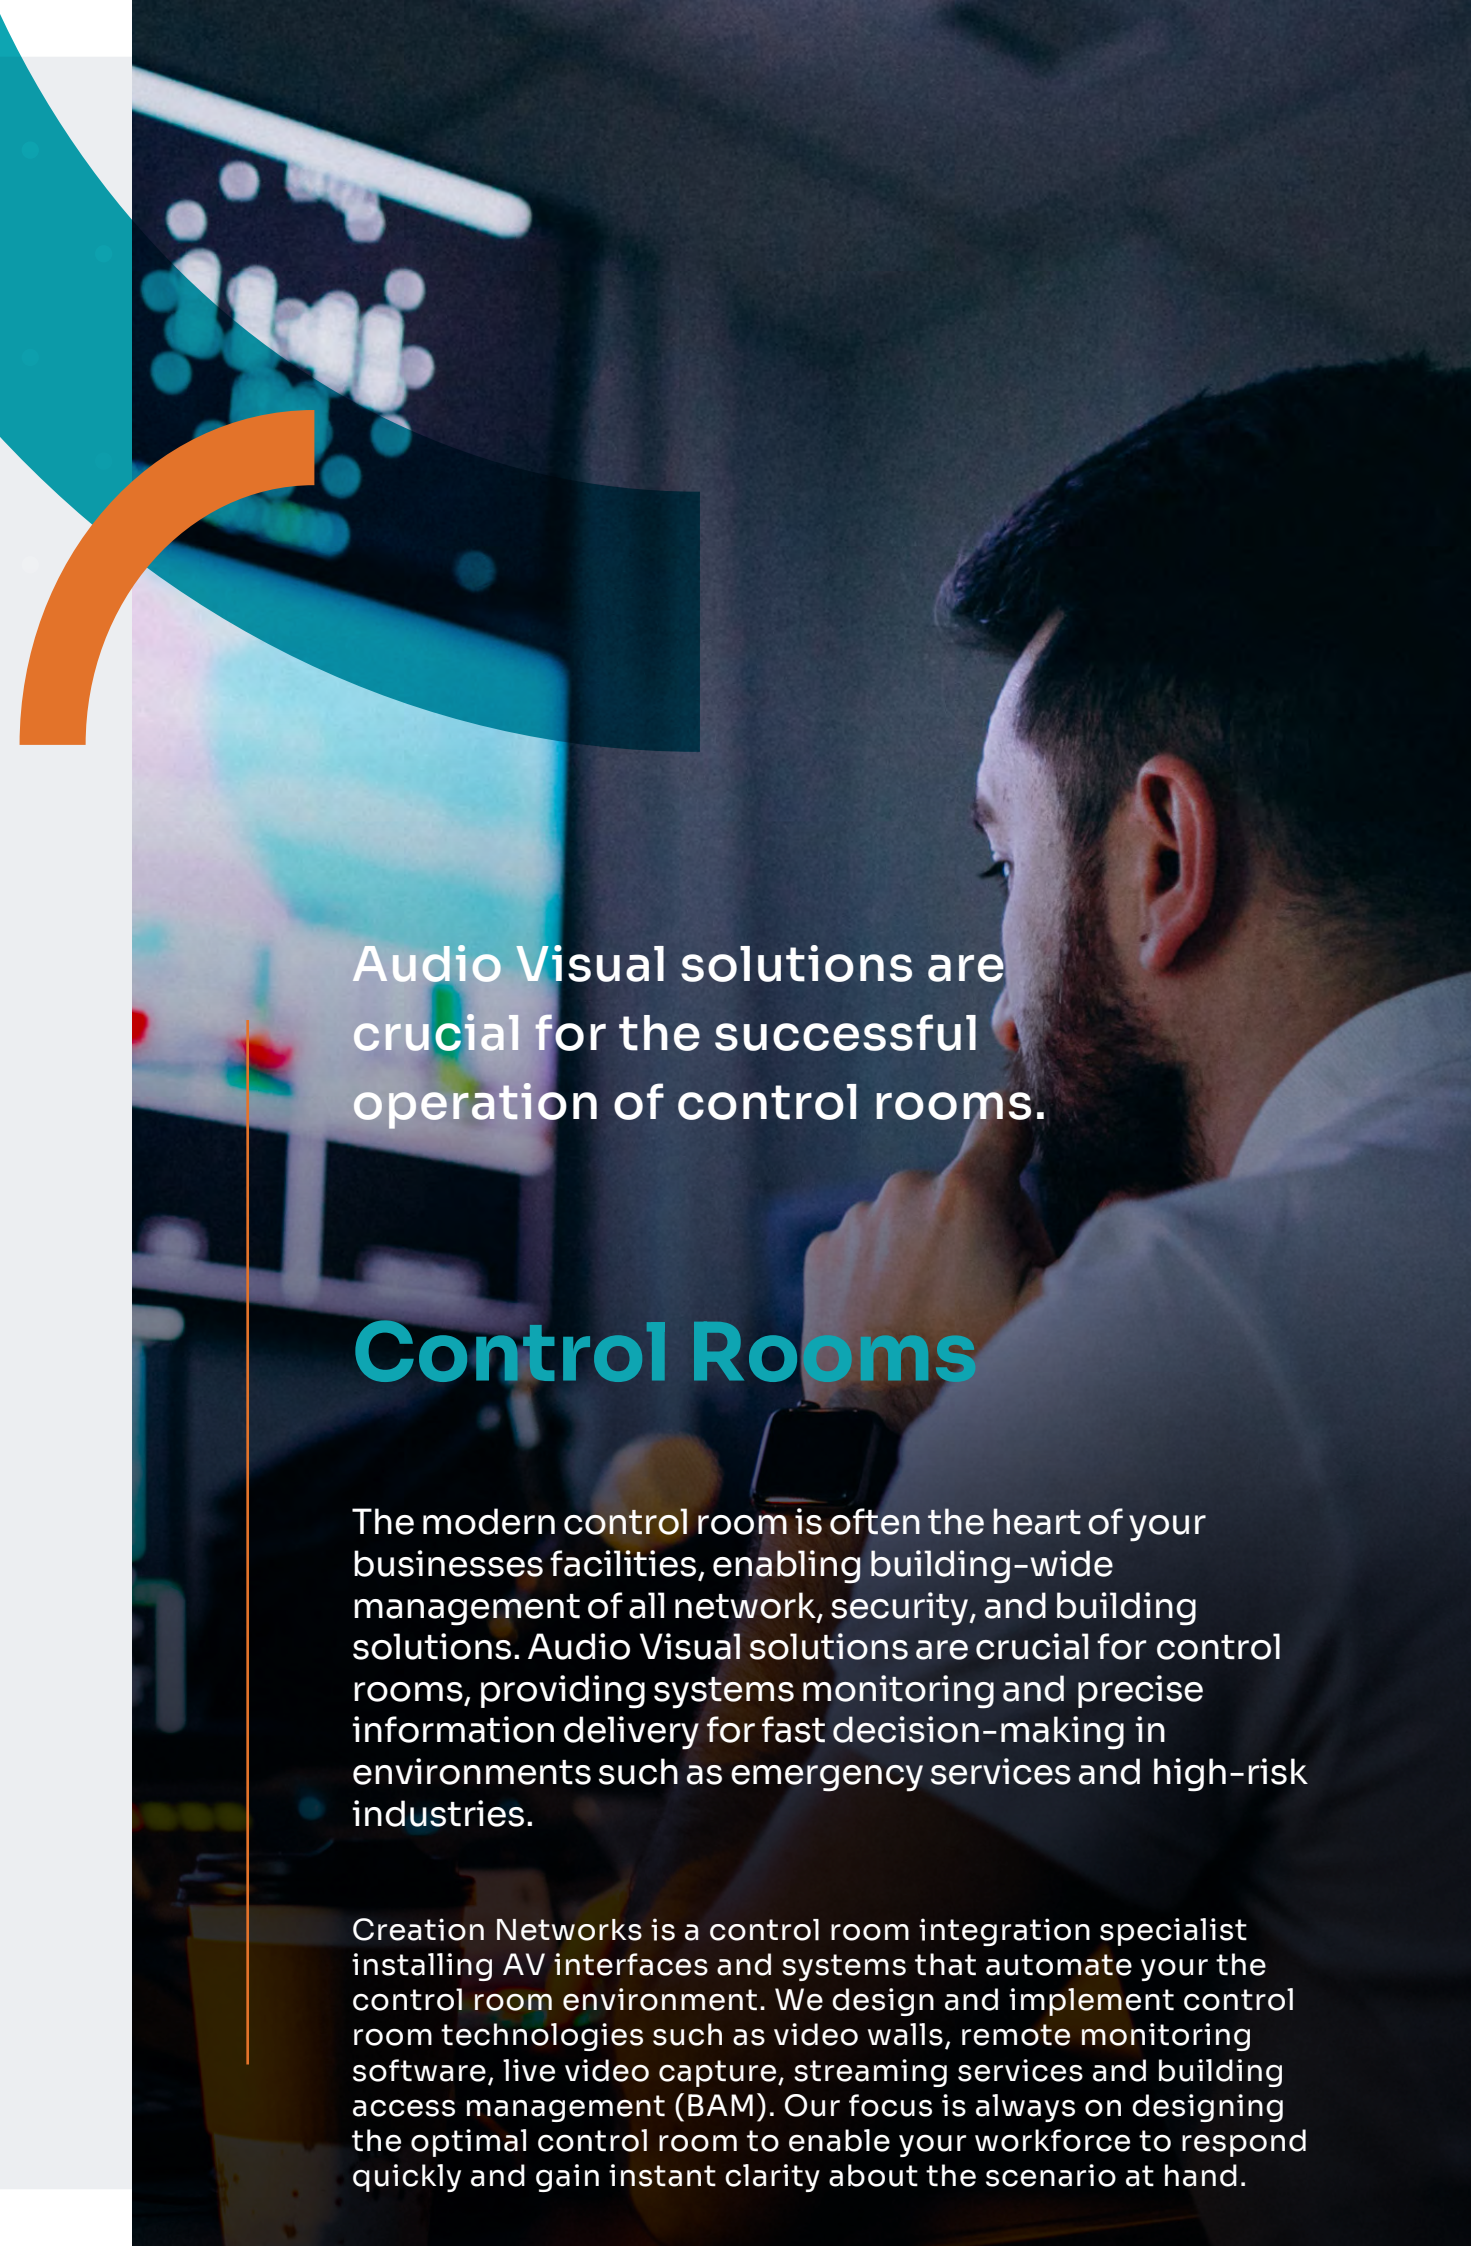

**Matt Daugherty** Kiewit Construction

Audio Visual solutions are crucial for the successful operation of control rooms.

