

Electronic Call Monitoring Solution from **OnePlan Software**

OnePlan Software is a cloud based staff rostering software system for the Domiciliary Care Industry, using the latest in cutting edge technology for person centred care. Along with ECM (electronic call monitoring) & NFC (near field communication) technology, OnePlan gives you the availability for real time information to help monitor client care.

STAFF ROSTERING

With a single click you can build a rota from one to four different weeks. You can automate this process allowing the system to automatically build rotas.

CLIENT MANAGEMENT

With OnePlan's client management area, you can manage clients incident reports & holidays, create full risk assessments and control the clients care plans.

MAR CHARTS

OnePlan will track medication prescribed to a client. With this feature, medication groups can be created, which allows you to assign multiple medications.

REPORTING

The reports have been designed to help manage the business. With reports such as staff and client reports, medication reports and many many more.

ELECTRONIC CALL MONITOR

The ECM feature allows staff to clock in and out of clients calls, giving more accurate times.

INSTANT MESSAGING

With OnePlan's free instant messaging staff in the field are able to field communicate back to the office and vice versa.

TRACKING

OnePlan's tracking service allows you to track staff on an individual and company wide base.

CARE PLANS

You can make care plans visible to your staff on the mobile devices through OnePlan's app.

ROTA VIEW

The staff have visibility through the OnePlan app to view the rota seven days forward one day back.

TASK LIST

You can now add tasks to calls, for example: lock doors, turn tv off, get ready for bed etc:
