

#DATA ANALYTICS

Azure Synapse PoC in a day

You are on a data goldmine

What if you realize you are on a data goldmine, but cannot use its full potential now? Or what if you want to migrate your data safe and sound to the cloud? Azure Synapse is a holistic data platform which allows you to build and manage a modern data warehouse. Microsoft's SaaS (Software as a Service) platform offers unique elements working together in Azure Synapse:

- Data warehousing to support business critical data and dashboards;
- Data lakes to clean and explore (un)structured data;
- Interactive visualizations of data with Power BI.

A powerful SQL processing engine provides the opportunity to handle and query large datasets to drive insights for all users. Including advanced security and privacy features. So, no more stitching multiple solutions together for data analytics, but use Azure Synapse for unlimited information analysis. Learn more in our Azure Synapse PoC in a day.

Proof of Concept in a day

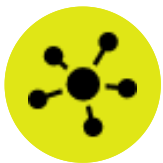

Azure Synapse Analytics is suitable for every business that wants to become more agile, better informed or achieve a competitive advantage by analyzing and utilizing data.

Do you like to test drive Azure Synapse and want to know how to build your own use case? [Subscribe](#) for our Azure Synapse PoC in a day. After you have filled in the online form, we will get in touch with you to plan a day which suits you best.