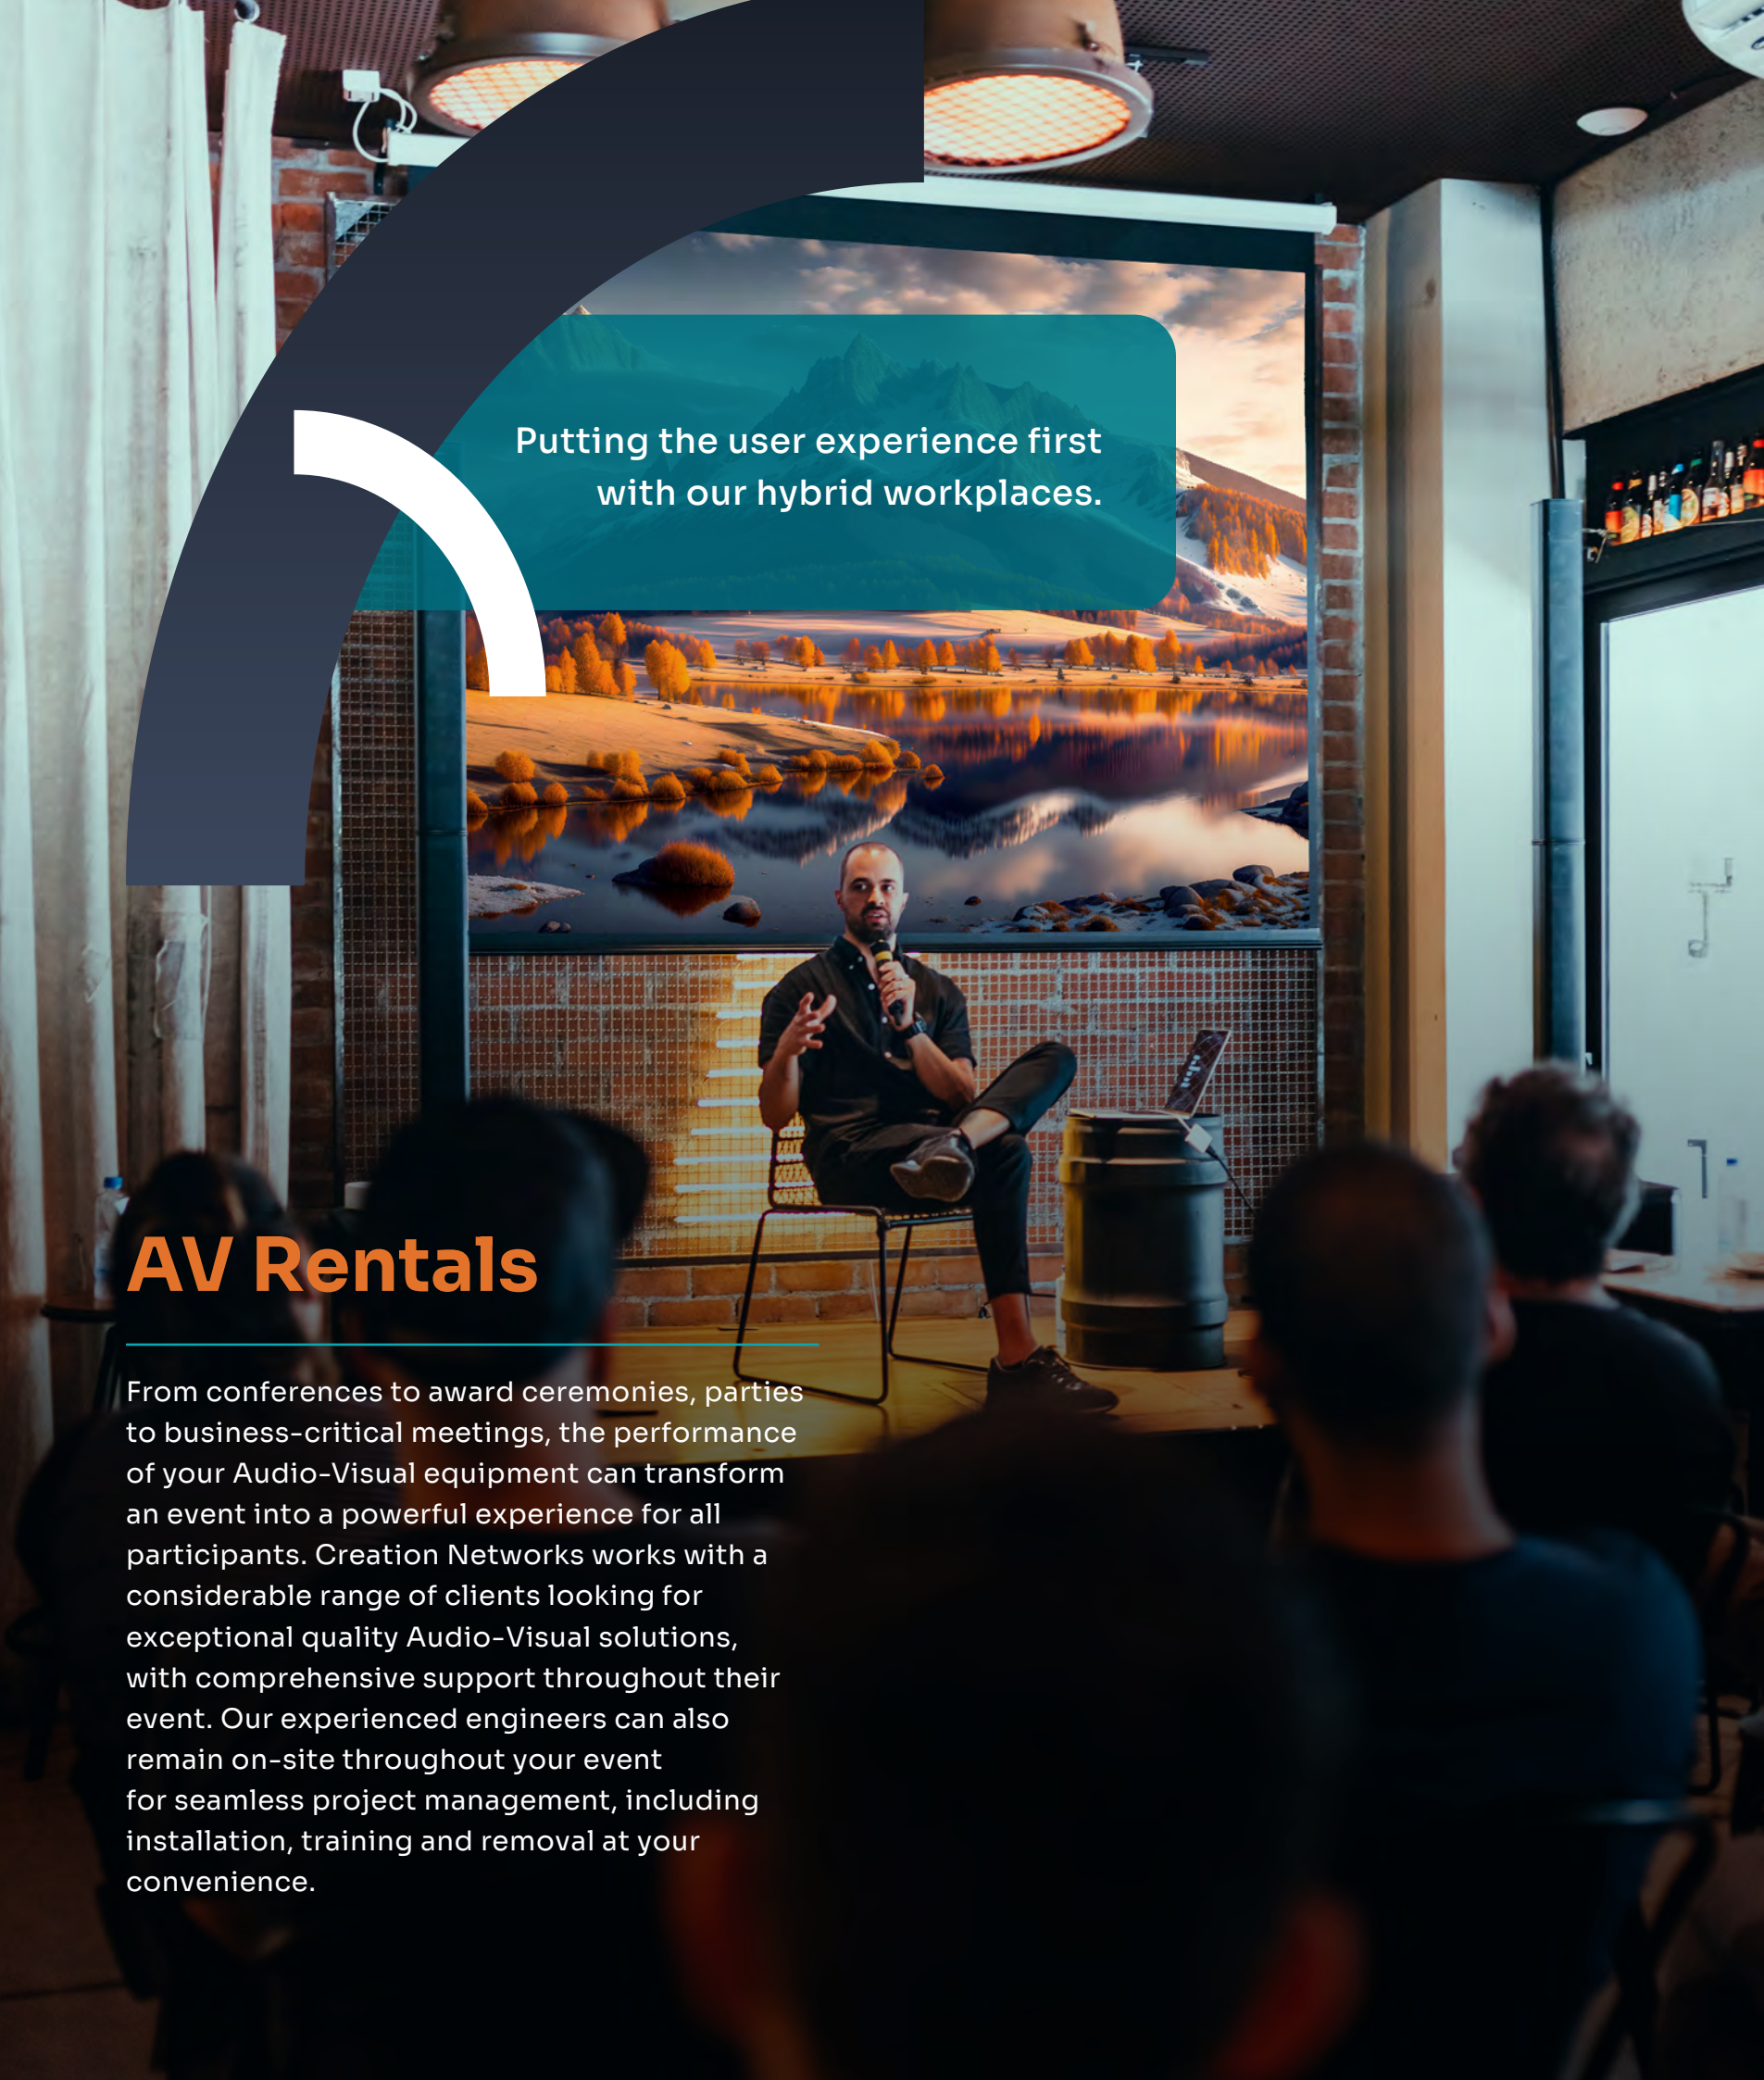

## Control Rooms

The modern control room is often the heart of your businesses facilities, enabling building-wide management of all network, security, and building solutions. Audio Visual solutions are crucial for control rooms, providing systems monitoring and precise information delivery for fast decision-making in environments such as emergency services and high-risk industries.

Creation Networks is a control room integration specialist installing AV interfaces and systems that automate your the control room environment. We design and implement control room technologies such as video walls, remote monitoring software, live video capture, streaming services and building access management (BAM). Our focus is always on designing the optimal control room to enable your workforce to respond quickly and gain instant clarity about the scenario at hand.

