RACING SHOCKS

Short Track 7700 Thru- Rod

The 7700 Thru-Rod shock is the latest development in short track shock technology. The thru-rod design eliminates the gas pressure feel entirely. What you gain:

- Grip
- Consistency on long runs
- Better tire wear
- Unmatched driver feel

Thru-Rod design eliminates any displaced fluid, so the need for a separate head valve or nitrogen chamber is no longer needed. This drastically reduces running friction and improves consistency by eliminating the effect of rising gas pressure commonly associated with gas shocks.

2013 Pricing

PS-7700-T.....\$795 / each
7700 Thru-Rod Shock, NEW SHOCK

KT-7700-T.....\$595 / each
7700 Thru-Rod, UPGRADE

Adjustable or Non

Coilover or Smooth Body
