

# Training from the Zeek experts

While thousands of organizations around the world use Zeek, no one knows Zeek better than Corelight. Our founders created the open-source project and have led the effort to extend, improve and scale it over the last 25 years.

Now, you can tap Corelight's expertise to help your organization discover the powerful advantages of Zeek. Whether you're just getting to know Zeek or you're an expert optimizing your Corelight deployment, we can help. We offer three options to get started:

## Free video training

Visit Corelight on YouTube for an overview of Zeek's power. From there, understand k better and learn how it can make you more effective.

## OneDay Virtual Course

For incident responders and threat hunters new to Zeek, , this training balances lectures and lab exercises to take skills to the next level.

## Three Day On-site Course

This in-depth course takes someone with minimal knowledge of Zeek through sensor deployment and use, with an emphasis on real-world data structure.

Examples of the topics we'll cover.

- Introduction to Zeek.
- Common protocols used by attackers
- How to detect and search for threats in your network
- Investigate different use cases from MITRE ATT&CK.
- How to search for malicious activity going back months
