

aiconix GmbH is a start-up from Hamburg. With our AI One-Stop-Shop, our live transcription solution and our transcribe App in slack, we help companies to gain easy and fast access to the latest automated metadata around audio, video, image and text. Through our MVP and first pilot customers, we have already been able to achieve a lot and still have some exciting challenges ahead of us.

Are you interested in the latest technologies, and would you like to use your existing knowledge to develop new products in the areas of "artificial intelligence" and "smart data"? Do you have 15-20 hours a week to actively support us? Then become part of our team as

Working Student in AI Product Management & QA (m/f/d)

What has to be done?

We continue to develop our products together with our customers. In the process, new questions and perspectives always arise, which we must condense into an overall concept in order to further increase our relevance in the market and the added value for our customers.

The tasks in the operative business are correspondingly diverse. In close cooperation with our engineering teams, you will support our Product Owner Max by:

- Clearly describing tasks and bugs for our development teams,
- Researching new features and helping to shape their implementation
- Checking the quality of our products and supporting their automation

What we expect from you:

- You are at least in your 4th semester, ideally in a technical degree programme (computer science, business informatics or similar) - or alternatively have a very high technical affinity.
- You have a very good eye for detail and a very precise and independent way of working.
- You are looking forward to a job in which you focus on the use cases of our customers with the big picture in mind.
- You are curious, like to work your way into new topics and are not afraid of responsibility.
- You are a team player, can think creatively "around corners" and are interested in artificial intelligence and data science.

What you can expect from us:

- An exciting journey in the further growth of our company including great freedom to implement your own ideas and a professional perspective in our start-up company
- Flexible working hours and an inspiring and innovative working environment
- An attractive workplace in the Startup Dock in Hamburg, but also the possibility to work remotely in a flexible way

If you are interested, please send your application to Verena Traub (hr@aiconix.ai).

If you have any questions, please call us at 040/8081-90166. We look forward to getting to know you!
