

Run award-winning Transtream Warehouse apps from any PC, Mac or Mobile browser

1. Scan or enter order# and Transtream accesses order header and line item detail from host system (OMS, ERP, WMS, database, SaaS, etc.)

2. Tab to see ship to, ship from, bill to, alternate, and other addresses. Or access from address book.

3. Validate address and determine residential, commercial, or rural status.

4. Access line item detail to track package contents, or automate international and hazmat shipment processing.

5. Access carrier service from order or route based on business rules.

6. Support for other shipping modes, including international, returns, and freight.

7. Read weight from scale and easily add packages to multi-package shipments (1 of 3, 2 of 3, etc.)

8. Read weight from scale and easily add packages to multi-package shipments (1 of 3, 2 of 3, etc.)

9. Look up package dimensions.

10. Select Ship and print carrier label, update host system with track# and shipping charges, and send email alert.

transtream Warehouse
Ship Anywhere. From Anywhere.

FEATURE BRIEF

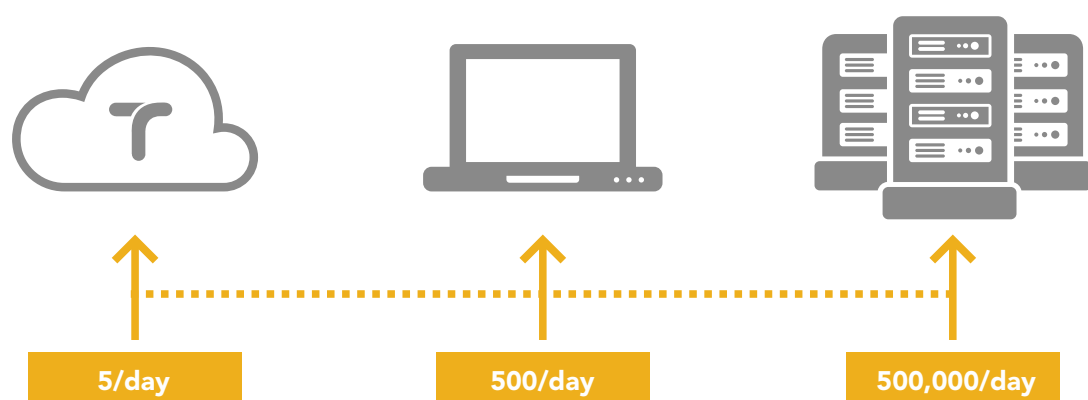

Transtream Warehouse Automates Shipping & Ensures On-time Delivery

Whether you process 5 or 500,000 shipments per day, Transtream Warehouse suite of apps can help you streamline shipping processes across your entire enterprise.

That's why thousands of retailers, manufacturers, and wholesale distributors worldwide trust Transtream to deliver innovative transportation management solutions across their enterprises and supply chain.

One Platform, Scalable for any Shipper

Whether deployed on-premise on a workstation or server, or accessed from the Cloud, Transtream automates routing, packing, rating, shipping, and tracking in your warehouses, stores, or your eCommerce site. Transtream is built to grow as your business grows.

Flexible and Versatile

Our drag and drop Composer tools enable you to adapt best-in-class Transtream apps to meet the needs of users throughout your organization, map data to and from disparate data sources, and then change as your needs change.

KEY FEATURES

Multi-carrier Processing

Transtream Warehouse automates shipping for FedEx, UPS, USPS, DHL, and hundreds of other regional parcel and freight carriers, globally.

Smart Routing

Automatically select the best carrier service based on delivery area, weight, time, date, and other business rules and requirements.

Regulatory Compliance

Control compliance with Transtream's cross border and hazardous material processing capabilities. Automate form printing and regulatory reporting.

Transtream Streamlines Transportation Processes, From Purchase To Payment

Shopping Cart

Transtream eCom Widgets plug into your website to route, rate, and find pickup locations.

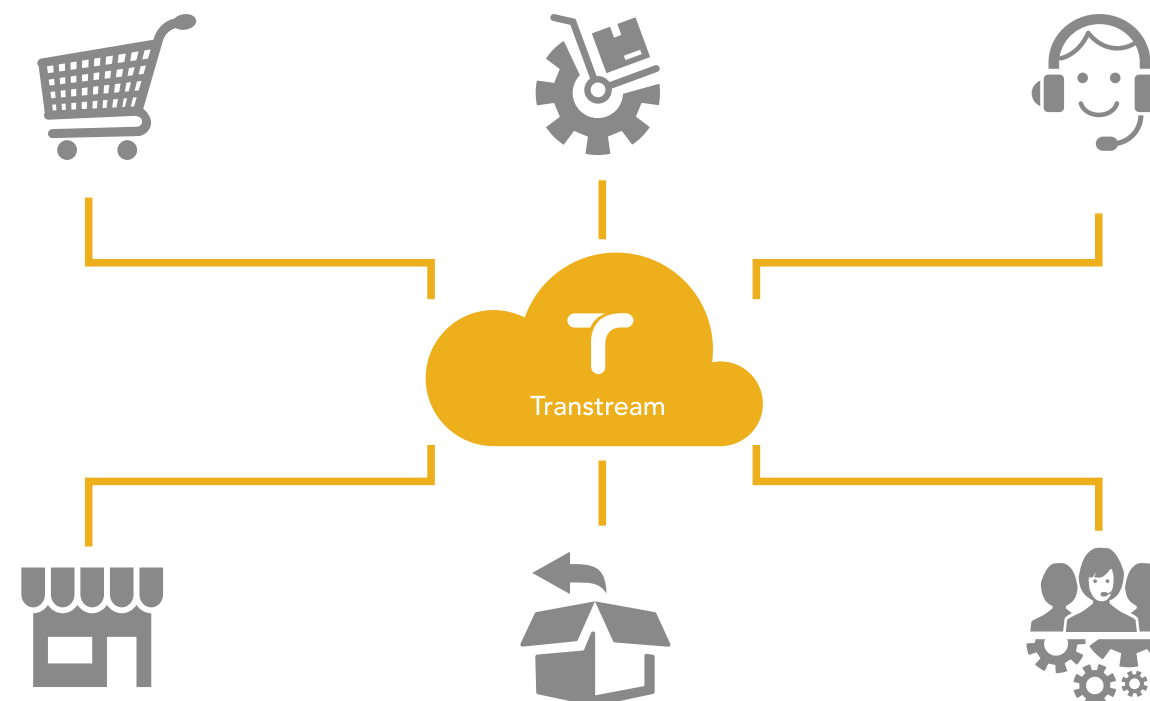

Order Fulfillment

Automate content cartonization, weighing, labeling, and production shipping in warehouses.

Customer Service

Empower your sales and customer service agents with real-time shipment tracking.

Stores & Offices

Roll out easy-to-use, convenient shipping apps to all of your stores and office workers.

Returns

Embed Transtream return and pickup Widgets in your website to increase web site traffic and loyalty.

Management

Transtream provides complete visibility over all shipping activities for reporting and analysis.

Multi-carrier Processing
