

# JobsEQ API

Get an API to integrate JobsEQ data with your external website, your central research platform, or an internal tool.

Save research time. Help people find jobs.

The Chmura team made the job postings API setup easy. Within a few weeks, people in Tampa Bay were able to search for jobs straight from our website."

Robin DiSalvo,  
Market Research Analyst at Tampa Bay EDC

## How it Works:

- **1 Call**  
Robin called the Chmura team to discuss her needs.
- **2 Implement**  
The Chmura team worked with Tampa Bay's engineers to help set up the API.
- **3 Support**  
We made sure Robin was 100% satisfied with her API. The Chmura team was always ready to answer her questions, even after implementation.
- **4 Win**  
Over 13,000 job seekers have used Tampa Bay's site to look for work.

JobsEQ is a software tool that gives you the labor market data and analysis you need so you can help your organization thrive.

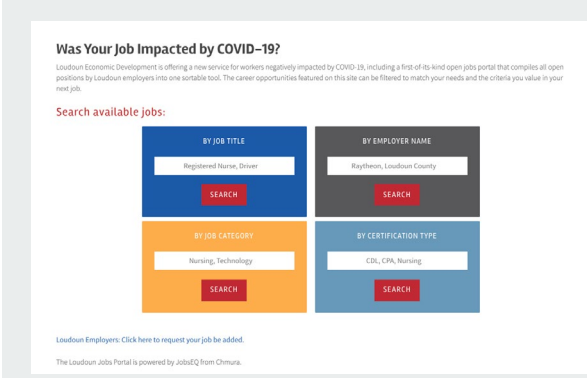

When you get an API, you can stop downloading datasets and integrate JobsEQ data on wages, occupations, and job postings directly onto your internal or external platform.

## Key Features

- All the data from JobsEQ on your site
- Ability to display JobsEQ data on a public-facing website
- Expert support engineers

## The Chmura Difference

- Amazing customer support
- Preferred user interface
- High-quality data

Loudoun County EDC's JobsEQ API in action.

If you want to integrate JobsEQ labor market data on your website, Chmura would be honored to be your partner. To see how a JobsEQ API can help you succeed, reach out to your Account Manager or contact us at [Chmura.com](https://Chmura.com).