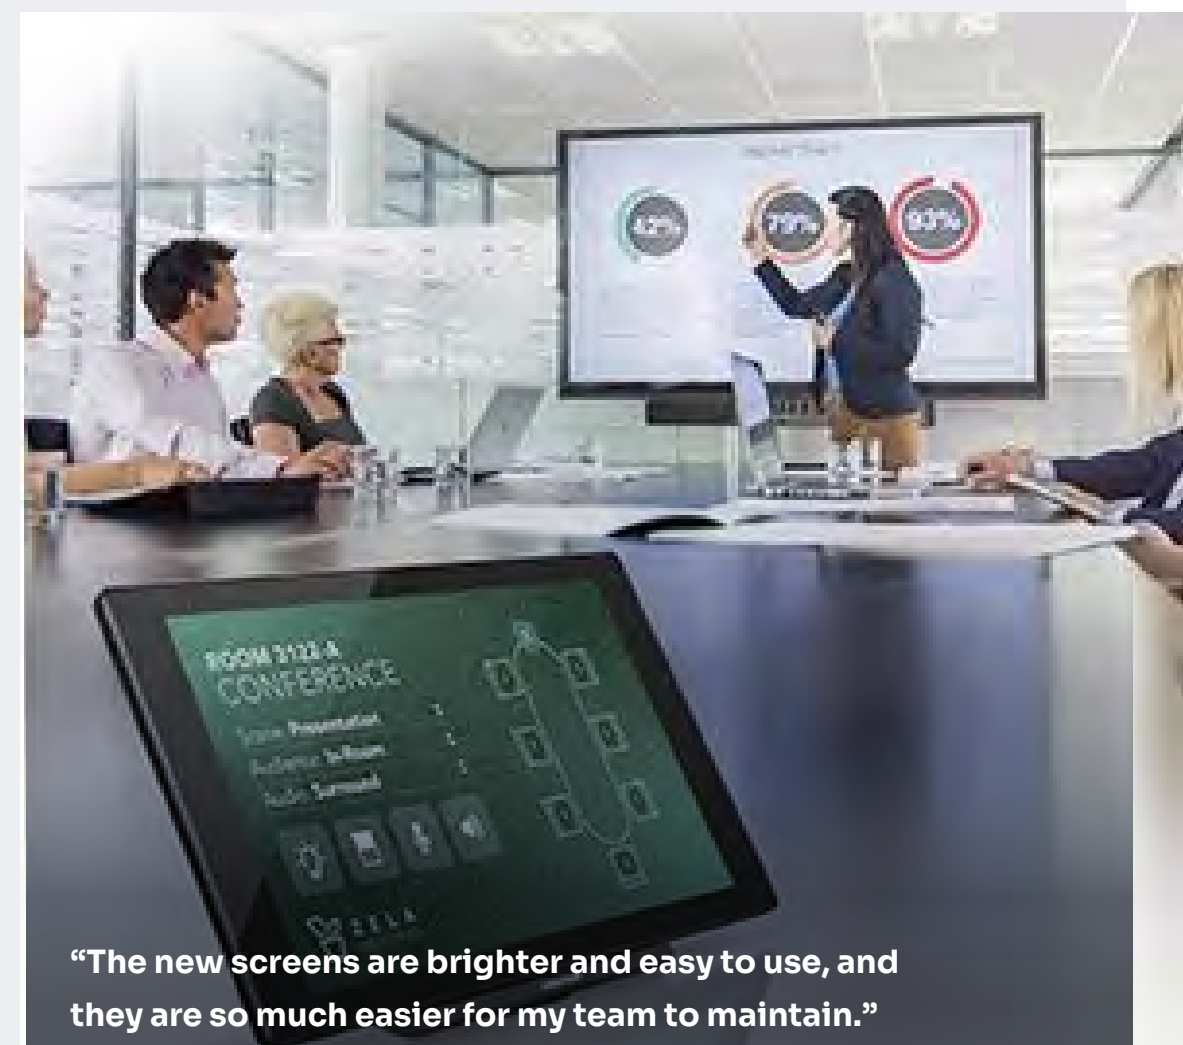

Putting the user experience first  
with our hybrid workplaces.

## AV Rentals

From conferences to award ceremonies, parties to business-critical meetings, the performance of your Audio-Visual equipment can transform an event into a powerful experience for all participants. Creation Networks works with a considerable range of clients looking for exceptional quality Audio-Visual solutions, with comprehensive support throughout their event. Our experienced engineers can also remain on-site throughout your event for seamless project management, including installation, training and removal at your convenience.

## Smart AV Room Integration

Smart rooms offer an opportunity to incorporate outstanding Audio Visual technology into every touch panel, making connectivity a driving force behind your workplace design and functionality. Creation Networks innovative engineers work with a range of businesses, from small start-ups to global corporate enterprises looking to enhance how their meetings perform. Touch panels provide room control at your fingertips, handling everything from AV room control, security systems to temperature, from lighting, to keyless entry. These intelligent systems are exceptional for busy organizations, combining way-finding and room control & bookings for streamlined workforce management.

**“The new screens are brighter and easy to use, and  
they are so much easier for my team to maintain.”**
