*Signature AND body text should be in 11 pt Tahoma Font

scribbles
SOFTWARE

Your signature settings should be set like this:

The image shows a screenshot of an email signature configuration interface. The interface is divided into two main sections: a preview area at the top and a settings area at the bottom. The preview area shows a signature for Emma Vogeler, Marketing Coordinator at Scribbles Software, with a link to scribsoft.com. The settings area includes options for font type (Tahoma), font size (11pt), and various text formatting options (bold, italic, underline, link, image). Below the preview, there are two sections for signature defaults: 'FOR NEW EMAILS USE' and 'ON REPLY/FORWARD USE'. Red circles and arrows highlight specific settings: 'Tahoma' for font type, '11pt' for font size, 'scribsoft.com' for the website link, 'Emma Vogeler' for the signature text, and 'No signature' for the reply/forward signature.

Signature:
(appended at the end of all outgoing messages)
