

NIC PARTNERS
Technology & Security Experts

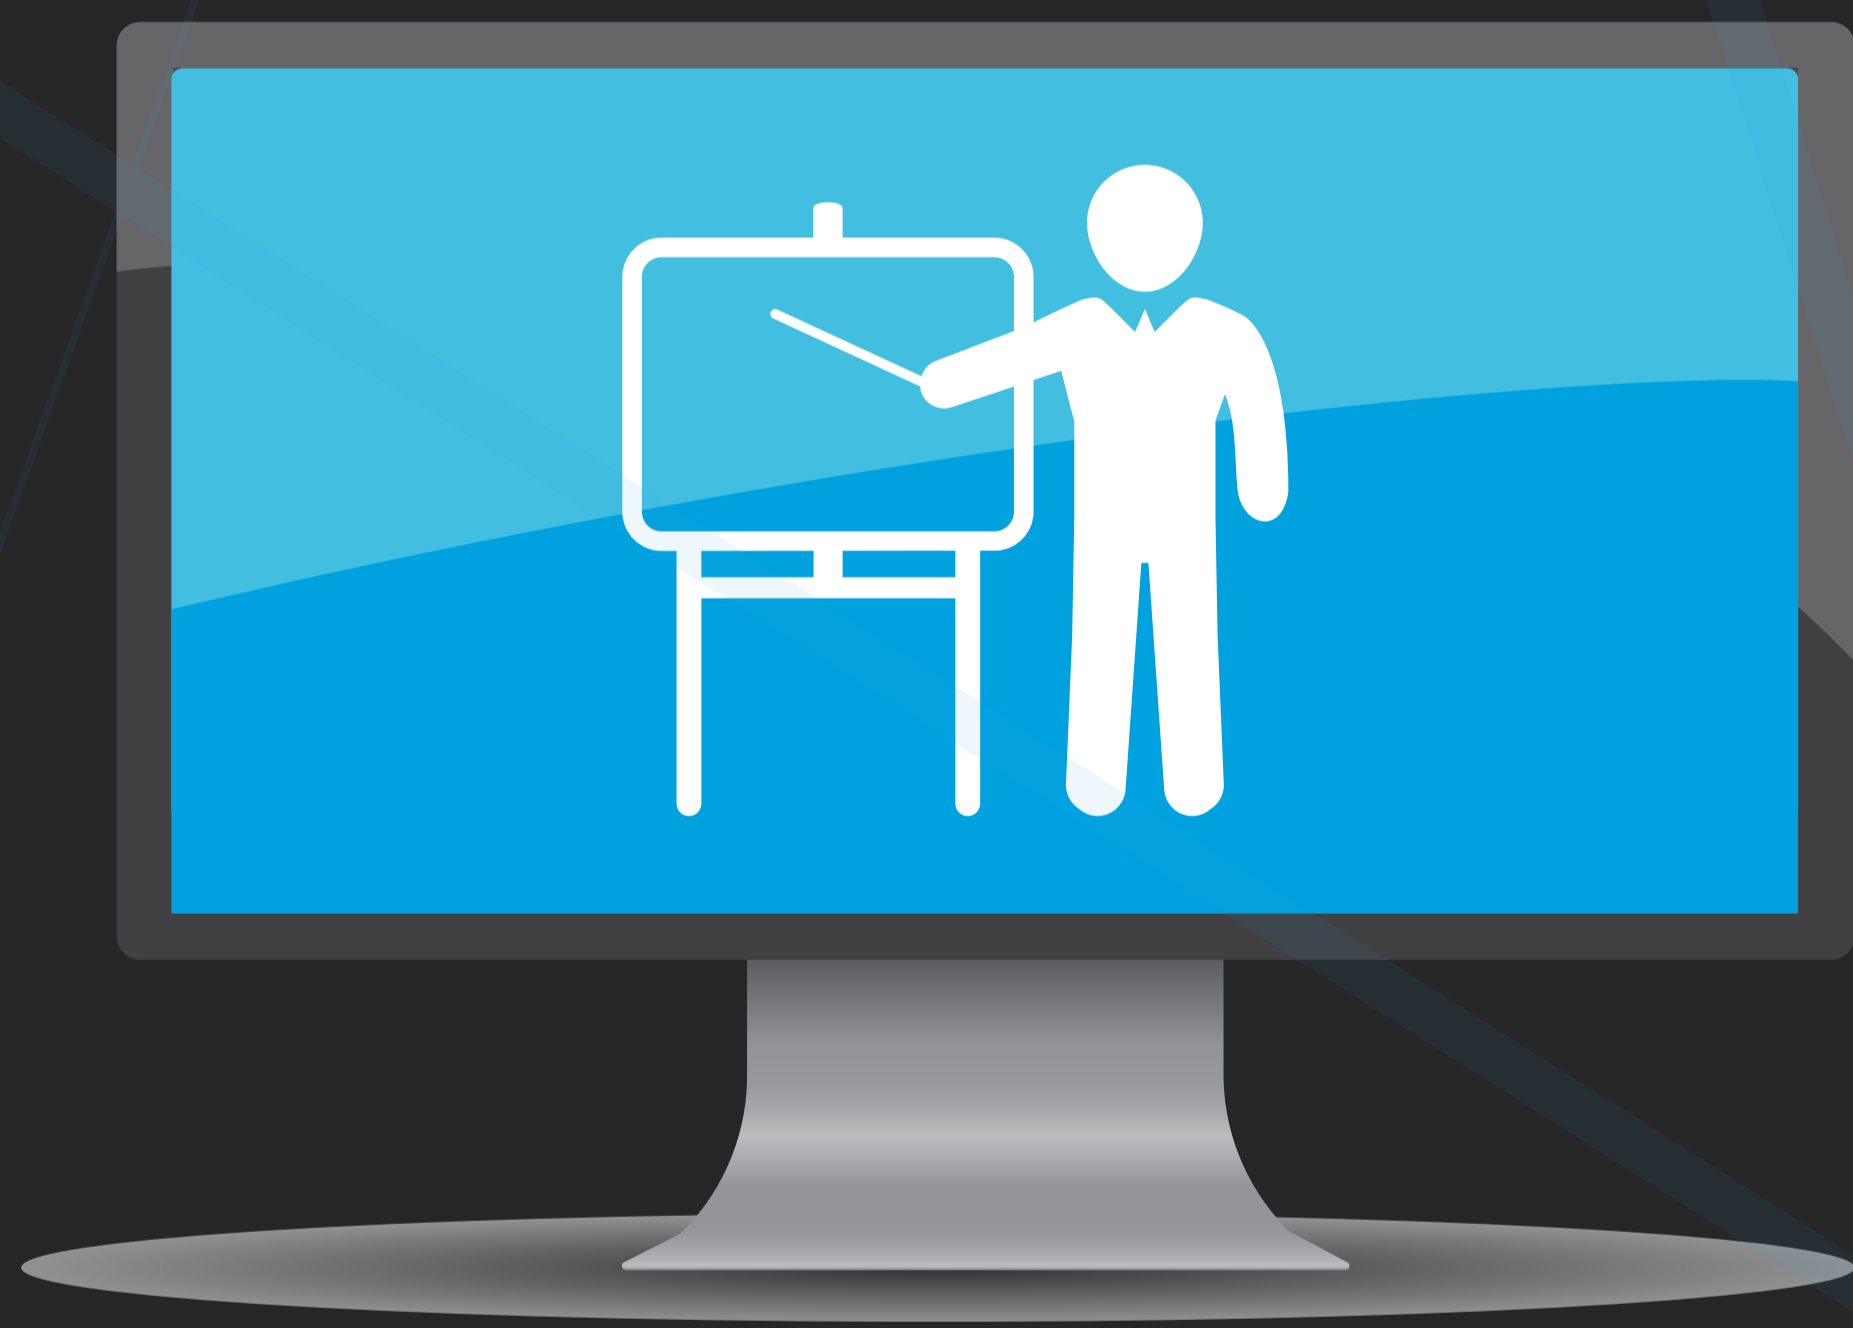

WHAT IS NIC PARTNERS?

YOUR TECHNOLOGY RESOURCE

We offer a number of managed services. Our team of experts covers everything from assessment, to documentation, to network design and integration.

Our services keep security at the top-of-mind to protect student data and schools. Whether you're looking for a structured cabling network or WiFi and AV services, we have technology for you.

EXPERTS IN EDUCATION

With more than 20 years of experience we've come alongside more than 60 Southern California school districts and higher education institutions to enhance physical and network security. By bringing better and safer technology into our schools, we have enriched student outcomes and inspired learning.

Two-thirds of our clients are K-12 or higher education organizations—so we understand the challenges unique to your industry.

SECURITY SAVANT

Campus security is a non-negotiable. Student safety is your priority and we understand how keeping up with the latest secure technology plays into your school's security.

We offer services to help you with all kinds of threats—over the web or on your property.

OUR SECURITY SERVICES:

Video surveillance so you can see what's happening at the push of a button.

Access control that lets only authorized people enter campus.

Collaboration tools to help you easily communicate with everyone, including first responders.

Cybersecurity to protect your systems, data and students.

We're dedicated to maintaining cutting-edge knowledge so we can stay one step ahead of the bad guys. Your industry is constantly changing, so we work hard to make sure we're aware of the latest developments and how they can interface with your existing equipment.

YOUR PARTNER

We're your partner, not your boss. When you ask us to come alongside you, we start our initial assessment with a conversation. Through your input, we can discover the gaps in your existing technology and security. Then, we create a custom program suited to your needs.

We don't stop after implementation. We provide ROI data so you can see exactly how our partnership has shifted your numbers.

OUR FOUR STEP PROCESS IS SIMPLE:

01

CONVERSATION

We clarify your district's goals and priorities with the superintendent.

02

ANALYSIS

We'll a conversation with you to better understand your budget, equipment and staff.

03

OPPORTUNITY

We identify opportunities and agree on our plan of action.

04

PARTNERSHIP

We continue to work alongside you to ensure your vision becomes reality.

READY TO START

We're here to help you get the secure technology you need. Stop by our virtual booth and ask us how we can help you get started.

Or you can always contact us on our website.
