## Complete, Turn-Key Drawing and CAD Services Solution

CMS Drawing Manager is designed for construction and facility managers to administer CAD drawings and archive revisions. This, along with a full-service suite of building documentation services, including asset verification and data collection, makes FSI the perfect partner for your facility.

### Key Highlights

- Single repository for storing all your electronic drawings
- Automatically archives each revised CAD file
- Integrates with FSI's CMS Platform to Locations and Assets
- Communicates all revisions via email to appropriate individuals
- Accessible from anywhere by vendors, contractors, architects and managers
- Assign custom attributes to classify and quickly locate the drawings you need
- Download and upload DWG, PDF, JPG, and other file types
- Part of FSI's Integrated Workplace Management System

### CAD Services

**On-Site Building Documentation** – FSI provides on-site visits to physically measure specific renovated areas to newly constructed buildings. Based on the field survey, our team can modify existing drawing or create new drawings from scratch.

**Drawing Revisions** – If you don't have a CAD person in house, FSI's CAD team is there for you. Our professionals update your drawing files from documentation provided by vendors or printed, marked up floorplans. The client/vendor/end-user can send updates, new drawings and renovations to FSI and the CAD Services department will make the requested updates.

**Inventory Services** – FSI provides a comprehensive set of additional supporting services including on-site asset data collection and location inventory and classification. Our staff will update the floorplans and CMS Applications so that information is available to your vendors, managers and team members.

## CMS Drawing Manager Solutions and Services

Let FSI Verify, Update, Store and Organize your facilities' Floorplans

- Life Safety
- Electrical
- Mechanical
- Medical Gas
- Renovations
- As-Built Drawings

**CMS View** incorporates drawing updates to FSI's CMMS Suite of programs that location Assets and Work Orders directly on a floorplan.

**CMS Space Manager** integration lets you classify and report on locations by:

- Square Footage
- Account/Cost Center/Department
- Vacant vs. Occupied
- Utilization Standards (FGI, CSI, etc.)
- Occupancy Type and Occupants
- Custom Attributes

**Compliance** – Supports current regulatory and compliance related requirements, including Life Safety, The Joint Commission and other regulatory authorities
