Single System of Record for All Modes, All Carriers

Visibility and accuracy of rates is key to effective transportation spend management.

Some solutions can manage rate data for domestic trucking and LTL, but don't provide for ocean, air or parcel modes. Other point solution providers have developed support for ocean, air and parcel without the trucking/LTL capabilities. The result is a hodge-podge of systems and processes to manage rates. A single, multi-mode solution is lacking.

Benefits

A centralized place to easily manage all carrier rates and accessorials.

Modal-specific standard fields for base rates and surcharges along with effective dates and notification of expiring rates is included.

Customizable fields for regions, lanes, zones, transit times, etc., are also available on all contracted and spot quote rate lines.

The Problem

› Lack of common organizational visibility to all rates across all modes, and all carriers, with assurance that they are up to date

› Ensuring that rates are accurate and properly approved by all stakeholders

› Manually gathering data and modeling in Excel in order to support bids by mode and lane

Rate Manager

Trax's Rate Manager solution brings you and your carriers together in a single online system that ensures rates are up to date, and that they conform to your data requirements for audit, procurement, and operations.

Why Rate Manager?

› Shared visibility to all rates and advanced notification of expiring rates

› Submission approval workflow and rate validation

› Link rates and invoice data, cost modeling and simulation

Features

› Shared online visibility to rates and accessorials for all parties

› Library of over 50 prebuilt templates for every mode and every region

› Approval workflow for rate management with multiple approvers

› Authorized carrier submitters with automatic rate data validation

› Advanced notification for expiring rates

› Up to 10 parcel and 20 non-parcel contracts included

› All modes, lane types, services, and rate basis

› APIs for integrating rates with in-house systems

› Configurable data fields

About Trax

Trax is a global leader in Transportation Spend Management solutions. Combining industry leading cloud based applications with expert services, we are transforming traditional freight and parcel audit to help customers better manage and control their global transportation costs and drive enterprise wide efficiency.

With a global footprint spanning North America, Latin America, Asia and Europe, we deliver data based visibility and insights, higher savings and better control of transportation spend for shippers of all sizes.
